CORIANDER SEED

Fundamentals:
Today's Update:

- By and large steady sentiments witnessed in coriander seed market on Monday.
- Lower supply reported today as stockists were expecting higher prices in coming days.
- Lower rainfall may reduce Coriander sowing area in Gujarat. Currently in Gujarat deficient rainfall reported, Gujarat region -24% and Saurashtra and Kutch region -31%. Sources revealed that, Coriander sowing area may reduce by 20 - 30% current year, lower prices from last two years is also biggest concern.
- On the other hand, Jeera prices moving at all time high current year due to good export demand. Farmers likely to prefer Jeera rather than Coriander due to higher prices. But, lower rainfall may impact on yield. Actual picture likely to come when sowing starts from October last week or November first week.

Previous Update:

- *Increasing supply reported as stockists were releasing their 2 - 3 years holding stocks at present. Stockists were frustrated as Coriander prices continuously down from last two years.*
- Current year prevailing lower prices is the main concern for Coriander sowing area, coming 15 – 20 days is more crucial for area estimate.
- *Coriander prices are expected to gradually improve in coming days.*
- All India stock of coriander could be around 45 - 50 lakh bags as compared to last year 75 – 80 lakh bags (1 bag = 40kgs).
