Outlook and Review:**Domestic Front**

Wholesale Prices for India as an average for 03rd week of April traded down by 6.16% from last week. Agriwatch expects rice market to move in firm tone as demand is continuously strong from African countries in the market.

NFA Council has put off making a decision to import the rice.

India's major rice importer, Government Trading Corporation of Iran (GTC) recently issued a tender for rice import of 65000 tons from India and Thailand. Iran import around 80-90% of country total rice import from India, but from last year, Iran banned rice imports due to huge stocks, which is ended now. As per USDA, Iran's milled rice ending stock for MY-2016-17 is likely to down by 53% to 321,000 tons from last year stock of 691,000 tons. Agriwatch expects that Iran will buy rice from India in coming months and thus aromatic rice price is likely to move up continuously in near to mid term.

Assam is expected to produce around 75 lakh tons of rice in coming MY-2017-18 which is higher by 23 lakh tons from last year production of 52 LMT. Rice scientists are to find out a technology so that, farmers could get maximum productivity using minimum water. Last year there was an attack of caterpillar and thus huge crop loss reported.

As recommended by Commission for Agricultural Costs and Prices (CACP), the central government might increase its minimum support price (MSP) for tur (red gram) and moong dal (green gram) by Rs 200 and Rs 475 a quintal, respectively, for the 2017-18 kharif season. CACP also had recommended an Rs 80 a quintal (6%) hike in the MSP of both the common grade and A-grade paddy, to Rs 1,550 and Rs 1,590 a quintal respectively, from last year price of Rs.1470/qlt for common grade and Rs.1510/qlt for Grade -A. Also for maize it is recommended, a rise to Rs 1,390 a quintal, from the current Rs 1,330 a quintal.

All-India progressive procurement of Rice as on 30.03.2017 for the Kharif marketing season 2016-17 was 324.81 lakh tonnes against the procurement of 304.15 lakh tonnes in the corresponding period of last year.

India's rice stocks in the central pool as on March- 1, 2017 stood at around 31.43 million tons down by about 7.72% from around 34.06 million tons recorded during the corresponding period last year, according to data from the Food Corporation of India (FCI). India's rice stocks in the central pool are up about 7.30% from around 29.29 million tons recorded on February-01, 2016. The current rice stocks are about one million tons more than the required strategic reserve norms of around 1.25 million tons for this time of the year, according to the FCI.

In the Pre Monsoon season, at All-India level, the rainfall during the week (6th April, 2017 – 12th April, 2017) has been 31% higher than the Long Period Average (LPA). Rainfall in the four broad geographical divisions of the country during the above period have been higher by 215% in North West India and lower by 92% in Central India, 34% in East & North East India, 31% in South Peninsula.

Agriwatch Cereals Commodity Indices – Mar-26, 2017

Agri Commodities Index rises 0.74% as Cereals, Pulses gain

The Agriwatch Agri Commodities Index rose 0.74% to 110.34 during the week ended March 25, 2017 from 109.53 during the previous week led by higher cereals and pulses. The base for the Index and all sub-Indices is 2014 (= 100).

Seven of the 9 commodity group sub-Indices and 15 of the 29 individual commodity sub-Indices that constitute the main Index gained during the week. Spices and Sweeteners were the only declining groups this week. The commodity group sub-Index values and their weekly changes are as follows: Cereals: 113.47 (+1.16%), Pulses: 137.35 (+3.20%), Vegetables: 41.18 (+0.41%), Edible Oils: 104.47 (+0.60%), Oilseeds: 90.01 (+0.80%), Spices: 97.92 (-3.29%), Sweeteners: 125.31 (-0.44%), Fibres: 115.44 (+1.72%) and Other Non-Food Articles: 95.34 (+0.08%).

"Agriwatch has recently launched its AW Agri Commodity Indices to enable organizations access independent Indices to track and use to benchmark their purchases and sales. The Indices are based on the daily prices in the key benchmark markets for each commodity that AW has been covering for the past decade. The indices include an Aggregate Index, Category Indices and individual commodity indices. The weekly indices are free to access on our website www.agriwatch.com. The daily indices are available on subscription. Please contact for more details."

Global Updates

Turkey Rice planting will start at the end of April 2017 and finish by the end of the next month. According to government rules, farmers need to have permission to grow paddy rice. Each county should establish a paddy rice commission and farmers must apply to the commission and receive permission to grow paddy rice. It is expected that the planting area will not decrease, according to permission requests to grow paddy rice so far in the main planting areas such as Edirne and Gonen. Also after some consolidation of fields in Kizilirmak region, it is projected planting area will increase in that region. But the exact numbers will be clear after May. Rice yields depend on rainfall at the end of August and early September. The harvest normally begins in September and ends in October. Post forecasts paddy rice production at 780,000 MT in MY 2017/18 with 99,000 ha planted area.

In the 2017/18 MY, South Africa's rice imports are expected to decrease by four percent to 1.0 million tons on decreased demand. In the 2016/17 MY post estimates South Africa will import about 1.04 million tons of rice as consumption increased by seven percent, mainly due to last year's extreme drought that increased the prices of corn products. For the 2017/18 MY, post forecasts a seven percent decrease in South Africa's rice consumption to 820,000 million tons, due to an increase in corn production on favorable weather conditions and thus relatively lower prices for corn products.

As per USDA latest report, china rice imports for MY-2016-17 is unchanged at 5 million tons. Vietnam and Thailand remain leading exporters of rice to China due to their competitive prices and freight advantage. Rice imports will continue to be profitable if South East Asian countries offer the prices below China's floor price of renminbi 2,660 per ton (\$389). The average CIF rice price from South East Asia to China is renminbi 2,432 per ton (\$350).

Ghana Government has set an ambitious target to increase rice production by an enormous 49% just this year as an extent to reduce rice imports to save the economy foreign exchange. As at the end of 2016, Ghana's rice production stands at 687,680 metric tonnes and 1,025,180 metric tonnes to be produced in 2017. Production in the country is to increase by 337,500 metric tonnes this year which may impact the import from different nation include Indian non-basmati rice.

Rice Trade in calendar 2017 upgraded, mostly reflecting larger expected shipments by Thailand owing to ample local availabilities. Trade preliminarily had seen expanding further in 2018. Rice Stocks (ending in 2018) to decline modestly, as drawdowns, mostly in the US and Thailand, are largely offset by build-ups elsewhere, especially in China.

Global rice production is projected at a record 481.1 million tons, with production forecasts raised for Indonesia, Brazil, and Pakistan. The 2016/17 global ending stocks forecast was raised slightly to 118.1 million tons, the highest since 2001/02. The 2017 global trade forecast was lowered slightly to 41.0 million tons mostly due to weaker expected exports from Pakistan and Egypt.

MY 2017/18 Pakistan rice production is forecast at 6.9 million metric tons, 1.5 percent above the current year's updated production. Area is expected to increase marginally from the revised official 2016/17 area. MY 2016/17 production is adjusted downwards to 6.8 million tons, in accordance with Government of Pakistan figures. Production and yields during the last three years have been good with little fluctuation. This is due in part to the deposit of a nutrient rich top layer of soil as a result of several floods in recent years.

FOB Quotes Aromatic Rice (1121 Steam)

Source-FAO& Agriwatch

Indian FOB for 1121 steam in the month of March moved firm from last month and currently is in the range of USD 1143-1145/MT which is up by 4.6% from last month price of USD 1092/T. Average basmati rice price too firmed this month with higher demand and lower stocks. According to the UN's Food and Agriculture Organization (FAO), Currently Pakistani basmati FOB is also moving firmer from last six months due to lower production estimates and now it's hovering in the range of USD 1078-1080/MT which is also up by 4.78% from last month FOB of USD 1029/MT.

Note: Major exporters are India, Pakistan, Thailand, Vietnam, and United States

IGC Rice Balance sheet Highlights

Global rice supply and demand figures for 2016/17 are broadly unchanged from February. In 2017/18, world output is predicted at a new record, but y/y gains are likely to be slim as low international prices potentially serve as a disincentive to some producers. Population growth is set to lead food consumption higher, while carryover stocks are expected to remain comfortable. Trade could edge up slightly in 2018 on bigger shipments to African buyers in

particular. Underpinned by higher plantings and improved growing conditions in Asia, world rice output in 2016/17 is seen rising by 2% y/y, to a record of 483m t. With the annual increase in supplies absorbed by a comparable rise in total use, global ending stocks are forecast steady y/y. However, major exporters' inventories could fall slightly as the Thai government looks to offload old crop reserves. Prospects for 2017/18 are tentative, but output may climb to a new peak. However, continued low prices may discourage area gains in some exporters. Although record uptake is anticipated, carryovers are predicted to stay high as a further drawdown in key exporters is more than offset by accumulation elsewhere. As always, trade will be shaped by import needs in Asia and Africa.

IGC Forecast the World Rice Production Up in 2017-18

In its March 2017 Grain Market Report (GMR), the International Grains Council (IGC) projection for 2017-18 global rice production at around 487 million tons, up about 0.82% from an estimated 483 million tons in 2016-17 on improved Asian production.

Global Trade of Rice Unchanged from Last Month

The IGC forecasts 2017-18 global rice trades at around 41 million tons, unchanged from its estimates for 2016-17. It expects world rice trade in 2017 to remain same on normal demand from buyers in Africa and Asia.

Global Consumption of Rice Increases in 2016-17

The IGC forecasts 2017-18 global rice consumption to up about 0.8% to around 486 million tons from an estimated 482 million tons in 2016-17

Rice Price Trend @ CBOT May- 17, Rough Rice) (Prices in US\$/hundredweight)

Market Analysis

The CBOT May month rough chart for rice indicates steady to weak movement in last weeks. We expect market to hover in the range of USD 9.77-9.67 hundred weights in coming sessions.
