

Domestic Market Highlights:

- Steady sentiments were noticed in major spot markets during the day.
- As per sources, paddy procurement starts in Punjab on 3rd Oct, 2022. A maximum of more than 5,000 tonnes of non-basmati types arrived in Patiala. About 8,000 tonnes were purchased by private companies, and the final 4,000 tonnes were acquired by government organisations. On the first day of the formal purchase of the significant kharif crop, about 17,000 tonnes of paddy remained unsold.
- As per sources, the first advance estimates of production of major agricultural crops released by the Union Ministry of Agriculture and Farmers Welfare on 21st September, 2022, the production of kharif rice in India is expected to reach a record 104.99 million tonnes during the 2022–23 season, down by 6% over what was harvested during the previous harvest season.
- As of latest sowing update on 30th September 2022, area deficit of paddy has decreased. Rice has been sown in 402.88 lakh Ha. of area compared to 423.04 lakh Ha of previous year, down by 4.76% due to erratic monsoon rains in Jharkhand, West Bengal, and Uttar Pradesh.
- Market sentiments remained almost stable throughout the week due to release of old stock by millers and stockists as well as export restrictions. The weekly average price of Sugandha Rice remained steady at Rs. 7,100 per quintal in the benchmark Narella market, and the prices of 1121 steam wand also remained stable at Rs. 8800 down by 0.71% over the previous week.
- Export price of 5% Broken Parboiled Indian Rice eased at \$376-384 per Tonne as that of \$385-\$392 last week due to the weaker rupee and anticipations of increased supply as a result of the extension of government's PMGKAY scheme.
- On 27th September, 2022, G.O.I. has further extended the export period of broken rice from 30th September, 2022 till 15th October, 2022 to permit the export of those consignments that had already been scheduled for transportation and were waiting in warehouses at various ports.
- Rice mill owners in Tamil Nadu have increased the price of rice by Rs 8–Rs 10 per kg due to an increased demand and high paddy prices. The factors behind this are hike in electricity tariff and imposition of 5% GST on food items.
- As per sources, HAFED has purchased approximately 20,000 MT of basmati rice from Haryana farmers at market rates for a 20,000 tonne rice export to Saudi Arabia valued at \$21.95 million.

- As per sources, this week, India's rice export prices were close to a 1-1/2 year high as traders struggled with port bottlenecks brought on by recent restrictions on international shipping and buyers looked for more affordable supply from other locations.
- In August, the total exports of basmati & non-basmati rice witnessed upsurge of 46.5% to 18.38 LMT as compared last month.

Domestic Market Outlook (Non-Basmati):

- As per prevailing market fundamentals, such as low arrivals and the extended deadline of export of 100% broken rice, to release the stored stocks at ports it is expected that domestic prices would remain bullish in near term as per existing scenario.

International Market Highlights

- As per sources, in Bangladesh, prevailing prices of traditionally marketed rice have recorded a hike of maximum 17% as that of last year. A shortage of supply in local crops since the Boro season, a fall in Aus output, and decreased imports are key reasons attributing to a hike in prices.
- Export price of Vietnam's 5% broken rice rose to \$420-\$425 per Tonne, from \$400-\$410 last week due to end of the summer-autumn harvest.
- As per the sources, Thailand's 5% broken rice prices rose to \$422-\$435 per tonne from \$420-\$435 per tonne last week amid a weaker baht. Due to the export demand from Middle East and South Asia.
- According to sources, it is expected that Vietnam's market prices for rice would rise further in the coming months due to a decline in the supply of Indian rice.
- As per sources, Vietnam's rice exports will amount to 1.5–1.7 million tons, bringing the country's yearly output to 6.3–6.5 million tons, exceeding 2021 by 100–200 thousand tons.
- As per sources, amidst global food insecurity this year, Thailand is likely to increase its rice exports upto 7.5 million tonnes which is higher from its previous target of 7 million tonnes because of higher production and weak baht.
- According to sources, rice prices have increased by over 5% as Bangladesh further reduced the import duty on from 25% to 15.25% to increase imports.

- According to sources, the abundant rice supply in major exporters may serve as a check on price hikes from stable Asian demand, and it may also significantly offset an expected fall in output owing to crop damage from floods in Pakistan and a severe heatwave in China.
- As per sources, Sri Lanka imports over 600,000 metric tonnes of inferior and poisonous rice due to previous government's decision to ban the import of chemical fertilisers and encourage organic cultivation.
- According to sources, Vietnam's rice exports are estimated to have increased by nearly 19% from last year to 4.7 million tonnes for the months of January-August.
- As per sources, North Korean government plans to import 10,000 tonnes of rice from India. Due to floods and COVID-19, the nation is suffering from serious food crisis.
