

RED CHILLI

Fundamentals:

Today's Update:

- Steady to weak sentiment witnessed in Chilli market on Tuesday.
- Heavy rainfall reported in Guntur, Krishna etc. major chilli growing regions slightly affect Chilli standing crop. As per trade sources, due to heavy rainfall affect percentage very negligible as dry conditions reported in that regions (Overall, the average rainfall received in Andhra Pradesh from 1-6-2018 to 12-12-2018 is recorded as 545.1 mm as against the Normal as on date of 840.6 mm showing by Deficit – 35 percent. Districts like Vizianagaram, Visakhapatnam, East Godavari, Krishna, Guntur, Prakasam, SPSR Nellore, Chittoor, YSR Kadapa, Anantapuram, Kurnool received deficit by -20% to -59%). For matured ready to pick standing chilli crop may turn little black colour. As soil was very dry, rain water likely to absorb, so not very concern about water logging. Overall, till today current rainfall likely to help chilli standing crop.
- Chilli prices likely to trade subdued as moisture content new crop arrivals started entering to Guntur market and year ending. Normal quality new crop expected to arrive after 15th January. We expect lower stocks in the spot market likely to support new Chilli prices in coming days.
- In Andhra Pradesh, Chilli sowing for the Rabi season as of 12th Dec reported at 9,929 hectare as compared to 10,255 hectare in the corresponding period last year. Normal area reported 25,950 hectare. It is at vegetative stage. Chilli transplantations are under progress.

Previous Update:

- Exporters are expected to slow down in second half of December on account of Christmas and New Year holidays.
- In Telangana, Chilli sowing for the Rabi season as of 05th Dec reported at 6,793 hectare as compared to 6,699 hectare in the corresponding period last year. Normal area reported 16,336 hectare. It is at vegetative stage.
- Standing crop condition reported weak in Maharashtra and Madhya Pradesh regions due to lower rainfall. We expect supply from both states likely to end early by one month or one and half month from normal supply will support chilli prices in coming days.
- Normal demand reported from Malaysia, Thailand, China, Bangladesh and Sri Lanka etc. Sources revealed that, Teja prices may go up further as export qualities available only at Andhra Pradesh and Telangana state. In Andhra Pradesh, still Chilli standing crop reported very crucial stage due to lower rainfall and in some areas virus infection reported. As per current situation, Andhra Pradesh chilli production likely to lower by 10% from earlier estimates. If hot weather condition continues in coming day's damage percentage may increase also.
- *As per Agriwatch's second advance production estimate, Red Chilli production for 2019-20 is estimated at 12.00 lakh MT compared to earlier estimates of 12.45 lakh MT. Previous year's production was 10.50 lakh MT.*
- Lower stocks supported chilli prices in the spot market. We expect that prices may not fall much further from current levels as cold storage stocks reported lower and new crop likely to enter in AP and Telangana market from last week of January.

JEERA (CUMIN SEED)

Fundamentals:
Today's Update:

- Mixed sentiment witnessed in Cumin seed market on Tuesday.
- As per Gujarat state govt. data, Jeera progressive area of Rabi 2018-19 is 306,389 hectares as on 17-12-2018 which is lower than 348,142 hectares during corresponding period last year. Till now 96.07% sowing completed from Normal area 318,926 hectares.
- As per current situation, Agriwatch expect farmers are likely to prefer Jeera over Coriander due to higher prices. But, lower rainfall may impact yield and in some areas of Saurashtra and Kutch regions area may come down 10% due to severe drought condition.
- Currently, all India stocks reported around 10 – 12 lakh bags (1 bag = 55 Kgs).
- We expect buyers may active from lower price level in the spot market due to lower sowing area current year.

Previous Update:

- Currently, normal export demand reported at Unjha spot market from current level from China, Singapore and Egypt etc.
- As per trade sources, in Gujarat, Jeera could trade up as sowing is lower due to lower rainfall. Besides, high demand amid lower stock availability is also likely to support the jeera prices.
- As per trade information, crop damaged reported in Syria and Turkey due to heavy rainfall in June support Indian Jeera in International market. Quality wise (due to heavy rainfall) and price wise Indian Jeera more affordable.
