Outlook and Review:
Domestic Front

Average weekly wholesale rice prices in India stood at around Rs.2940 per quintal in 03rd week of September- 2017, weak about 5.51% from around Rs.3112 per quintal in last week, and up about 5.10% from around Rs.2798/ quintal a year ago. Due to fresh arrival from major producing states, price is come down in this week and likely to stay steady in coming week.

The total paddy sown area as on 22nd September-2017 was 376.76 lakh hectares which is down by 1.30% from last year area of 381.75 lakh hectares and up about 0.59% from normal area as on date of area of 374.54 lakh hectares.

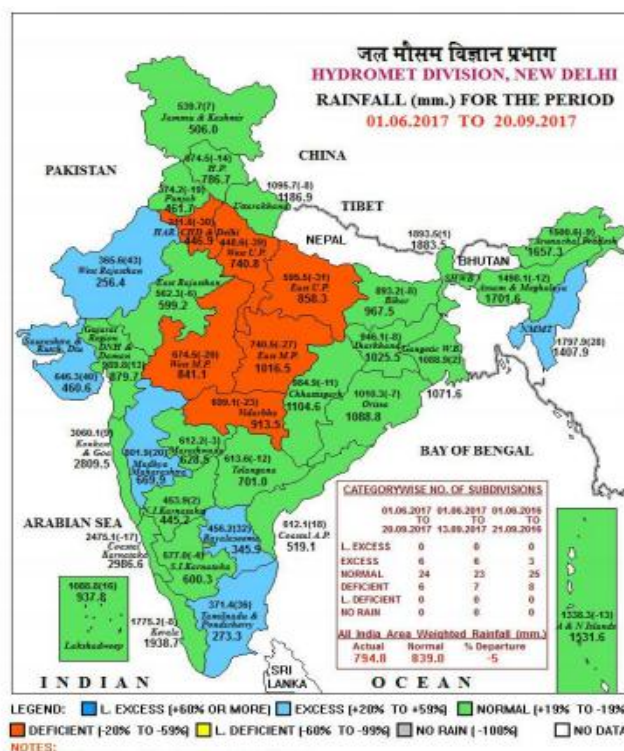

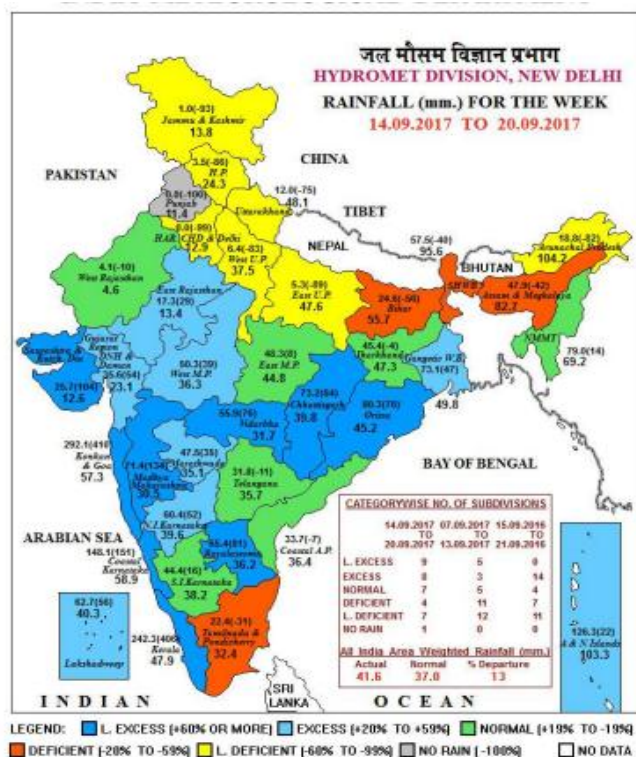

The Government recently said it has not changed the policy on rice exports, following a “fake” notification which showed that non-basmati rice exports have been “prohibited” from September 15 till November 30 this year. This (fake notification) is of serious concern. Strict action should be taken against it. This (fake notification) shook the whole rice community.

All-India progressive procurement of Rice as on 15.09.2017 for 2016-17 was 387.43 lakh tonnes against the procurement of 341.59 lakh tonnes in the corresponding period of last year. The procurement of wheat for the rabi marketing season (RMS) 2017-18 was 308.25 lakh tonnes against the procurement of 229.62 lakh tonnes in the corresponding period of RMS 2016-17.

In the monsoon season, at All-India level, the rainfall during the week (07th September, 2017 – 13th September, 2017) has been 31% lower than Long Period Average (LPA). Rainfall in the four broad geographical divisions of the country during the above period have been higher than LPA by 26% in South Peninsula but lower than LPA by 72% in North West India, 31% in Central India and 26% in East & North East India.

Basmati rice has regained its position after MY-2014-15 as the top commodity export from India. The fine rice variety replaced buffalo meat to become the top most export for the April-June quarter. Basmati rice export volume were lower than buffalo meat due to import ban from Iran which is largest basmati rice importer from India, now Iran continuing importing basmati even during its harvest season. Another factor behind Basmati grabbing the top spot in exports is the decline in the export of buffalo meat due to ban on the sale of cattle in mandis hit the buffalo trade. The basmati exports increased from Rs 6,196 crore of last year's April-June quarter to Rs 8168 crore in the same quarter this year.

The 4th Advance Estimates of production of major crops for 2016-17 have been released by the Department of Agriculture, Cooperation and Farmers Welfare on 16th August, 2017. As per 4th Advance Estimates, the estimated production of major crops during 2016-17 for food grains is 275.68 million tons and for Rice it is 110.15 million tons.

Weather Watch:

Advance of Southwest Monsoon-2017

The monsoon trough was close to foothills of the Himalayas or north of its normal position during the week. Southwest monsoon was vigorous over Haryana, Chandigarh & Delhi on a few days; over Uttarakhand, Punjab, West Rajasthan, Saurashtra & Kutch, Tamilnadu & Pondicherry and South Interior Karnataka on one or two days of the week. It was active over Arunachal Pradesh on many days; over Kerala on a few days; over Assam & Meghalaya, Nagaland Manipur, Mizoram & Tripura, West Bengal & Sikkim, Odisha, Bihar, West Uttar Pradesh, Uttarakhand, Himachal Pradesh, Coastal Andhra Pradesh, Rayalaseema and North Interior Karnataka on one or two days of the week.

Riding a record harvest, public rice procurement in MY 2016/17 through August 25, 2017, was estimated at 38.73 MMT, an increase over the 34.13 MMT procured during the corresponding period last year. All major rice producing states procured at higher levels except for the southern states of Andhra Pradesh, and Tamil Nadu where dry conditions affected production levels. With additional procurement of rabi and summer rice likely to continue in eastern and southern states, although less than last year, public rice procurement in MY 2016/17 is already exceed the target of 38 MMT for MY 2016-17.

FOB Quotes Aromatic Rice (1121 Steam)

Source-FAO& Agriwatch

Indian FOB for 1121 steam in the month of August moved weak from last month and currently is in the range of USD 998-1000/MT which is down by 4.32% from last month price of USD 1045/T. Average basmati rice price too frail this month with lower demand from international markets, however overall sentiments for basmati rice price remains firm in coming two months till the arrival of new crop which starts from October. According to the UN's Food and Agriculture Organization (FAO), Currently Pakistani basmati FOB is moving weak and now it's hovering in the range of USD 1125/MT which is also down by 5.85% from last month FOB of USD 1195/MT.

Global Updates

The government has decided to import 100,000 tonnes of white rice from Myanmar, the main reason behind is skyrocketing prices of rice in the local market. The rice will be imported at \$442 a tonne.

Despite the projected reduction in palay harvest area and yield, the Philippine Statistics Authority (PSA) said paddy-rice output in the July-to-September period would still reach 3.36 million metric tons (MMT).after revised its estimates country downward its forecast for unmilled rice production to 3.36 MMT, from 3.39 MMT. In its Global Agriculture Information Network report, FAS said Philippine rice harvest area in marketing year 2016-2017 could expand to 4.705 million hectares, 2.28 percent bigger than the FAS's previous forecast of 4.6 million hectares.

Unofficial and preliminary Thailand rice exports (excluding premium white and fragrant rice) for August 28 – September 3, 2017, totaled 187,803 metric tons, down 6,682 metric tons from the previous week, and up 686 metric tons from the four-week moving average of 187,117 metric tons. Rice exports from January 1 – September 3, 2017, totaled 5,939,672 metric tons.

South Korea will increase the purchase of local rice that will be set aside for reserve purposes this year to help stabilize prices on the domestic market, The Ministry of Agriculture, Food and Rural Affairs said it will buy 350,000 tons of rice harvested this year from Sept. 25 to Dec. 31. It will increase the purchase of rice from last year's 82,000 tons to 90,000 tons and buy 260,000 tons of packaged rice.

Thailand Export prices increased 2-3 percent from the previous week due to new inquiries for white and parboiled rice from several African and Middle Eastern countries. Exporters are also actively fulfilling pending shipments to African countries using mostly old-crop white rice sourced from government stocks. The new tender for the remaining 0.6 million metric tons of government stocks has not yet been finalized due to the government's ongoing investigation on non-food quality rice being resold in the food chain.

Taiwan Rice production is forecast to remain stable in MY2017/18 and MY2016/17 at 1.114 million tons. COA has set a realistic rice area target for these years of 260,000 hectares. Government support has kept rice production relatively stable despite high-production costs and falling demand. In 2015, 295,000 tons of rice was sold to the government under Taiwan's voluntary purchase program, accounting for 19 percent of total production. MY2015/16 production is lowered slightly to 1.112 million tons on 274,000 hectares according to preliminary COA statistics. Typhoons damaged the second rice crop in MY2015/16, lowering yields and overall production despite an increase in acreage. The increase in area was caused by farmers returning fields to production in early 2016 following a draught the previous year.

Major Exporters	37	32	30	27	26

Note: Major exporters are India, Pakistan, Thailand, Vietnam, and United States

IGC Rice Balance sheet Highlights

The global rice supply and demand backdrop is unchanged for 2016/17 but, owing to fractional adjustments, world output in 2017/18 is placed a little lower, at 485m t, albeit potentially a new high. The outlook for consumption is trimmed, but end-season stocks are maintained at 118m t, down by 2m y/y. The modest annual fall in inventories stems from an anticipated drop in major exporters' reserves to a ten-year low, mainly on a drawdown in Thailand. Trade in 2018 is projected to stay elevated on firm demand from buyers in Africa, Asia and the EU. Global rice ending stocks in 2016/17 are seen broadly steady y/y, although exporters' inventories could decline, led by Thailand, where the government is expected to sell the bulk of its state reserves by the end of the current calendar year. On the basis of marginal area gains in Asia, global rice output is projected to edge up in 2017/18 but, with uptake increasing by 3m t, to a record, aggregate end-season carryovers could fall slightly. Major exporters' stocks are projected to contract by 11% y/y, to a ten-year low of 26.4m t, nearly 10m below the five-year average. At 42.4m t, trade in 2018 is tentatively anticipated to be close to an all-time high on demand from Asia and Africa, while another year of heavy imports by the EU is likely.

IGC Forecast the World Rice Production Up in 2017-18

In its August 2017 Grain Market Report (GMR), the International Grains Council (IGC) projection for 2017-18 global rice production at around 485 million tons, up about 0.20% from an estimated 484 million tons in 2016-17 on improved Asian production.

Global Trade of Rice Unchanged from Last Month

The IGC forecasts 2017-18 global rice trades at around 42 million tons, unchanged from its estimates for 2016-17. It expects world rice trade in 2017 to remain same on normal demand from buyers in Africa and Asia.

Global Consumption of Rice Increases in 2016-17

The IGC forecasts 2017-18 global rice consumption to up about 0.62% to around 487 million tons from an estimated 484 million tons in 2016-17. World rice stocks are projected to tighten in 2017/18 on a contraction in the major exporters, led by Thailand.
