## Global Updates

**Vietnam rice hit its highest level in over a year this week on potential export deals and prices in Thailand firmed up as supply eased, while the Indian variety gained on growing demand from Africa, Expectations of strong demand from top importing countries such as Bangladesh and the Philippines are fuelling the uptrend in Vietnam and Thailand rice prices.**

Interested buyers could examine the rice's quality before bidding on May 24. The result of the auction is scheduled to be announced in the first week of June. To date, the Thai government has stocked 4.82 million tonnes of rice, much lower than the volume of 18.7 million tonnes between 2011-2014. Production and yields during the last three years have been good with little fluctuation. This is due in part to the deposit of a nutrient rich top layer of soil as a result of several floods in recent years.**

**IGC Rice Balance sheet Highlights**

Minor adjustments for production and uptake lift the 2016/17 global rice stocks forecast slightly, to 119m t, a fractional y/y rise. For the 2017/18 season, projections for supply and demand are little changed from March, with output seen edging up to a new peak, mainly on gains in Asian producers, while end-season carryovers are tentatively expected to reach 120m t, 1m higher than before. World import demand in 2018 is seen marginally stronger y/y, at 41m t. Aided by much improved weather across Asia, 2016/17 global rice output is placed at a peak of 483m t, 10m higher y/y. Amid anticipated record supplies, uptake is seen rising to a new high, while end-season inventories could edge up. The outlook for world supply and demand in 2017/18 is tentative given that the bulk of seeding is still some months away. Nevertheless, assuming continued state support for producers in Asia and favorable conditions for crop development, output is predicted to reach a record of 487m t. Both consumption and inventories are likely to expand further, while traded volumes are seen remaining high, at about 41m t. Thailand's export potential may be contained by tighter supplies, but India and Vietnam could sell more.
