

Domestic Market Highlights:

- Market remained stable during the day in major spot markets due to release of old stock by millers and stockists as well as export restrictions and new arrivals from Kharif crop.
- Export price of 5% Broken Parboiled Indian Rice eased at \$373-382 per Tonne as that of \$376-384 last week due to depressed export demand from middle east as most of them are buying from Pakistan.
- As of notification released by G.O.I. on 12th October 2022, the export quota of only broken rice for 2022-23 is 3,97,267 MT. Traders will benefit from the concession to permit exports against already-issued LCs (Letter of Credit) before the ban on export of broken rice 8th September, 2022 onwards because many shipments were stuck and customers wanted quick dispatch.
- As per sources, paddy procurement starts in Punjab on 3rd Oct, 2022. A maximum of more than 5,000 tonnes of non-basmati types arrived in Patiala. About 8,000 tonnes were purchased by private companies, and the final 4,000 tonnes were acquired by government organisations. On the first day of the formal purchase of the significant kharif crop, about 17,000 tonnes of paddy remained unsold.
- As per sources, the first advance estimates of production of major agricultural crops released by the Union Ministry of Agriculture and Farmers Welfare on 21st September, 2022, the production of kharif rice in India is expected to reach a record 104.99 million tonnes during the 2022–23 season, down by 6% over what was harvested during the previous harvest season.
- As of latest sowing update on 30th September 2022, area deficit of paddy has decreased. Rice has been sown in 402.88 lakh Ha. of area compared to 423.04 lakh Ha of previous year, down by 4.76% due to erratic monsoon rains in Jharkhand, West Bengal, and Uttar Pradesh.
- Market sentiments remained almost stable throughout the week due to release of old stock by millers and stockists as well as export restrictions. The weekly average price of Sugandha Rice remained steady at Rs. 7,100 per quintal in the benchmark Narella market, and the prices of 1121 steam wand also remained stable at Rs. 8800 down by 0.71% over the previous week.
- On 27th September, 2022, G.O.I. has further extended the export period of broken rice from 30th September, 2022 till 15th October, 2022 to permit the export of those consignments that had already been scheduled for transportation and were waiting in warehouses at various ports.

- Rice mill owners in Tamil Nadu have increased the price of rice by Rs 8–Rs 10 per kg due to an increased demand and high paddy prices. The factors behind this are hike in electricity tariff and imposition of 5% GST on food items.
- As per sources, HAFED has purchased approximately 20,000 MT of basmati rice from Haryana farmers at market rates for a 20,000 tonne rice export to Saudi Arabia valued at \$21.95 million.
- As per sources, this week, India's rice export prices were close to a 1-1/2 year high as traders struggled with port bottlenecks brought on by recent restrictions on international shipping and buyers looked for more affordable supply from other locations.

Domestic Market Outlook (Non-Basmati):

- As per prevailing market fundamentals, such as low arrivals and the extended deadline of export of 100% broken rice, to release the stored stocks at ports it is expected that domestic prices would remain bullish in near term as per existing scenario.

International Market Highlights

- Vietnam's 5% broken rice rose to \$423-\$425 per Tonne, from \$420-\$425 last week due to end of the summer-autumn harvest and India's export restrictions.
- Thailand's 5% broken rice prices also rose to \$424-\$435 per tonne from \$422-\$435 per tonne last week amid a weaker baht due to the increased export demand from Middle East and South Asia because of India's export restrictions on non-Basmati rice.
- As per sources, to ensure a sufficient supply at times of global food shortages and emergencies, the Philippines will increase its budget for rice buffer reserves by almost 70% the next year.
- Major crops like cotton and wheat have been harmed by the weather, but most of the rice crop has been spared, and Pakistan is on track to meet its 4.8 million tonnes export goal this season.
- As per sources, this year's floods in Pakistan affected the non-basmati growing region, but the basmati belt remains unaffected and has suffered no damage. Due to Pakistan's currency's sharp decline, basmati rice export prices are currently very competitive against India, which has a negative impact on India's pricing and export demand.
- According to sources, Thailand's rice exports could hit 8 million tonnes this year after typhoon Noru's flooding had little effect and the weak baht boosted global sales.

- As per sources, in Bangladesh, prevailing prices of traditionally marketed rice have recorded a hike of maximum 17% as that of last year. A shortage of supply in local crops since the Boro season, a fall in Aus output, and decreased imports are key reasons attributing to a hike in prices.
- According to sources, it is expected that Vietnam's market prices for rice would rise further in the coming months due to a decline in the supply of Indian rice.
- As per sources, Vietnam's rice exports will amount to 1.5–1.7 million tons, bringing the country's yearly output to 6.3–6.5 million tons, exceeding 2021 by 100–200 thousand tons.
- According to sources, rice prices have increased by over 5% as Bangladesh further reduced the import duty on from 25% to 15.25% to increase imports.
- According to sources, the abundant rice supply in major exporters may serve as a check on price hikes from stable Asian demand, and it may also significantly offset an expected fall in output owing to crop damage from floods in Pakistan and a severe heatwave in China.
- As per sources, Sri Lanka imports over 600,000 metric tonnes of inferior and poisonous rice due to previous government's decision to ban the import of chemical fertilisers and encourage organic cultivation.
