International Market Highlights

- As per sources, this year, Vietnam is expected to export more than seven million tonnes of rice, bringing in an estimated US\$3.5 billion. During the first ten months of the year, Vietnam exported more than six million tonnes of rice worth US\$2.9 million, an increase of 8% in value and 17% in volume over the same period last year.
- As per sources, over 860,410 tonnes of rice were exported by Myanmar in the first eight months of the fiscal year 2022–23.
- As per sources, in November, the Philippines imported 3.37 million metric tonnes (MT) of rice, which is a 34.14 percent increase over the 2.51 million MT imported during the same period last year.
- Due to the Middle East's major buyers increasing their inventories despite prices rising by almost a quarter, India's exports of premium basmati rice are expected to increase by 15% compared to last year.
- Vietnamese 5% broken rice's price per ton traded up at \$440-\$445 as compared to \$438 last week due to increased demand from Indonesia. Domestic supplies are tight so the prices are likely to rise over next few weeks.
- Thailand's 5% broken rice prices upsurged to \$427-\$440 as compared to \$419-\$425 last week due to strong demand.
- As per sources, the revival of the European market and the introduction of new markets, such as Bangladesh, have led to the Cambodian Rice Federation's expectation that rice exports will increase in 2023. From January through October of this year, Cambodia exported 509,249 ton of milled rice, an increase of 10.6%.
- As per sources, Vietnam exports 6.07 MMT of rice valued at 2.94 billion USD, an increase of 7.4% in value and 17.2% in volume during Jan-Oct, 2022. During the time period, export prices decreased by 8.3% from the same time last year, averaging 484 USD per tonne.
- As per sources, it is likely that Bangladesh, which has been working to lower high domestic prices after floods earlier this year damaged 254,000 tonnes of rice, will suffer as a result of Cyclone Sitrang's destruction of rice fields on 6,000 hectares.

- According to sources, Thailand's main rice harvest for 2022–23 would most likely be harvested two weeks later than usual due to floods as a result limiting output for the season, which typically starts in early November.
- As per sources, to ensure a sufficient supply at times of global food shortages and emergencies, the Philippines will increase its budget for rice buffer reserves by almost 70% the next year.
- Major crops like cotton and wheat have been harmed by the weather, but most of the rice crop has been spared, and Pakistan is on track to meet its 4.8 million tonnes export goal this season.
