Rice production in MY 2015-16 is likely to be up from 104 million tonnes in 2014-15 to 104.5-105 million tonnes due to better rainfall and expectation of higher yield. On the Exports front, we expect that in MY 2015-16, rice exports will be down by around 13% from 2014-15 and will reach 9.8-10 million tonnes due to the lower carry over stock. However, the exports could improve should Indian rice continue to be competitive.

Domestic consumption is likely to be up by 0.15% to 99.5 million tonnes in 2015-16 from last year consumption of 99.35 million tonnes

## Global Updates:

**Pakistan is unlikely to achieve the targets for major Kharif** crops as a result of countrywide floods which have caused serious damage to standing crops especially in Punjab and Sindh. As per [by](#) official source of Ministry of National Food Security and Research (MNFS&R) recent rains and floods have adversely affected Kharif crops including cotton sown on 7.31 million acres, sugarcane sown on three million acres and paddy sown on seven million acres.

**The conversion of low-yielding rice fields into land growing high-value cash crops has helped farmers around the Vietnam** improve their earnings, but the pace of change has been slow, according to the Ministry of Agriculture and Rural Development. Last year rice farmers in the north switched to more lucrative crops like vegetables, corn, soy bean and sesame on more than 17,100ha. Many cash crops yield earnings of VND400-500 million (US\$19,000–23,800) per hectare a year, or five to 10 times the income from rice

**Thailand is set to sign a government-to-government deal with China next month to sell 1 million tonnes of rice**, with delivery starting in December. Commerce Minister Chatchai Sarikulya said after his return from China last week that the deal would be signed on Sept 13 or 14. The grains, which are mainly new 5% white rice and Hom Mali fragrant rice, are part of 2 million tonnes of rice for which Thailand and China signed a memorandum of understanding last December.

The projection of world rice production has been lowered from June estimate but, with a higher figure for carry-ins, end-season stocks are only slightly different m/m, at 96m t, a drop of 8% y/y. Most of the fall is due to a30% shrinkage in major exporters' inventories, almost entirely in India and Thailand.
