

Domestic Market Highlights:

- Markets remained steady throughout the day in most of the markets amid tight supply.
- The government of India has recently announced the removal of the 20% export duty on rice of seed quality in the husk, following a thorough review of rice stocks. This exemption has been implemented as of April 11th, and aims to facilitate trade in the rice sector.
- As per trade sources, the recent decline in wheat and maize prices has had a ripple effect on the rice market. However, the reality is that rice stocks are limited in the producer mandis of Etawah, Etah, Mainpuri, Hathras, Mathura, Bharatpur. Furthermore, there are still six months until the new harvest of all Basmati varieties of paddy arrives, and before that, the summer cumin crop is expected in May-June, but its sowing conditions are unfavorable. As a result, the availability of high-quality paddy in rice mills is scarce, and exporters are focusing on deals with Iran and other Gulf countries. This is expected to intensify market demand in the future, particularly for Taj and 1718 Basmati varieties of rice, as rice mills have little to no stock. Hence, the market is anticipated to remain robust.
- The 5% broken parboiled variety of rice in India saw an increase in prices this week, with price ranging from \$383 to \$389 per tonne, up from the previous week's range of \$380 to \$385. This uptick can be attributed to an improvement in demand and an appreciation in the value of the rupee.
- As of 15th March, 2023, the GOI has granted approval for the provision of fortified rice via the Targeted Public Distribution System (TPDS) under the National Food Security Act (NFSA), as well as in other government welfare schemes in all states and union territories (UTs) by 2024, in a phased approach. During Phase I, states/UTs have procured roughly 17.51 LMT of fortified rice for distribution under ICDS and PM POSHAN. The implementation of Phase II is ongoing, and as of February 2023, 92.77 LMT of fortified rice has been procured for distribution under TPDS in Aspirational and High Burden Districts. Additionally, states/UTs have procured about 27.46 LMT of fortified rice for ICDS and PM-POSHAN.
- According to trade sources, the forthcoming rabi crop of the current KMS 2022-23 is expected to yield 106 LMT rice, which will be procured from 11 states that produce rabi crop rice. The states have been advised to increase their milling capacity to ensure that the milling of one season is completed before the start of the next season, thus preventing the recycling of rice.
- As per trade sources, a Saudi Arabian importer company has given HAFED export orders for 85,000 metric tonnes (MT) of basmati rice, valued at Rs 850 crore. A 33,000 MT order has been completed, and the other orders are being carried out. HAFED is now taking part in a GULFOOD 2023, the largest

food and beverage expo in the world, by setting up its display stall there for the first time.

- According to trade sources, as the largest exporter of white rice in the world attempts to control local prices, India has no plans to lift restriction on broken rice exports or reduce a 20% levy on such shipments. The export restrictions imposed by India will make consumers pay more for rice, which has recently become more expensive, particularly in Asia and Africa. Another reason behind this decision is that the El Nino weather phenomena may affect this year's monsoon rains so it would be risky not to keep rice stock in hand amid limited wheat stocks.
- As per the 2nd advance estimates of production of major agricultural crops released by the Union Ministry of Agriculture and Farmers Welfare on 14th February, 2023, the production of rice in India has revised to 130.83 MMT up from the target of 130.5 MMT. Rabi production estimate is revised upward to 22.76 MMT from the target of 18.5 MMT due to increased acreage in key rabi paddy growing states whereas Kharif rice production went down from the target of 112 MMT to 108.07 MMT due to unfavourable weather condition in Kharif season 2022-23.
- This year, the cultivation of samba paddy took place on more than 45,000 hectares of land in Madurai. Farmers in Melur claim that the recent rains had an impact on harvesting since they increased the moisture level of the paddy grain. As per sources, only 88 DPCs are currently operational in the area out of the 164 certified direct procurement centres.
- As per sources, 17.86 million tons of non-basmati rice were shipped in 2022, whereas 4.4 million tonnes of premium basmati rice were exported. While basmati rice is primarily exported from India to the Middle East, the United States, and Britain, non-basmati rice is primarily sent to Africa and Asia. Prices were driven up by an export duty on shipments of Indian non-basmati rice, but consumers soon reverted back because Thailand and Vietnam were selling rice for much more prices.

Domestic Market Outlook (Non-Basmati):

- As per prevailing market fundamentals, arrivals of non-basmati have almost come to an end so, it is expected that domestic prices would improve in near term.

International Market Highlights

- Vietnam's 5% broken rice remained unchanged from a week ago, with prices quoted at \$460 per tonne on Thursday. Rice prices are expected to remain at elevated levels in the short term, as global economic and political uncertainties have prompted countries to increase their food reserves.
- Thailand's 5% broken rice prices were quoted at \$480 to \$482 per tonne, showing a slight increase from the previous week's range of \$475 to \$482. Domestically, prices are high as the harvesting season

approaches its end, resulting in lower supply.

- As per trade sources, Vietnam has witnessed a remarkable growth in its rice exports during the first quarter of the year, with a notable increase of 30.2 percent amounting to 952 million U.S. dollars, marking the highest level recorded in the past 12 years. This significant growth can be attributed to favorable gains in prices and expanded demand. In terms of volume, Vietnam's rice shipments also showed a substantial year-on-year increase of 19.3 percent, totaling 1.8 million tons during the January-March period. With continued demand from buyers in the Philippines, China, and Africa who are building up their inventories, it is anticipated that Vietnam's rice exports will continue to exhibit further growth throughout the year.
- The Indian Government has granted special consideration for the export of 3.5 lakh tonnes (lt) of broken rice to Gambia and Senegal. The Commerce Ministry has authorized the export of 1 lakh tonnes of broken rice to Gambia and 2.5 lakh tonnes to Senegal. Furthermore, the Ministry has permitted the shipment of 9,990 tonnes of broken rice to Djibouti and Ethiopia.
- According to WASDE Report of March,2023, the global outlook for 2022/23 indicates a significant increase in supplies, consumption, trade, and ending stocks. The projected supplies have been raised by 7.0 million tons to a total of 693.3 million, with India's production alone accounting for the entire increase. The country's production has been raised to a record 132.0 million tons, based on the Second Advanced Estimate by the Government of India and the expectation of further increase in the final estimate, given the recent trend. The global consumption for 2022/23 is expected to reach a record high of 520.0 million tons, with an increase of 2.8 million tons, primarily due to India. The global trade for rice is projected to increase by 0.9 million tons to reach 54.9 million, with India's exports surpassing reductions in Uruguay and the United States. The estimated global ending stocks have been raised by 4.2 million tons to 173.3 million, with China and India contributing to 81 percent of the total rice stocks worldwide.
