

Domestic Market Highlights:

- Market prices remained almost steady during the day in most of the mandis throughout the country. There is strong demand coming from exporters for basmati in North-Indian paddy growing belt amid lull arrivals.
- Due to robust export demand and meagre supply, the market continued to show an upward trend this week. Arrival in Punjab and Haryana is almost over now. Due to current market fundamentals, market prices are anticipated to increase over the upcoming weeks. Due to increased export demand with a decline in arrivals, there is a significant demand for basmati from exporters in the North Indian paddy growing region.
- This week, the price for India's 5% broken parboiled variety was reported at \$387 to \$395 per tonne, which is the same as last week. For the second week in a row, prices remained at their highest levels in over two years because of strong demand and the fact that local dealers kept providing rice at lower prices than other Asian centres.
- As per sources, in order to make ethanol, over 1 million metric tonnes of consumable rice from the Food Corporation of India's reserves were sold at discounted prices in 2022. In the open markets for rice, maize, and sugarcane in the nation, where food and feed processors (and food customers) compete with oil production corporations for grains, similar crop diversions to create ethanol have been taking place. This can raise concerns regarding India's food security.
- As per sources, with only a week left until the completion of Chhattisgarh's paddy procurement, farmer purchases of the crop surpassed 100 lakh tonnes on Tuesday. This kharif, the government intends to purchase 110 lakh tonnes of paddy by January 31.
- According to sources, farmers in Telangana cultivated in abundance during the Yasangi (rabi) season, placing the state to establish new records this year. As of Wednesday, the state's total sown area was 28.56 lakh acres, compared to the normal cultivated area for the season of 47.85 lakh acres. However, this is nearly twice as much as the 14.81 lakh acres that were sown during the Yasangi season last year. Due to unseasonal rainfall and a delay in harvesting operations, early sowing during the Yasangi season was delayed. 17.98 lakh acres, i.e., 60% of the total area sown, are used for paddy cultivation.
- According to sources, an order has been placed to import 100,000 tonnes of rice from Iran shortly after the country recently eased its import restrictions due to shortage of basmati rice in the domestic market. Since the beginning of November, imports of all types of rice have

been prohibited. Almost 1.27 million tonnes of rice have been imported so far this year. Around 1.5 million tonnes are imported annually. Iran must therefore acquire almost 250,000 tonnes of the grain by the end of March. Iran imports a substantial amount of rice from India. This will increase Indian Basmati domestic market prices as well.

- As of January 15, 2023, FCI had procured 595.43 lakh tonnes (LMT) of paddy for the central pool during the current 2022–2023 kharif marketing season. Govt. is very actively buying paddy which might help in replenishing the stocks which have been exhausted by PMGKAY.
- As of 13th January, 2023 Ministry of Agriculture's rabi sowing update data, paddy has been sown in 26.22 lakh Ha. against 19.62 lakh Ha of previous year, higher by 33.6% in this rabi season.
- As per sources, rumours are circulating regarding the upliftment of the export ban on 100% broken rice which was imposed by govt. in September, 2022. However, according to agriwatch's estimates, it is not likely to lift the export ban any time before the rabi paddy harvesting as right now there is tight supply due to which the current prevailing market prices are moving upwards. After rabi paddy harvesting, govt. might uplift the export ban which will further ease the tension regarding food supply following Russia's invasion of Ukraine.
- According to sources, over 9.1 million individuals who are BPL would receive 5 kg of rice free of charge from the Telangana government starting this month for the duration of the following year.
- As per sources, in Punjab, a record 22 lakh tonnes (LT) of basmati, or the aromatic rice type, have been purchased so far in the harvest cycle of 2022–23, and farmers anticipate selling the grain for an additional 3–4 months.
- As per reports, paddy is typically grown on about 20,000 hectares in Dharmapuri district of Tamil Nadu. The area under cultivation now totals 60,000 hectares as a result of this year's abundant rains. A further aim set by the agriculture department for 2022–2023 is 1,67,000 hectares. The district got more than 1,200 mm of rain this year. Through DPCs, the government purchases paddy for Rs 19 per kg. However, private parties offer Rs. 9 to 12 per kilogramme. Farmers who sell in the private market cannot make money after accounting for labour and input costs.
- As per reports, despite shipping restrictions, India's exports of aromatic basmati and non-basmati rice increased 7.37 percent to 126.97 lakh tonnes from April to October of the current

fiscal year. 118.25 lakh tonnes were exported during the same time of the prior fiscal. The amount of basmati rice exported as a percentage of all exports increased from 21.59 lakh tonnes in the April–October 2022–23 fiscal term to 24.97 lakh tonnes. Exports of non-basmati rice grew from 96.66 lakh tonnes to 102 lakh tonnes over the same time period.

- According to sources, due to an increase in the purchase of food grains during the previous eight years, the minimum support price (MSP) for rice has increased by 42.64 % during the eight years of the Narendra Modi government. Total procurement was 1,926 million tonnes from 2006 to 2014, and from 2014 to 2022, it rose to 2,273 million tonnes.

Domestic Market Outlook (Non-Basmati):

- As per prevailing market fundamentals, arrivals of non-basmati have almost come to an end so, it is expected that domestic prices would improve in near term.

International Market Highlights

- Due to the strong baht, which reduces profits for dealers for international trade and forces them to raise rates, Thailand's 5% broken rice prices were quoted at \$500 per tonne, which is the highest amount since March 2021 and comparable to levels seen last week. Thai rice exports may fall short of the export goal if the baht keeps appreciating.
- Due to the strong baht, Thailand's rice exporter organisation reduced its 2023 rice export objective from 8 million tonnes to 7.5 million tonnes last week.
- Vietnam's markets were shut this week due to Lunar New Year. Last week, the price for the 5% broken rice from Vietnam remained unchanged at \$445 to 450 per tonne.
- According to sources, Bangladesh has authorized the acquisition of 100,000 tonnes of rice through tenders as it works to increase reserves to manage local prices. Through G-to-G agreements, the government also intends to purchase rice from India.
- As per sources, there is good demand for all varieties of Basmati from Iraq and Yemen. Dubai festival is also scheduled to start in February, 2023, it would push prices further up. Apart from this, Iran normally starts buying from March every year and is expected to be the same for this year too. Right now, packing/shipping for basmati continues for Yemen, UAE, Saudi Arabia and Russia in south India. Exporters for aromatic rice are active right now.

- As per news reports, in contrast to the pricing offered by the private trade in a global import tender, Bangladesh has offered Indian cooperatives almost \$40 per tonne extra to import 2.5 lakh tonnes of parboiled rice in a government-to-government transaction. According to trade sources, the import agreement would be made through NCCF (National Cooperative Consumers Federation) and Kendriya Bhandar in two instalments, with Dhaka receiving rice at a price of \$443 and \$443.5 per tonne, respectively. Bangladesh will receive parboiled rice for at least \$25 less than Thailand or Pakistan, despite paying Indian cooperatives more for the G2G transaction. Currently, Pakistan is offering parboiled rice for \$453-457 per tonne, while Thailand is bidding \$486 per tonne.
