

Domestic Market Highlights:

- Mixed sentiment was noticed in major spot markets during the day.
- According to GOI's latest data India marked a decline in Rice area coverage till 15th July 22 as compared to same period last year. Till date Rice has been sown in 128.50 lakh Ha. Of area compared to 155.53 lakh Ha, approximately 17 % less compared to last year for same time period. As per the latest Kharif 2022 Sowing Report, largest area coverage under paddy was in Punjab at around 27.80 Lakh hectares as compared to 29.47 Lakh hectares during same period last year.
- As per the latest updates export price of Indian Rice is around \$ 320 per tonne to various international Rice markets as compared to the export price of \$ 420 per tonne for Thailand and Vietnam sourced Rice for same destinations. As per the estimates Thailand as well as Vietnam Rice crop yield is expected to decline in upcoming season. This may led to increase in the difference between export prices of Indian Rice and export price of Thailand/Vietnam sourced Rice during upcoming days. If this price gap increases further India's Rice exports are expected to increase further.
- As per the official sources in Andhra Pradesh till date Paddy has been sown in 1,77,034 hectares of area against 2,34,381 hectares of area last year for corresponding time period. Nellore, Chittoor, East Godavari and West Godavari are leading districts till date in terms of area sown under Paddy crop in the state.
- As per the official sources in Telangana till date Paddy has been sown in 2,58,239 acres of area against 8,03,124 acres of area last year for corresponding time period. Maximum sowing has been done in the Nizamabad, Karimnagar, Mehabubnagar and Medak districts of the state. Rainfall in the state has been good and 84.5 mm rainfall has been received against the normal of 41.9 mm till now.
- As per the sources 29 districts of Bihar are facing drought like situation making it difficult for Paddy transplantation to take place.
- The rise in the domestic, as well as the international price of Rice, is due to Paddy sowing lagging and rigorous buying of Indian Rice by trade partners like Bangladesh. However, for the upcoming time frame in July 2022 it is expected that monsoon would be gaining the desired pace, and Paddy sowing at various crucial locations would catch upon with the normal area sown under the crop.
- As per the latest reports during the period of April to May 2022 quantity of Basmati Rice exports has fallen down by around 6.1% to 685,530 tonnes this year as compared to previous year for same time period. Although overall value of exports rose by 17.7 % to 53.61 billion rupees during the respective time period.
- Export price of 5% Broken Parboiled Indian Rice were reported at \$361-\$366 per Tonne as compared to previous week's price of \$355 -\$360 per tonne, on the account of continues strong demand of Indian Rice from the end of Bangladesh traders.
