

Domestic Market Highlights:

- Market prices remained rangebound during the day in most of the mandis throughout the country due to sluggish trade activity amid less arrivals.
- India's 5% broken parboiled rice ranged from \$393 to \$398 per tonne, up from a range of \$387 to \$395 last week. This year, the government purchased unmilled rice from farmers in record amounts. Limited supply is available to private players for the exports.
- As per sources, 17.86 million tons of non-basmati rice were shipped in 2022, whereas 4.4 million tonnes of premium basmati rice were exported. While basmati rice is primarily exported from India to the Middle East, the United States, and Britain, non-basmati rice is primarily sent to Africa and Asia. Prices were driven up by an export duty on shipments of Indian non-basmati rice, but consumers soon reverted back because Thailand and Vietnam were selling rice for much more prices.
- According to the Ministry of Agriculture's most recent sowing data, which was published on February 2, 2023, paddy has been sown in 46.25 lakh hectares, compared to 35.05 lakh ha the year before, an increase of 32% this rabi season. This will offset the decrease in rice production during the kharif season. Rabi paddy is now being sown in most of the rice-growing states, with the exception of Gujarat, Maharashtra, and Tripura, where it has not yet begun.
- Now that export demand has reduced amid meagre arrivals, the market has started moving downward this week. Arrival in Punjab and Haryana is almost over now. In West Bengal, lower prices are attracting demand from Haryana, Punjab, Delhi. Whereas in Raichur, Karnataka, market is almost steady due to the limited demand from Tamil Nadu, Kerala, and Chhattisgarh despite low arrivals. Due to current market fundamentals, market prices are anticipated to decrease over the upcoming weeks.
- As of Saturday, January 28, 1,40,865 metric tonnes (MT) of paddy from the first crop of farmers had been purchased by the six procurement agencies involved in the state's paddy procurement during the present Kharif Marketing Season (KMS) 2022–23. 10 lakh MT of paddy must be purchased by the state government during the current Kharif marketing season. 1,40,865 MT of paddy has already been sold by 16,476 farmers to the six procurement organisations.
- As per sources, in order to make ethanol, over 1 million metric tonnes of consumable rice from the Food Corporation of India's reserves were sold at discounted prices in 2022. In the open

markets for rice, maize, and sugarcane in the nation, where food and feed processors (and food customers) compete with oil production corporations for grains, similar crop diversions to create ethanol have been taking place. This can raise concerns regarding India's food security.

- As per sources, with only a week left until the completion of Chhattisgarh's paddy procurement, farmer purchases of the crop surpassed 100 lakh tonnes on Tuesday. This kharif, the government intends to purchase 110 lakh tonnes of paddy by January 31.
- According to sources, farmers in Telangana cultivated in abundance during the Yasangi (rabi) season, placing the state to establish new records this year. As of now, the state's total sown area was 28.56 lakh acres, compared to the normal cultivated area for the season of 47.85 lakh acres. However, this is nearly twice as much as the 14.81 lakh acres that were sown during the Yasangi season last year. Due to unseasonal rainfall and a delay in harvesting operations, early sowing during the Yasangi season was delayed. 17.98 lakh acres, i.e., 60% of the total area sown, are used for paddy cultivation.
- According to sources, an order has been placed to import 100,000 tonnes of rice from Iran shortly after the country recently eased its import restrictions due to shortage of basmati rice in the domestic market. Since the beginning of November, imports of all types of rice have been prohibited. Almost 1.27 million tonnes of rice have been imported so far this year. Around 1.5 million tonnes are imported annually. Iran must therefore acquire almost 250,000 tonnes of the grain by the end of March. Iran imports a substantial amount of rice from India. This will increase Indian Basmati domestic market prices as well.
- As of January 15, 2023, FCI had procured 595.43 lakh tonnes (LMT) of paddy for the central pool during the current 2022–2023 kharif marketing season. Govt. is very actively buying paddy which might help in replenishing the stocks which have been exhausted by PMGKAY.
- As per sources, rumours are circulating regarding the upliftment of the export ban on 100% broken rice which was imposed by govt. in September, 2022. However, according to agriwatch's estimates, it is not likely to lift the export ban any time before the rabi paddy harvesting as right now there is tight supply due to which the current prevailing market prices are moving upwards. After rabi paddy harvesting, govt. might uplift the export ban which will further ease the tension regarding food supply following Russia's invasion of Ukraine.

- According to sources, over 9.1 million individuals who are BPL would receive 5 kg of rice free of charge from the Telangana government starting this month for the duration of the following year.
- As per sources, in Punjab, a record 22 lakh tonnes (LT) of basmati, or the aromatic rice type, have been purchased so far in the harvest cycle of 2022–23, and farmers anticipate selling the grain for an additional 3–4 months.
- As per reports, paddy is typically grown on about 20,000 hectares in Dharmapuri district of Tamil Nadu. The area under cultivation now totals 60,000 hectares as a result of this year's abundant rains. A further aim set by the agriculture department for 2022–2023 is 1,67,000 hectares. The district got more than 1,200 mm of rain this year. Through DPCs, the government purchases paddy for Rs 19 per kg. However, private parties offer Rs. 9 to 12 per kilogramme. Farmers who sell in the private market cannot make money after accounting for labour and input costs.

Domestic Market Outlook (Non-Basmati):

- As per prevailing market fundamentals, arrivals of non-basmati have almost come to an end so, it is expected that domestic prices would improve in near term.

International Market Highlights

- Thailand's 5% broken rice prices eased marginally at \$495 per tonne from \$500 per tonne due to moderate demand. Prices will show correction once new supply begins in March.
- Vietnam's 5% broken rice quoted at \$445–\$450 per tonne, which is the same price as two weeks ago. Following the lunar new year holiday, traders are continuing their purchases of rice from farmers in order to get ready for new contracts.
- In January, Vietnam exported 400,000 tonnes of rice, a 20.9% decrease from the same month last year.
- As of USDA's recent report, the rice production in Bangladesh for the marketing year ending in April has been increased to 35.8 million tonnes.
- As per sources, there is good demand for all varieties of Basmati from Iraq and Yemen. Dubai festival is also scheduled to start in February, 2023, it would push prices further up. Apart from this, Iran normally starts buying from March every year and is expected to be the same for this

year too. Right now, packing/shipping for basmati continues for Yemen, UAE, Saudi Arabia and Russia in south India. Exporters for aromatic rice are active right now.
