

Domestic Market Highlights:

- Steady sentiments were noticed in major spot markets during the day.
- Export price of 5% Broken Parboiled Indian Rice were quoted at \$385- \$392 per Tonne as compared to prices of \$379- \$387 per Tonne during past week. Export restrictions on Indian rice compelled buyers for switching to other suppliers such as Vietnam, Thailand which resulted in higher prices from other Asian centres.
- The weekly average price of Sughandha Rice fell by 0.7% to Rs. 7,100 per quintal in the benchmark Narella market, while the prices of 1121 steam wand eased by 0.74% over the previous week to Rs. 8,850 per quintal. Due to increase in new arrivals in some markets besides increased export duty and ban on exports of 100% broken rice. Reportedly, millers and stockists are currently active in the market for new arrivals/supplies.
- In August, the total exports of basmati & non-basmati rice witnessed upsurge of 46.5% to 18.38 LMT as compared last month.
- Latest data from Ministry of Agriculture shows that India's rice area coverage has decreased. As of 9th September 2022, Rice has been sown in 393.79 lakh Ha. of area compared to 414.31 lakh Ha of previous year, down by 5%. Given the decline in sown area this season mainly in Eastern states along with lower sown area in southern states coupled with impact of adverse weather of excess rains over the crop, trade anticipates there would be 15-20% decline in paddy production. This would lead to higher prices of paddy in the markets which may also affect the procurement by Govt. as happened in wheat thus, lowering the central pool stocks.
- As per sources, in several parts of Punjab (Pathankot, Mohali), and Haryana (Karnal), dwarfing disease of paddy has caused a 5–10% crop loss. However, overall loss in these states is likely to be around 2% to 5%.
- On 8th September, GOI imposed an export duty of 20% on exports of non-basmati grades of rice/paddy, which will result into higher export price thus squeezing some international demand for non-basmati. Already there are some reports that buyers are reluctant to pay the duty difference due to which the stocks are chocked in the ports. Alongside this situation, the govt. also puts a ban on the export of 100% broken rice to augment the domestic supplies.

- As per the sources, due to uncertainties about a potential decline in kharif paddy production, particularly in Jharkhand, West Bengal and Bihar, which have experienced below-average rainfall, domestic rice prices have risen by 3-7% in the last week to 10 days. Due to India being the only provider of the good kind of parboiled rice, export prices have also increased. Fears of a decline in fresh rice production, particularly as a result of Jharkhand and Bihar's inadequate rainfall, have caused the price of the Swarna variety of parboiled rice to rise by Rs 1-2/kg over the past 8–10 days to Rs 26–28/kg.
- According to the sources, basmati exporters from Haryana have requested a reduction of levies like mandi fee, rural development cess, and agent commission imposed on the purchase of paddy from the current collective 6.5% consisting of Haryana's arthia commission of 2.5%, market charge of 2%, and rural development cess of 2%. The margins of Haryana's basmati exporters are being pressured by higher taxes, compelling many traders and processors to buy their paddy from Delhi and Punjab.
- Due to excessive seeding delays, uncertainty still exists regarding the final harvest.

Domestic Market Outlook (Non-Basmati):

- As per prevailing market fundamentals, such as export restrictions on various grades of non-basmati rice/paddy, and with increased arrivals it is expected that domestic prices would remain bearish in near term as per existing scenario.

International Market Highlights

- As per the sources, a slight increase was reported in Thailand's 5% broken rice prices at \$425-\$435 per tonne as compared to \$416-\$420 per tonne last week. The flood, heavy rains, and some transportation issues have all slowed down the supply of rice.
- Sources state that Vietnam's 5% broken rice prices rose to \$400-\$410 per tonne which were reported at \$390-\$393 in the previous week. Due to export restrictions on Indian rice, the Vietnamese rice prices witnessed this upsurge.
- As per sources, amidst global food insecurity this year, Thailand is likely to increase its rice exports upto 7.5 million tonnes which is higher from its previous target of 7 million tonnes because of higher production and weak baht.
- According to sources, rice prices have increased by over 5% as Bangladesh further reduced the import duty on from 25% to 15.25% to increase imports.

- According to sources, the abundant rice supply in major exporters may serve as a check on price hikes from stable Asian demand, and it may also significantly offset an expected fall in output owing to crop damage from floods in Pakistan and a severe heatwave in China.
- As per sources, Sri Lanka imports over 600,000 metric tonnes of inferior and poisonous rice due to previous government's decision to ban the import of chemical fertilisers and encourage organic cultivation.
- According to sources, Vietnam's rice exports are estimated to have increased by nearly 19% from last year to 4.7 million tonnes for the months of January-August.
- As per sources, North Korean government plans to import 10,000 tonnes of rice from India. Due to floods and COVID-19, the nation is suffering from serious food crisis.
- According to sources, Bangladeshi government has further reduced the import tax on rice to 5% while liberalising imports into the nation to increase the country's stock of the foodgrain.
- According to sources, the Southeast Sulawesi Government has been urged by Indonesia's Agriculture Minister to export rice in order to make significant profits given the region's strong rice output. According to the minister, Indonesia has the second-cheapest rice prices in the world, at Rp 12,000 per kg. In the meantime, the cost of a kg of rice has increased to Rp 47,000 in Japan, Rp 62,000 in the US, Rp 29,000 in Singapore, and Rp 22,000 in Malaysia. The government can export rice since it has enough on hand to cover domestic demand for the next two years.

Indian Weather/ Monsoon Highlights:

- Light to moderate rain with few heavy spells are possible over Madhya Pradesh, Uttar Pradesh, Bihar, West Bengal, Jharkhand, parts of Odisha, Haryana, Telangana and coastal Andhra Pradesh.
