

Domestic Market Highlights:

- Mixed sentiments were noticed during the day in major mandis of the country due to increased arrivals from newly harvested crop.
- As on October 31st, 2022, the Center has so far purchased 170.54 lakh tonne (LMT) of paddy in the current 2022–23 marketing year at the Minimum Support Price against the Kharif season's target of 550 LMT. The MSP value has so far benefited around 100.37 lakh farmers.
- Market prices remained bearish throughout this week due to fresh arrivals and lull export demand. In Ludhiana mandi, arrivals of 20,000 bags of all varieties have been reported so far while in aromatic section, like traditional basmati, 1509, 1121 varieties of paddy are likely to arrive after 10 days. Currently, Pr 13/14 and common grades of non-basmati are being purchased by procurement agencies including FCI. Private players and millers are not active for the bulk volume as they have already purchased to fulfil their immediate requirements.
- Meanwhile, at benchmark Narella market, the weekly average price of Sugandha rice eased marginally by 1.3% at Rs. 6,416.66 per quintal, whereas, the prices of 1121 steam wand corrected by 5.8% at Rs. 8241.66 per quintal.
- On 31st October, 2022, GOI released a notification to let Nepal import 6 lakh tonnes of unmilled rice duty-free, which is thought to help the Himalayan country meet its food security needs as Nepal depends on India to meet its food grain's demand. The quantity allowed will be effective as of the notification date, which is October 31, 2022.
- The IIRR released the improved Sambha Mahsuri (ISM) and blast resistant varieties like DRR Dhan 51 and DRR Dhan 62 in consideration of this issue. Farmers in Telangana and Andhra Pradesh who are producing DRR Dhan 53 varieties are already seeing good yields in regions afflicted by the bacterial blight.
- Export price of 5% Broken Parboiled Indian Rice eased marginally at \$375-\$384 per Tonne as that of \$374-\$382 last week due to poor demand and concerns that recent rains may affect paddy quality. As earlier this month, heavy rains damaged crops right before harvest, lowering crop quality in important producing states including as Uttar Pradesh, West Bengal, and Andhra Pradesh.
- The Chhattisgarh government will start making purchases at the minimum support price (MSP) on November 1 in order to meet its goal of buying 11 million tonnes of paddy during the current kharif marketing season.

- Despite yield losses from unseasonal rains and dwarfing disease, the Haryana government is likely to meet its goal of purchasing 55 lakh MT of paddy at the minimum support price (MSP) amid rumours that the arrival of rice from the neighbouring state of Uttar Pradesh could aid the procurement agencies in reaching the target.
- As per Andhra Pradesh agricultural department, as on 12th October 2022 Paddy sowing activity completed around 14,38,837 hectares as compared to last year same period 15,66,082 hectares, down by 8.12 %.
- As per sources, the first advance estimates of production of major agricultural crops released by the Union Ministry of Agriculture and Farmers Welfare on 21st September, 2022, the production of kharif rice in India is expected to reach a record 104.99 million tonnes during the 2022–23 season, down by 6% over what was harvested during the previous harvest season.

Domestic Market Outlook (Non-Basmati):

- As per prevailing market fundamentals, such as high arrivals and depressed export demand, it is expected that domestic prices would remain bearish in near term as per existing scenario.

International Market Highlights

- As per sources, Vietnam exports 6.07 MMT of rice valued at 2.94 billion USD, an increase of 7.4% in value and 17.2% in volume during Jan-Oct, 2022. During the time period, export prices decreased by 8.3% from the same time last year, averaging 484 USD per tonne.
- According to sources, Vietnam's rice market is currently at its high, which helped the nation generate \$3 billion in export revenue during January-October 2022, and it is expected to increase further.
- As per sources, it is likely that Bangladesh, which has been working to lower high domestic prices after floods earlier this year damaged 254,000 tonnes of rice, will suffer as a result of Cyclone Sitrang's destruction of rice fields on 6,000 hectares.
- Vietnamese 5% broken rice's price per tonne stayed the same at \$425-\$430. More demand for exports is coming from the Philippines, Cuba, Bangladesh, and Africa.
- Thailand's 5% broken rice prices remained almost same at \$405 due to flat domestic and foreign demand.

- According to sources, Thailand's main rice harvest for 2022–23 would most likely be harvested two weeks later than usual due to floods as a result limiting output for the season, which typically starts in early November.
- As per sources, to ensure a sufficient supply at times of global food shortages and emergencies, the Philippines will increase its budget for rice buffer reserves by almost 70% the next year.
- Major crops like cotton and wheat have been harmed by the weather, but most of the rice crop has been spared, and Pakistan is on track to meet its 4.8 million tonnes export goal this season.
- As per sources, this year's floods in Pakistan affected the non-basmati growing region, but the basmati belt remains unaffected and has suffered no damage. Due to Pakistan's currency's sharp decline, basmati rice export prices are currently very competitive against India, which has a negative impact on India's pricing and export demand.
- According to sources, Thailand's rice exports could hit 8 million tonnes this year after typhoon Noru's flooding had little effect and the weak baht boosted global sales.
- As per sources, in Bangladesh, prevailing prices of traditionally marketed rice have recorded a hike of maximum 17% as that of last year. A shortage of supply in local crops since the Boro season, a fall in Aus output, and decreased imports are key reasons attributing to a hike in prices.
