JEERA (CUMIN SEED)

Fundamentals:
Today's Update:

- By and large steady sentiments witnessed in cumin seed spot market on Thursday.
- However, buyers reported active at Unjha spot market as festive demand started.
- Currently in Gujarat deficient rainfall reported, Gujarat region -24% and Saurashtra and Kutch region -31%. Jeera prices moving at all time high current year due to good export demand. Farmers likely to prefer Jeera rather than Coriander due to higher prices. But, lower rainfall may impact on yield. Actual picture likely to come when sowing starts from October last week or November first week.

Previous Update:

- Currently, normal export demand reported at Unjha spot market from current level from Singapore, China and Egypt etc.
- We expected prices may take downward correction in coming days as buyers reported inactive at higher prices level.
- Currently, all India stocks reported around 18 – 20 lakh bags (1 bag = 55 Kgs).
- As per trade information, crop damaged reported in Syria and Turkey due to heavy rainfall in June support Indian Jeera in International market. Quality wise (due to heavy rainfall) and price wise Indian Jeera more affordable.

CARDAMOM

Fundamentals

Today's Update:

- Weak sentiment witnessed in Cardamom spot market on Thursday.
- Currently buyers reported unresponsive at higher prices level.
- We expect, as Cardamom prices reported higher at Indian market due to crop damaged in Kerala and Karnataka, Cardamom may import from Guatemala in coming days (November, December) during festive season. Normally, difference between Indian Cardamom prices and Guatemala prices are around Rs.300 - 350/-kg. However, direct import duty to India is 74%, but it may enter to Indian market via Nepal, Bhutan and Bangladesh etc.
- *Currently, Cardamom export banned to Saudi Arabia (major importer) due to higher pesticide issue, if it happens in normal way Indian Cardamom prices may trade at double level from current prices.*
- As third round picking activity is going on it will end by last week of October. Supply reported early current year due to favourable weather (before rainfall) condition.

Previous Update:

- The current season officially began on August 1. From 1st Aug to 29th Sep arrivals reported 3,944 tons and sales 3,881 tons.
- As Cardamom prices trading at higher levels from couple of days buyers reported unresponsive at the spot market. We expect from lower levels buyers likely to active in coming days.
- Due to heavy rainfall current year Cardamom production likely to go down in coming days and support the prices.
- Sources revealed that, for 2018 - 19 production will decrease in coming days due to massive loss as a result of rainfall. Actual production will come after some time. In 2017-18 crop year, Cardamom production is around 30,000 – 32,000 MT.

CORIANDER SEED

Fundamentals:
Today's Update:

- Mixed sentiments witnessed in coriander seed market on Thursday.
- Lower rainfall may reduce Coriander sowing area in Gujarat. Currently in Gujarat deficient rainfall reported, Gujarat region -24% and Saurashtra and Kutch region -31%. **Sources revealed that, Coriander sowing area may reduce by 20 - 30% current year, lower prices from last two years is also biggest concern.**
- On the other hand, Jeera prices moving at all time high current year due to good export demand. Farmers likely to prefer Jeera rather than Coriander due to higher prices.

Previous Update:

- Increasing supply reported as stockists were releasing their 2 - 3 years holding stocks at present. Stockists were frustrated as Coriander prices continuously down from last two years.
- Current year prevailing lower prices is the main concern for Coriander sowing area, coming 15 – 20 days is more crucial for area estimate.
- Coriander prices are expected to gradually improve in coming days.
- All India stock of coriander could be around 45 - 50 lakh bags as compared to last year 75 – 80 lakh bags (1 bag = 40kgs).
