CARDAMOM

Fundamentals

Today's Update:

- Steady sentiment witnessed in Cardamom spot market on Thursday.
- Currently buyers reported unresponsive at higher prices level.
- Increasing supply reported in the spot market as farmers were releasing their old and new stocks to meet their needs after devastating flood.
- The current season officially began on August 1. From 1st Aug to 12th Oct arrivals reported 4,917 tons and sales 4,821 tons.
- Agriwatch estimate, for 2018 -19 productions likely to be around 24,000 – 26,000 MT as a result of massive loss in heavy rainfall, in 2017-18 it was around 30,000 – 32,000 MT.

Previous Update:

- *Currently, Cardamom export banned to Saudi Arabia (major importer) due to higher pesticide issue, if it happens in normal way Indian Cardamom prices may trade at double level from current prices.*
- As third round picking activity is going on it will end by last week of October. Supply reported early current year due to favourable weather (before rainfall) condition.
- *We expect, as Cardamom prices reported higher at Indian market due to crop damaged in Kerala and Karnataka. Cardamom may import from Guatemala in coming days (November, December) during festive season. Normally, difference between Indian Cardamom prices and Guatemala prices are around Rs.300 - 350/-kg. However, direct import duty to India is 74%, but it may enter to Indian market via Nepal, Bhutan and Bangladesh etc.*
- As Cardamom prices trading at higher levels from couple of days buyers reported unresponsive at the spot market. We expect from lower levels buyers likely to active in coming days.
- Due to heavy rainfall current year Cardamom production likely to go down in coming days and support the prices.

CORIANDER SEED

Fundamentals:
Today's Update:

- Continued steady sentiments witnessed in coriander seed market on Thursday. Mostly markets closed due to festival season.
- Expectations of lower sowing area and lower ending stocks support Coriander prices
- Agriwatch estimate for 2018-19, production 3.13 lakh tons and opening stocks was around 1.83 lakh tons, after increasing exports and domestic consumption. We expect ending stocks to be lower by around 0.86 - 1.05 lakh tons, which is lower than 1.88 lakh tons compared to last year.
- We expect Coriander prices likely to go up further in coming days.

Previous Update:

- Lower rainfall may reduce Coriander sowing area in Gujarat. Currently in Gujarat deficient rainfall reported, Gujarat region -24% and Saurashtra and Kutch region -31%. Sources revealed that, Coriander sowing area may reduce by 20 - 30% current year, lower prices from last two years is also biggest concern.
- On the other hand, Jeera prices moving at all time high current year due to good export demand. Farmers likely to prefer Jeera rather than Coriander due to higher prices.
- Increasing supply reported as stockists were releasing their 2 - 3 years holding stocks at present. Stockists were frustrated as Coriander prices continuously down from last two years.
- Current year prevailing lower prices is the main concern for Coriander sowing area, coming 10 – 15 days is more crucial for area estimate.
