

Domestic Market Highlights:

- Markets remained steady throughout the day in most of the markets due to normal supply and poor demand.
- During the current week, India's 5% broken parboiled rice remained unchanged from the previous week, trading at \$380 to \$385 per tonne, similar to the mid-January levels. Although there has been a slight improvement in demand from African countries, the order book for April shipments remains unfilled.
- Following the record surge in paddy and all Basmati varieties of rice, the market experienced a lull in sales due to profit booking for a few days. However, following yesterday's export deal, there has been a surge in buying by exporters, leading to an increase of Rs. 100 per quintal across all Basmati species rice markets. Currently, Sela rice 1718 has been sold for Rs. 8000, while rice 1509 is trading at Rs. 7800/7850. Similarly, the trend for 1121 paddy and rice remains optimistic, with the potential for further growth in the market. However, coarse goods are dominating the Sasaram line, and there has been an increase in the sale of paddy in the mandis around Mughalsarai and Mirzapur. Under these circumstances, it is advisable to avoid rapid trade in coarse rice.
- During the week under review, prices were rangebound. In Karnataka, arrivals are expected to come from the first week of April onwards. And in Maharashtra, arrivals of some varieties of non-Basmati paddy/rice from Andhra Pradesh is expected to begin after 8-10 days. However, the arrival of fine varieties of rice/paddy is expected to commence from mid-April onwards.
- As per trade sources, there is a strong export demand for RNR paddy/rice in Andhra Pradesh however supply is limited as high moisture content is there in the fresh arrivals. Consequently, a price hike of approximately 200 INR per quintal.
- During the week under review, market remained rangebound. All types of Basmati rice have remained sluggish for the past two months after prices rose by Rs. 400 per quintal during the GULFOOD Dubai. However, selling pressure has emerged in the market over the last few days, leading to a decline of Rs. 200 per quintal. The 1718 Sela rice, which was previously sold for Rs. 8150/8200, is now priced at Rs. 7900/7950, with big and small stockists beginning to sell their goods. As a result, all types of fine rice are expected to see a decline of Rs. 200/300 per quintal.
- As of 15th March, 2023, the GOI has granted approval for the provision of fortified rice via the Targeted Public Distribution System (TPDS) under the National Food Security Act (NFSA), as well as in other government welfare schemes in all states and union territories (UTs) by 2024, in a phased approach.

During Phase I, states/UTs have procured roughly 17.51 LMT of fortified rice for distribution under ICDS and PM POSHAN. The implementation of Phase II is ongoing, and as of February 2023, 92.77 LMT of fortified rice has been procured for distribution under TPDS in Aspirational and High Burden Districts. Additionally, states/UTs have procured about 27.46 LMT of fortified rice for ICDS and PM-POSHAN.

- According to trade sources, the forthcoming rabi crop of the current KMS 2022-23 is expected to yield 106 LMT rice, which will be procured from 11 states that produce rabi crop rice. The states have been advised to increase their milling capacity to ensure that the milling of one season is completed before the start of the next season, thus preventing the recycling of rice.
- As per trade sources, a Saudi Arabian importer company has given HAFED export orders for 85,000 metric tonnes (MT) of basmati rice, valued at Rs 850 crore. A 33,000 MT order has been completed, and the other orders are being carried out. HAFED is now taking part in a GULFOOD 2023, the largest food and beverage expo in the world, by setting up its display stall there for the first time.
- According to trade sources, as the largest exporter of white rice in the world attempts to control local prices, India has no plans to lift restriction on broken rice exports or reduce a 20% levy on such shipments. The export restrictions imposed by India will make consumers pay more for rice, which has recently become more expensive, particularly in Asia and Africa. Another reason behind this decision is that the El Nino weather phenomena may affect this year's monsoon rains so it would be risky not to keep rice stock in hand amid limited wheat stocks.
- As per the 2nd advance estimates of production of major agricultural crops released by the Union Ministry of Agriculture and Farmers Welfare on 14th February, 2023, the production of rice in India has revised to 130.83 MMT up from the target of 130.5 MMT. Rabi production estimate is revised upward to 22.76 MMT from the target of 18.5 MMT due to increased acreage in key rabi paddy growing states whereas Kharif rice production went down from the target of 112 MMT to 108.07 MMT due to unfavourable weather condition in Kharif season 2022-23.
- This year, the cultivation of samba paddy took place on more than 45,000 hectares of land in Madurai. Farmers in Melur claim that the recent rains had an impact on harvesting since they increased the moisture level of the paddy grain. As per sources, only 88 DPCs are currently operational in the area out of the 164 certified direct procurement centres.
- As per sources, 17.86 million tons of non-basmati rice were shipped in 2022, whereas 4.4 million tonnes of premium basmati rice were exported. While basmati rice is primarily exported from India to

the Middle East, the United States, and Britain, non-basmati rice is primarily sent to Africa and Asia. Prices were driven up by an export duty on shipments of Indian non-basmati rice, but consumers soon reverted back because Thailand and Vietnam were selling rice for much more prices.

Domestic Market Outlook (Non-Basmati):

- As per prevailing market fundamentals, arrivals of non-basmati have almost come to an end so, it is expected that domestic prices would improve in near term.

International Market Highlights

- As per trade sources, Vietnam's 5% broken rice increased from \$450 to \$460 per tonne this week, following Indonesia's food procurement agency's announcement to purchase two million tonnes of rice this year. Despite the ongoing harvest in the Mekong Delta provinces, domestic supplies remain tight due to the limited output of 5% broken rice, which accounts for 15%-20% of the total yield.
- According to trade sources, Thailand's 5% broken rice prices increased from \$465 to \$475 to \$482 per tonne due to appreciation of Baht and limited fresh supply arriving in the market.
- The Indian Government has granted special consideration for the export of 3.5 lakh tonnes (lt) of broken rice to Gambia and Senegal. The Commerce Ministry has authorized the export of 1 lakh tonnes of broken rice to Gambia and 2.5 lakh tonnes to Senegal. Furthermore, the Ministry has permitted the shipment of 9,990 tonnes of broken rice to Djibouti and Ethiopia.
- According to WASDE Report of March, 2023, the global outlook for 2022/23 indicates a significant increase in supplies, consumption, trade, and ending stocks. The projected supplies have been raised by 7.0 million tons to a total of 693.3 million, with India's production alone accounting for the entire increase. The country's production has been raised to a record 132.0 million tons, based on the Second Advanced Estimate by the Government of India and the expectation of further increase in the final estimate, given the recent trend. The global consumption for 2022/23 is expected to reach a record high of 520.0 million tons, with an increase of 2.8 million tons, primarily due to India. The global trade for rice is projected to increase by 0.9 million tons to reach 54.9 million, with India's exports surpassing reductions in Uruguay and the United States. The estimated global ending stocks have been raised by 4.2 million tons to 173.3 million, with China and India contributing to 81 percent of the total rice stocks worldwide.
