

Latest Market Development:

All India Average rice price in the first week of May was moved up by 2.65% from previous week and currently hover in the range of Rs.2700-2720/quintal. We expect market is likely to move in the range bound to firm in coming weeks due to weak monsoon prediction by IMD and also lower rabi area by 9% from last year under paddy. Domestic buyers are active due to all above reasons and thus prices are expected to move in north direction.

Sona masuri steam price in Andhra Pradesh is ruling at Rs.3100-3200/quintal and raw price is around Rs.3500/quintal as per by local traders. PR-11 Steam in Delhi mandi is Rs.2600/quintal. In case of basmati, 1121 steam and sela is at Rs. 5700-600 and 4700-4800/ quintal respectively.

The area under rabi/summer rice as on May 1st 2015 stands at 40.66 as compared to 44.88 lakh hectare in previous year .Total area under rabi rice and summer crops stands at 64.20 lakh hectare as compared to 66.23 lakh hectare in previous year.

Seed bodies of India and Bangladesh recently formalized a move to cooperate on expediting trade of high-yielding varieties (HYV) of rice seeds for the benefit of the farmers of the two countries, and help boost food security. Syed AKM Asadul Amin Dadan, general secretary of the Bangladesh Seeds Association (BSA), and Kalyan Goswami, executive director of the National Seed Association of India (NSAI), signed a memorandum of understanding at a meeting organized by CUTS International, at the conclusion of a two-year research and advocacy project. Many new and promising rice varieties have been developed in India and Bangladesh, and farmers in the region can benefit if varieties released in one country can be cultivated quickly in neighboring countries with similar agro-climatic conditions, said Rajesh Kumar Singh, joint secretary (seeds) of the Indian agriculture ministry.

On April 22, 2015, the Indian Meteorological Department (IMD) issued a 'below normal monsoon' forecast for the upcoming 2015 southwest monsoon season (June-September). IMD further predicted that the seasonal rainfall will be 93-percent of its long-term average (LTA). The forecast specifies that El Niño weather pattern (which triggers drought) is likely to persist during 2015 monsoon season. IMD will issue an updated forecast in June 2015.

India rice export touched 10.81 million tonne in first 11 months of the FY 2014-15. It is 8.5 percent higher from the same period last year (9.96 million tonne). However, basmati rice export has declined by 4 percent to around 3.3 million tonne during April-2014 to Feb 2015. Basmati export during same period last year was recorded at 3.44 million tonne. The reason behind lower basmati export is mainly attributed to lower demand /ban from Iran.

Rice Monthly Export:

MY-2013-14	Non Basmati	Basmati	Total Export 2013-14	MY-2014-15	Non Basmati	Basmati	Total Export 2014-15

Revised (Source-DGCIS & * = IBIS)

Total Rice export for MY-2014-15 till March-15 was 59.39 lakh tonnes which was up by around 15% from same period last year export of 51.51 lakh tonnes. Non basmati rice export in the month of March was 6.00 lakh tonnes and basmati exports for MY-2014-15(Oct14-Sep-15) in the month was 3.98 lakh tonnes. This month Saudi Arabia was the largest buyer of aromatic rice which contributes around 30% of total export of aromatic rice.

India Rice Balance Sheet:

Stock to Consumption Ratio	0.23	0.17

(Source: Agriwatch Research, USDA)

Agriwatch has revised its rice production and ending stock estimates in April, 1st week. Rabi sowing is almost over in rabi rice growing states and acreage is 9.5% down from last year so we down the rice production for MY-2014-15 from 103 million tonnes in previous estimates(3rd week Of February) to 102.5 million tonnes.

At Export front, it is same from Agriwatch's last estimates, however we expect that export of rice (including basmati and non basmati rice) could vary from 9 million tonnes to 9.5 million tonnes depends upon global demand for Indian rice and competitive price offer by major competitors like Thailand, Pakistan and Vietnam.

Domestic consumption is likely to up by 1.17% from last year consumption of 99.18 million tonnes to 99.35 million tonnes in 2014-15. Fall in production, fall in total availability and around 9 million tonnes of export could be the main reason for lower carry stock in MY 2014-15. This may push the rice price in upward direction in medium to long term (April-August).

Progressive Procurement of Rice as on 10.04.2015 (lakh tonnes):

State	Total procurement in marketing season	Progressive Procurement as on 10.04.2015

Duration	Trend	Average Price Range
02 nd Week of May, 2015	Steady to Firm	Rs.2730-2800/Q

Global Updates:

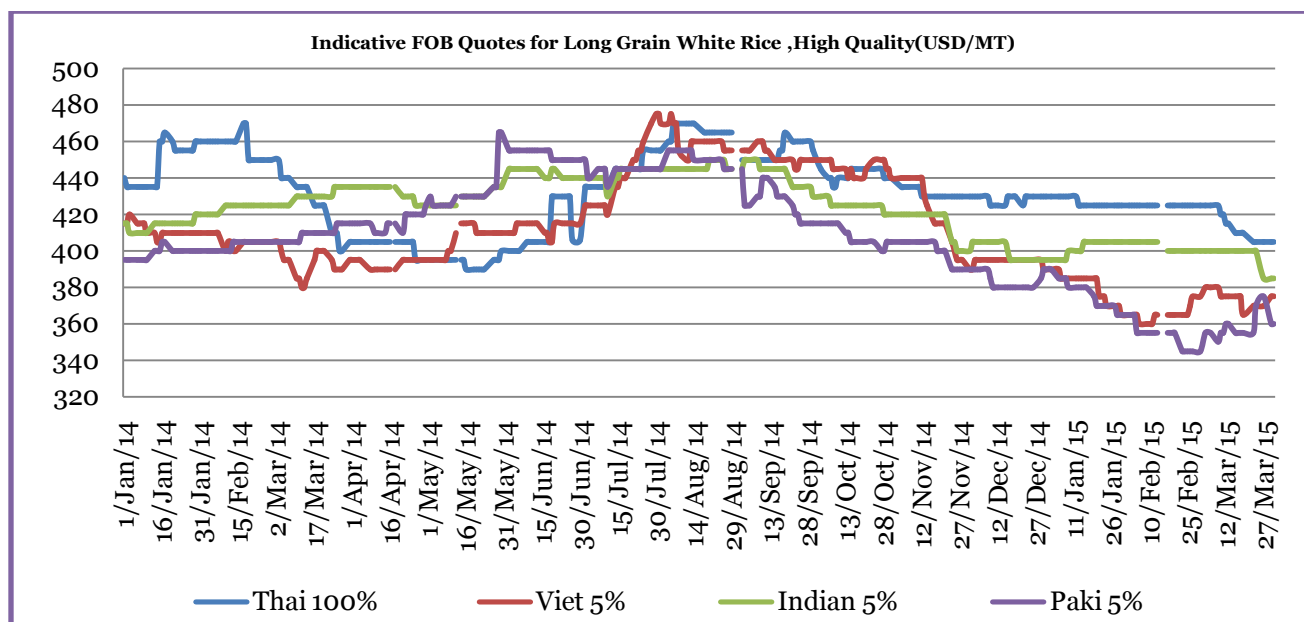

Due to recent 7.8 Mw earthquake in Nepal, not only affected the economic condition of the country but also agriculture growth of the country. Market participant fear that rice area in the country may be much lower than expectation in the country in the coming kharif season, it will direct affect the total availability in the local rice market and Nepal could be dependent for rice on neighboring country. As per USDA Nepal produce around 3 million tonnes rice a year and import around 350,000 tonnes for total consumption. We expect that in coming season the import of agricultural produce including rice could increase from the country.

Lower demand for Vietnam's rice in the global market has compelled Vietnam Food Association to slash down MEP for 25 % broken rice from \$350 to \$340 per tonne. New floor price (MEP) will be effective from 30th April, 2015. Earlier in the month of March, VFA had reduced the MEP from USD 360-350/MT. Vietnam exported about 1.144 million tons of rice in January 1 - April 13, 2015, down about 35% from about 1.76 million tons of rice exported in first four months of 2014 which also indicates that the demand of the Vietnam rice is lower than last year.

As per the unofficial data, the preliminary rice exports (excluding premium white and fragrant rice) for April 13-19, 2015 totaled 13,968 metric tons, down 44,319 metric tons from the previous week and down 56,008 metric tons from the four-week moving average of 69,976 metric tons . Rice exports from January 1 - April 19, 2015, totaled 1,077,490 metric tons, down 2 percent from the same period last year.

Export prices declined slightly from the previous week as supplies of off-season rice continue coming into the market. This week, farm level prices of 5% grade white rice paddy fell to around 7,720 baht per metric ton (\$239/MT), down 0.5 percent from the previous week. Meanwhile, inquiries from traders are reportedly quiet as they are sourcing relatively cheaper rice from Vietnam. Vietnamese rice is approximately 10 percent lower than Thai rice (new-crop 5% grade white rice) and around 5 percent lower than old-crop white rice from the government stocks.

FOB Quotes for Long Grain White Rice, High Quality

Source-Oryza

FOB quotes for high quality white rice in the month of March was weak in all major exporters except Pakistan. FOB for Thailand, Vietnam and India were down by -4%, -1.3 and -3.75% respectively in the month of March from last month. On the other hand due to lower production prospects and lower carryover stock in Pakistan, rice international price was moved up in last month by 4.34%.

IGC Balance Sheet:

(Fig. In Million Tonnes)

	2012-13	2013-14 est.	projection 26.02.15	2014-15 Forecast 22.01.15	projection 23.04.15 2015-16

Trade	39	39	43	42	41
Consumption	458	469	479	483	483
Carryover stocks	109	112	109	101	100
Y-O-Y change	8	3	-3	-	-9
Major Exporters	37	40	37	31	30

Note: Major exporters are India, Pakistan, Thailand, Vietnam, and United States

IGC Rice Balance sheet Highlights:

The 2014/15 global rice outturn is seen fractionally lower m/m, at 474m t, a negligible fall from the previous year's record. With a reduced figure for carry-ins leading to tighter supplies, global end-season stocks are cut slightly, to 100m t, the y/y drop of 8% mostly in the major exporters. Forecast trade in 2015 is down marginally m/m, to 41m t, a decline of 4% from the 2014 peak owing to reduced demand from Asian buyers.

At 474m t, world rice output in 2014/15 is anticipated to be marginally below the previous year's record. As increased uptake, mainly in Asia, boosts consumption to a new peak of 483m t, world end-season inventories are forecast to contract by 8% y/y, to a five-year low. Within the total, major exporters' stocks are seen dropping by one-fifth, to 30m t, on heavy falls in Thailand and India. Global trade in 2015 is expected to recede by about 4%, mainly on reduced buying interest from Asian importers.

Rice Price Trend @ CBOT May- 15, Rough Rice): (Prices in US\$/hundredweight)

Market Analysis:

The CBOT May month rough rice chart indicates range bound movement in previous session. We expect market will hover in the range USD 9.85 to USD 10.20/ hundredweight in coming sessions.

Price Projection (International-CBOT):

Duration	Trend	Price Range
02 nd Week of May, 2015	Steady	USD/ Hundred Weight 9.85-10.20
