Note: Major exporters are India, Pakistan, Thailand and Vietnam.

The outlook for world rice supply and demand in 2021-22 has little-changed month on month basis with trade edging up to a new high. The estimated global output for 2022–2023 has been reduced by 6 million tonnes per month due to lower expectations for Asian countries, particularly India due to lower production, and export restrictions. Global carryovers are reduced by 7 million to 173 MMT, including decreases for China and top exporters, along with a decreased prediction for food use. The 2023 trade projection has been reduced by about 3 MMT month on month basis due to anticipated tighter supply from major suppliers.
