

Domestic Market Highlights:

- Steady sentiments were noticed in major spot markets during the day.
- On 27th September, 2022, G.O.I. has further extended the export period of broken rice from 30th September, 2022 till 15th October, 2022 to permit the export of those consignments that had already been scheduled for transportation and were waiting in warehouses at various ports.
- Rice mill owners in Tamil Nadu have increased the price of rice by Rs 8–Rs 10 per kg due to an increased demand and high paddy prices. The factors behind this are hike in electricity tariff and imposition of 5% GST on food items.
- As per sources, HAFED has purchased approximately 20,000 MT of basmati rice from Haryana farmers at market rates for a 20,000 tonne rice export to Saudi Arabia valued at \$21.95 million.
- Rice prices remained rangebound throughout the week at majority cash markets across the country. At bench market Narella, Delhi, the average prices of 1121 steam wand rose by 0.5% over the previous week to Rs. 8,883.33 per quintal. As the pace of arrivals has slowed down in some markets besides the extended deadline of export of 100% broken rice, to release the stored stocks at ports, attributed to a rise in prices.
- Latest data from Ministry of Agriculture shows that India's rice area coverage has decreased. As of 23rd September 2022, Rice has been sown in 401.56 lakh Ha. of area compared to 425 lakh Ha of previous year, down by 5.51%. Trade participants predict that paddy production will decline by 11–12% as a result of the decrease in sown area this season, which has primarily affected eastern states. There has also been a decrease in sown area in southern states, in addition to the negative effects of excessive rain on the crop. This would lead to higher prices of paddy in the markets moving ahead.
- Export price of 5% Broken Parboiled Indian Rice quoted at \$385-392 per Tonne, unchanged from last week. Although some buyers were willing to pay more, the majority were waiting for prices to settle. Additionally, the limitations made buyers switch to competing vendors such as Thailand and Vietnam.
- As per sources, this week, India's rice export prices were close to a 1-1/2 year high as traders struggled with port bottlenecks brought on by recent restrictions on international shipping and buyers looked for more affordable supply from other locations.

- In August, the total exports of basmati & non-basmati rice witnessed upsurge of 46.5% to 18.38 LMT as compared last month.
- As per sources, in several parts of Punjab (Pathankot, Mohali), and Haryana (Karnal), dwarfing disease of paddy has caused a 5–10% crop loss. However, overall loss in these states is likely to be around 2% to 5%.

Domestic Market Outlook (Non-Basmati):

- As per prevailing market fundamentals, such as low arrivals and the extended deadline of export of 100% broken rice, to release the stored stocks at ports it is expected that domestic prices would remain bullish in near term as per existing scenario.

International Market Highlights

- According to sources, it is expected that Vietnam's market prices for rice would rise further in the coming months due to a decline in the supply of Indian rice.
- As per sources, Vietnam's rice exports will amount to 1.5–1.7 million tons, bringing the country's yearly output to 6.3–6.5 million tons, exceeding 2021 by 100–200 thousand tons.
- Export price of Vietnam's 5% broken rice were quoted at \$385-392 per Tonne, unchanged from last week. As exporters increased their purchases from farmers in anticipation of better export rates, domestic rice prices recently increased.
- As per the sources, Thailand's 5% broken rice prices widened to \$420-\$435 per tonne from \$425-\$435 per tonne last week amid a weaker baht. Due to the export demand from Japan, Bangladesh and Pakistan.
- As per sources, amidst global food insecurity this year, Thailand is likely to increase its rice exports upto 7.5 million tonnes which is higher from its previous target of 7 million tonnes because of higher production and weak baht.
- According to sources, rice prices have increased by over 5% as Bangladesh further reduced the import duty on from 25% to 15.25% to increase imports.
- According to sources, the abundant rice supply in major exporters may serve as a check on price hikes from stable Asian demand, and it may also significantly offset an expected fall in output owing to crop damage from floods in Pakistan and a severe heatwave in China.

- As per sources, Sri Lanka imports over 600,000 metric tonnes of inferior and poisonous rice due to previous government's decision to ban the import of chemical fertilisers and encourage organic cultivation.
- According to sources, Vietnam's rice exports are estimated to have increased by nearly 19% from last year to 4.7 million tonnes for the months of January-August.
- As per sources, North Korean government plans to import 10,000 tonnes of rice from India. Due to floods and COVID-19, the nation is suffering from serious food crisis.
- According to sources, Bangladeshi government has further reduced the import tax on rice to 5% while liberalising imports into the nation to increase the country's stock of the foodgrain.
