

Domestic Market Highlights:

- Prices remained rangebound throughout the day in most of the markets amid varied demand and supply. In south-Indian paddy growing belt, supply of non-basmati is tight amid increased demand, which has resulted in a hike in prices.
- The Cabinet Committee on Economic Affairs (CCEA) has granted approval for an increase in the Minimum Support Price (MSP) of paddy, aiming to incentivize farmers to expand the cultivation area for this crop and enhance their income. In the 2023-24 crop year (July-June), the MSP for the common grade variety of paddy has been raised by ₹143 to ₹2,183 per quintal, surpassing the previous year's rate of ₹2,040. Additionally, the support price for the 'A' grade variety of paddy has been elevated by ₹163 to ₹2,203 per quintal, compared to the previous rate of ₹2,060.
- This week, price for India's 5% broken parboiled rice variety stands at \$388-\$395 per tonne, exhibiting an increase compared to the previous week's range of \$375-\$380. Over the past month, local paddy prices have surged, driven by the anticipation of a minimum support price hike, consequently leading to an upward trend in rice export prices.
- As per trade sources, the rice market may experience further decline, primarily due to financial constraints and a lack of demand. Currently, the selling price of 1718 Sela ranges from Rs.7450 to Rs. 7600 per quintal, while Sugandha is priced at Rs. 5900. Taj Sela is available up to Rs. 6000, and RH10 Sela is priced up to Rs. 5100. In the same market, Golden Rs.1718 is being sold at prices reaching Rs.7850, while Steam is being sold at up to Rs. 8600. This situation is mainly attributed to the absence of strong buyers in the market at present. Despite the abundant crop of 1509 paddy, the upside potential remains uncertain. The current stock levels are reported to be significantly high due to the availability of both 1509 paddy and rice in large quantities, resulting in increased sales and subsequent buyer hesitation.
- The G.O.I. has authorized the export of approximately 1.06 million tonnes of grains, comprising wheat and rice, as part of the nation's diplomatic food assistance program to four countries. However, it should be noted that restrictions on the export of wheat and limitations on rice shipments will remain in effect. In line with discussions held with the Ministry of External Affairs regarding humanitarian food assistance, the Ministry of Food has approved the export of over 200,000 tonnes of broken rice to Indonesia, 500,000 tonnes of broken rice to Senegal, and 50,000 tonnes of broken rice to Gambia.
- On 29th May, 2023, The Directorate General of Foreign Trade (DGFT) has announced changes to a

notification from August 17, 2022. These changes will affect the export of rice (both basmati and non-basmati) to European Union (EU) member states and other European countries such as Iceland, Liechtenstein, Norway, Switzerland, and the UK. According to the new rules, exporters will only need to obtain a certificate of inspection from the Export Inspection Council/Export Inspection Agency for exports to these specific countries. For the next six months, exports to other European countries will not require a certificate of inspection from the Export Inspection Council/Export Inspection Agency.

- As per trade sources, Kharif rice sowing just started in South Indian states, West Bengal, Odisha, Maharashtra, Karnataka and Assam. Farmers have taken advantage of pre-Monsoon rains. Total 28.3 lakh Ha has been planted so far, down by 6.69% from the corresponding period last year. West Bengal is leading in the initial stage, covering 7.9 lakh Ha, followed by Telangana covering 4.77 lakh Ha. Farmers in Karnataka have covered 3.29 lakh Ha so far. The sowing pace may increase if pre-Monsoon rains continue.
- During the Kharif Marketing Season (KMS) 2022-23, as of 22nd May 2023, the estimated production of rice stands at 1308.37 LMTs, according to the second advance estimate. The procurement estimate for rice is 626.06 LMTs, with an actual quantity of rice procured amounting to 520.63 LMTs. These figures have resulted in a total Minimum Support Price (MSP) payment of Rs. 159,659.59 Crores, benefiting a significant number of 1,12,96,159 farmers within the same KMS period.
- According to the 3rd Advance Estimates of agricultural year 2022-23, recently published by the Ministry of Agriculture and Farmers Welfare, the total production of rice has been revised to 1355.42 LMT. This figure represents a 3.59% increase compared to the 2nd advance estimate which was 1308.37 and a significant increase of 60.71 LMT when compared to the previous year.
- On 24th May, 2023, the G.O.I. granted authorization for the exportation of broken rice, within the context of government-approved shipments to other nations aimed at fulfilling their food security requirements. It is noteworthy that under ordinary circumstances, the export of broken rice is prohibited.
- As per trade sources, there is subdued demand in markets of Rajasthan amid local payment issues which has resulted in bearish sentiments in market. It is expected that mid-May onwards, demand for seed might start for Kharif paddy sowing.

Domestic Market Outlook (Non-Basmati):

- As per prevailing market fundamentals, arrivals of non-basmati have almost come to an end so, it is

expected that domestic prices would improve in near term.

International Market Highlights

- Thailand has emerged as the top rice exporter to Iraq, surpassing India, since the previous year. However, recent reports indicate that Tehran is procuring Thai rice due to currency challenges it currently confronts. As per the United States Department of Agriculture (USDA), it is anticipated that Iraq's rice imports will witness a notable rise to approximately 2.2 million metric tonnes (mt) within the present year.
- Thailand's 5% broken rice prices have experienced a slight decline to \$490-\$495 per tonne, as opposed to last week's figures of \$495. Although demand remains stagnant, the forthcoming harvest is expected to bring additional supply next month. It has been observed that African countries have displayed subdued demand due to the relatively higher prices of Thai rice compared to Indian rice. Conversely, concerns regarding droughts and exports to Indonesia have lent support to prices.
- Vietnam's 5% broken rice rates have remained steady at \$490-\$495 per tonne. Traders are accelerating their rice purchases from farmers to fulfill their export commitments for the year, as high prices have encouraged increased investment in the summer-autumn crop.
- Bangladesh government has allocated a substantial incentive of Taka 33.20 crore with the objective of bolstering the cultivation and production of Aman paddy during the current year. This incentive program entails the provision of essential resources to farmers, including five kilograms of high-quality seeds, as well as ten kilograms each of DAP and MOP fertilizers, all of which will be provided free of charge. These resources are intended to support the cultivation of the high-yielding variety of Ropa Aman paddy on one bigha of land per farmer.
- Meanwhile, Bangladesh is presently engaged in a procurement drive for newly harvested rice. The government aims to acquire 1.2 million tonnes of rice from local farmers between May 7 and August 31, as part of its strategic efforts in the rice market.
- As per trade sources, in the initial month of the current fiscal year (March 21-April 20), the Islamic Republic of Iran imported a substantial quantity of rice totaling 77,932 tons which is down by 52% when compared to the corresponding month of the previous year. Among the exporting nations, India emerged as the primary rice supplier to Iran, shipping 41,000 tons, followed by Pakistan with 30,000 tons and the United Arab Emirates with 2,000 tons.
