Outlook and Review:**Domestic Front**

- **Average weekly wholesale rice prices in India stood at around Rs.3312 per quintal in this week of February- 2019**, down by 0.7% from Rs.3335 per quintal in last week, and up by 14% from Rs.2900 per quintal a year ago. Agriwatch expects non-basmati rice market to move range bound with firm tone due to declining of paddy arrival.
- **Rice export markets in India and Thailand were pressured this week by slack demand as harvests poured in**, continuing a slow trend in top Asian hubs this year, while Vietnam struggled with a growing stockpile exacerbated by Chinese import restrictions.
- **In top exporter India, prices for the benchmark 5 percent broken parboiled variety were unchanged** from last week at \$380-\$385 a tonne due to dwindling interest from Africa. For the last few weeks, export demand has been weak. African buyers are not active in the market in top exporter India.
- **The second largest exporter Thailand saw prices for its 5 percent broken rice variety rising to \$383-\$405 a ton**, free on board Bangkok, from \$382-\$398 last week even as demand was muted. The slight rise in prices was dictated by a stronger baht, while fresh supply entered the market. Thailand continued to look to the Philippines for a possible deal, but the domestic currency's strength versus the dollar has impeded sales. The baht has gained more than four percent this year, translating into higher export prices in U.S. dollars. Prices of Vietnam's 5 percent broken rice were flat at \$340, with a sizeable harvest and trade curbs from China causing growing stockpiles of fragrant rice in the country, reducing domestic prices.
- **Haryana Agricultural Department has released the second advance estimation of crop production** for the entire marketing season (Kharif + Rabi) of 2018-19. Under this, the possibility of production of rice, wheat, sugarcane and guar is less than the 2017-18 seasons and the production of millet and cotton is expected more. As per the advance estimates, the production of rice in Haryana can be reduced by 4.3 percent from 48.80 lakh tons in 2017-18 season and 46.69 lakh tons in 2018-19 and wheat production could fall by 7.8 percent from 122.63 lakh tons to 113.01 lakh tons.
- **The government had fixed 375 lakh tons of paddy procurement in the current season, of which more than 350 lakh tons of paddy has been procured so far.** Government procurement of paddy this year may be more than 400 lakh tons. As on 18th February 2019, all India rice /Paddy procurement is reached to 349.74 lakh tons which is more than last year procurement of corresponding period. Highest procurement has been received from states of Punjab, Chhattisgarh, Haryana, Telangana and Andhra Pradesh.
- **In January, 5 lakh tons of basmati rice and 5 lakh tons of non-basmati rice were exported from India.** Exports of basmati rice from April to December were 28.6 million tons and non-basmati 56 lakh tons, ie non-basmati rice export reached 61 lakh tons and export of basmati rice reached 33.6 lakh tons from April to January.
- **The area of Rabi paddy has declined from 35.30 lakh hectares in last year to 16.55%, or decrease of 5.75 lakh hectares.** Under this, the rabi paddy area has increased in Telangana, Chhattisgarh, Kerala, Assam, Tripura and Orissa, while Tamil Nadu, Andhra Pradesh and Karnataka have decreased.

This year about forty to fifty thousand hectares area under basmati has been shifted either to normal paddy or shifted to other major competitive crops like sugarcane/coarse cereals in comparison to last year.

PB-1121

In the current season PB 1121 acreage in the 7 states has been reduced by 3.51% over last year. Farmer preferred high yielding Pusa-1509 in place of low yielding PB-1121. Moreover, PB 1509 also has shorter time period and early maturity trait if compared with PB 1121. Initial crop health report shows that PB 1121 is performing good in Haryana and Punjab while some crop damage reported in UP / Uttarakhand but over this year lesser crop infestation and timely application on remedial action by farmers on brown plant hopper & White bagged plant hopper reduces the crop losses. This year farmers are expected to harvest about 35-38 lakh tons of PB 1121 against the 39-40 lakh tons of harvest happened last year. However, final figures might differ once actual arrival will start coming in the market.

Pusa 1509

This year Pusa-1509 increased by 5.7% over last year. It clearly indicates that farmer replaced PB 1121 with Pusa - 1509 due to lesser price differential between these two prominent varieties. Farmer preferred high yielding Pusa-1509 in place of low yielding PB-1121. Also, PB-1509 shorter time period and early maturity trait preferred choice among farmers; PB 1509 crop health is also intact and expected to give slightly better yields in Haryana, UP & Punjab as compare to last year. Overall PB 1509 yields will be little bit on positive side as compare to last year, basis the current crop conditions This year farmers are expected to harvest around 6.0-6.5 lakh tons of PB 1509 which could be around 5.8-6.0 lakh ton last year. However, final figures might differ once actual arrival will start coming in the market.

Sharbati and Sugandha

The acreage under long grain non-basmati varieties (Sharbati and Sugandha) in these targeted districts has increased by 0.1%. This year Sharbati is transplanted on similar area as transplanted last year in Western & Central part of UP / Punjab & Haryana. This year farmers are expected to harvest around 6-7 lakh tons of Sharbati which could be around 0.3% higher than last year. However, final figures might differ once actual arrival will start coming in the market.

Weather Watch:

The Severe Cyclonic Storm 'PHETHAI' over west central Bay of Bengal moved further northwards with a speed of 24 kmph during past 06 hours, weakened into a cyclonic storm and lay centered at 0830 hours IST 17th December, 2018 over west central Bay of Bengal near Latitude 15.8°N and Longitude 82.2°E, about 370 km north-northeast of Chennai (Tamilnadu), 120 km east-southeast of Machilipatnam (Andhra Pradesh) and 130 km south of Kakinada (Andhra Pradesh). It is very likely to move nearly northwards and cross Andhra Pradesh coast around Kakinada during afternoon of today i.e. 17th December. However, due to unfavorable environmental conditions, it is likely to slightly weaken further before landfall and cross coast as a cyclonic storm with wind speed of 70-80 kmph gusting to 90 kmph.

Total	370.00	315.30	276.16

All-India progressive procurement of Rice as on 24.01.2019 for 2018-19 was at 315.30 lakh tons against the procurement of 276.16 lakh tons in the corresponding period of last year. The procurement of wheat for the Rabi Marketing Season (RMS) 2018-19 was 357.95 lakh tons which was higher than the procurement of 308.24 lakh tons in the corresponding period of RMS 2017-18.

According to available data, in the current kharif marketing season, Punjab has procured 113.30 lakh tonnes rice, 39.09 lakh tonnes in Haryana, 40.24 lakh tonnes in Chhattisgarh, 26.59 lakh tonnes in Telangana, 25.36 lakh tonnes in Uttar Pradesh, 20.46 lakh tonnes in Orissa, 19.69 lakh tonnes in Andhra Pradesh, 10.19 lakh tonnes in Madhya Pradesh, 8.88 lakh tonnes in West Bengal, 4.44 lakh tonnes in Uttarakhand, 2.17 lakh tonnes in Tamil Nadu, 2.39 lakh tonnes in Maharashtra and 1.12 lakh tonnes in Bihar.

FOB Quotes Aromatic Rice (1121 Steam)

Source-FAO& Agriwatch

Indian FOB for 1121 steam traded weak in the month of November and currently is in the range of USD 1037.65/MT which is up by 0.50% from last month price of USD 1032.48/T due to reducing arrival of current crop. Aromatic rice prices are also traded slightly firm on fresh demand from overseas buyers; Agriwatch expects that aromatic international rice price is likely to trade steady to firm in coming month due high demand and lower production prospective. According to the UN's Food and Agriculture Organization (FAO), Currently Pakistani basmati FOB is moving steady from last month and is now hovering in the range of USD 938/MT which is down by 2.35% from last month FOB of USD 960.75/MT.

Global Updates

According to the February report of IGC, rice production in this world can be 495 million tonnes, which is more than 1 million tonnes more than last year's production. This year, consumption of rice in the world can be 492 million tons, 486 million tons last year. End of this season can save the carry over stock of 153 million tonnes of rice in the world, which is more than 3 million tons more than last year.

According to the latest (February) report of USDA, rice production in China is expected to increase. On the basis of data from the National Bureau of Statistics, USDA has set rice production estimation in China during the 2018-19 season, with an increase of approximately 50 lakh tons to 14.85 million tons. This figure is almost equal to the 2017-18 season.

According to the USDA report, the use of rice in the 2018-19 marketing season is expected to reach 49.03 million tons, which is 7 lakh tons more than the previous report estimates. Under this, the likelihood of the consumption of rice in China, Nepal and the Philippines and the reduction in Brazil and Nigeria has been expressed.

Sri Lanka declared Minimum Support Price for Nadu and Samba variety rice which will be effective from 1st April. MSP of Nadu Variety Rice is 80 Sq. Kg / kg (Indian Rupees 32 per kg) and Samba Variety MSP 85 Sri Lankan rupee per kg (Indian Rupees 34 per kg).

Myanmar produced 9 billion tonnes of rice in 2017-18, out of which 3.85 million tonnes of rice was exported. The Myanmar government aims to export 4 million tonnes of rice by 2020 for which farmers have announced different types of schemes.

According to the latest (February) report of USDA, rice production in China is expected to increase. On the basis of data from the National Bureau of Statistics, USDA has set rice production estimation in China during the 2018-19 season, with an increase of approximately 50 lakh tons to 14.85 million tons. This figure is almost equal to the 2017-18 season.

According to the USDA report, the use of rice in the 2018-19 marketing season is expected to reach 49.03 million tons, which is 7 lakh tons more than the previous report estimates. Under this, the likelihood of the consumption of rice in China, Nepal and the Philippines and the reduction in Brazil and Nigeria has been expressed.

Thailand aims to export 9.5 million tons of rice this year, a 14% decline from 2018. The world's second-biggest rice exporter shipped 11 million tons of rice in 2018. This year's rice export situation will not sail as smoothly as last year. The lower volumes are due to a stronger Thai baht and increased competition from India and Vietnam. The baht has gained nearly 2.6% against the US dollar so far this year. Indonesia will import less Thai rice this year due to ample rice stocks, and the Philippines and Malaysia are expected to turn from Thailand to Vietnam due to pricing.

The European Commission has imposed tariffs on rice imported from Cambodia and Myanmar in a bid to curb a surge in rice imports from the two Southeast Asian countries. In a statement released on Wednesday, the European Union (EU) said a significant increase of imports of Indica rice from Cambodia and Myanmar into EU caused economic damage to the EU producers. The European Commission has therefore decided today to re-introduce import duties that will be steadily reduced over a period of three years

IGC Balance Sheet:

Attributes (Fig in Million Tons)	2015-16	2016-17	2017-18 Estimate	(2018-19) Forecast. 22.11.2018	(2018-19) Forecast. 24.01.2019
Production	475	487	490	491	488
Trade	40	48	48	49	47
Consumption	474	486	487	493	491
Carryover stocks	122	123	126	125	126
Y-O-Y change	1	1	1		-3
Major Exporters	33	31	28	31	30

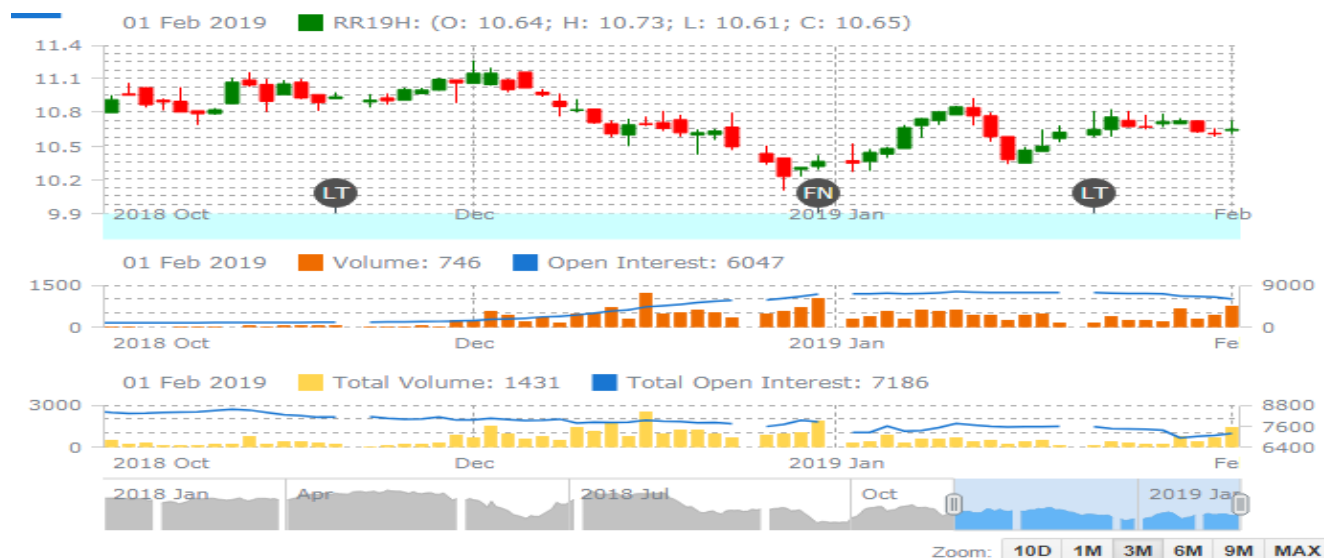

Note: Major exporters are India, Pakistan, Thailand, Vietnam, and United States

IGC Rice Balance sheet Highlights:

Owing to downgrades for India and Thailand, global rice output is forecast 3m t lower m/m, at 488m, a drop of 3m y/ y. Nevertheless, due to a larger figure for carry-ins, supplies are pegged fractionally higher than before and, reflecting a reduction for uptake, stocks are lifted to 126m t, but still a drop of 2% y/y. The 2019 trade projection is lowered to 47m t, a modest y/y gain on anticipated African demand. World rice production in 2018/19 is seen modestly lower y/y as potentially smaller crops in Asian exporters, where weather has been less than ideal, are only partly offset by improved outturns elsewhere. In China, too, output could fall amid supply-side reforms. With consumption set to ascend on population growth, inventories may fall, albeit remaining above average. Trade is predicted to edge up to a new peak in 2019, as bigger shipments to Africa more than offset a reduction in demand within Asia against the backdrop of bigger local supplies.

Rice Price Trend @ CBOT March- 19, Rough Rice)

(Prices in US\$/hundredweight)

Market Analysis

The CBOT March-19 month rough chart for rice indicates steady to firm tone from last week. We expect market to hover in the range of USD 10.00-11.50 hundred weights in coming sessions.
