

Domestic Market Highlights:

- Steady sentiments were noticed in major spot markets during the day.
- The Center has so far procured 881.32 lakh tonne (LMT) of paddy in the current 2021–22 marketing year at the Minimum Support Price (MSP), according to the most recent statistics from FCI as of August 31. The MSP value has so far benefited over 130.65 lakh farmers.
- As per sources, the weekly average price of Sugandha Rice fell by 3.4% to Rs. 7,150 per quintal in the benchmark Narella market, while the price of 1121 steam wand reduced by 0.9% over the previous week to Rs. 8,916 per quintal. Due to an upsurge in arrivals, millers and stockists are currently active.
- As per sources, in several parts of Punjab (Pathankot, Mohali), and Haryana (Karnal), dwarfing disease of paddy has caused a 5–10% crop loss. However, overall loss in these states is likely to be around 2% to 5%.
- As of 9th September 2022, Rice has been sown in 393.79 lakh Ha. of area compared to 414.31 lakh Ha of previous year, down by approximately 5%. The paddy acreage deficit decreased in various paddy growing states. However, reportedly recent rains have added to some fresh sowing which may narrow down the lag.
- On 8th September, GOI imposed an export duty of 20% on exports of non-basmati grades of rice/paddy, which will result into higher export price thus squeezing some international demand for non-basmati. Already there are some reports that buyers are reluctant to pay the duty difference due to which the stocks are choked in the ports. Alongside this situation, the govt. also puts a ban on the export of 100% broken rice to augment the domestic supplies.
- Export price of 5% Broken Parboiled Indian Rice were quoted at \$379-387 per Tonne unchanged from last week due to rise in export demand from Bangladesh.
- As per the sources, due to uncertainties about a potential decline in kharif paddy production, particularly in Jharkhand, West Bengal and Bihar, which have experienced below-average rainfall, domestic rice prices have risen by 3-7% in the last week to 10 days. Due to India being the only provider of the good kind of parboiled rice, export prices have also increased. Fears of a decline in fresh rice production, particularly as a result of Jharkhand and Bihar's inadequate rainfall, have caused the price of the Swarna variety of parboiled rice to rise by Rs 1-2/kg over the past 8–10 days to Rs 26–28/kg.
- According to the sources, basmati exporters from Haryana have requested a reduction of levies like mandi fee, rural development cess, and agent commission imposed on the purchase of paddy from the current collective 6.5% consisting of Haryana's arthia commission of 2.5%, market charge of 2%, and rural development cess of 2%. The margins of Haryana's basmati exporters are being pressured by higher taxes, compelling many traders and processors to buy their paddy from Delhi and Punjab.
- Due to excessive seeding delays, uncertainty still exists regarding the final harvest.

Domestic Market Outlook (Non-Basmati):

- Foreseeing on going domestic and international demand, with little arrivals it is expected that domestic prices would remain steady in near term as per existing scenario.

International Market Highlights

- As per sources, amidst global food insecurity this year, Thailand is likely to increase its rice exports upto 7.5 million tonnes which is higher from its previous target of 7 million tonnes because of higher production and weak baht.
- According to sources, rice prices have increased by over 5% as Bangladesh further reduced the import duty on from 25% to 15.25% to increase imports.
- As per the sources, a slight increase was reported in Thailand's 5% broken rice prices at \$416-\$420 per tonne as compared to \$415-\$416 per tonne last week due to strong domestic demand and export to Iran.
- Sources state that Vietnam's 5% broken rice prices remained constant at \$390-\$393 per tonne, unchanged from last two weeks.
- According to sources, the abundant rice supply in major exporters may serve as a check on price hikes from stable Asian demand, and it may also significantly offset an expected fall in output owing to crop damage from floods in Pakistan and a severe heatwave in China.
- As per sources, Sri Lanka imports over 600,000 metric tonnes of inferior and poisonous rice due to previous government's decision to ban the import of chemical fertilisers and encourage organic cultivation.
- According to sources, Vietnam's rice exports are estimated to have increased by nearly 19% from last year to 4.7 million tonnes for the months of January-August.
- As per sources, North Korean government plans to import 10,000 tonnes of rice from India. Due to floods and COVID-19, the nation is suffering from serious food crisis.
- According to sources, Bangladeshi government has further reduced the import tax on rice to 5% while liberalising imports into the nation to increase the country's stock of the foodgrain.
- According to sources, the Southeast Sulawesi Government has been urged by Indonesia's Agriculture Minister to export rice in order to make significant profits given the region's strong rice output. According to the minister, Indonesia has the second-cheapest rice prices in the world, at Rp 12,000 per kg. In the meantime, the cost of a kg of rice has increased to Rp 47,000 in Japan, Rp 62,000 in the US, Rp 29,000 in Singapore, and Rp 22,000 in Malaysia. The government can export rice since it has enough on hand to cover domestic demand for the next two years.

Indian Weather/ Monsoon Highlights:

- Light to moderate rain with few heavy spells are possible over Madhya Pradesh, Uttar Pradesh, Bihar, West Bengal, Jharkhand, parts of Odisha, Haryana, Telangana and coastal Andhra Pradesh.
