## BLACK PEPPER

**Fundamentals:**
**Today's Update:**

- Steady sentiment witnessed in Black Pepper market on Saturday. Mostly market closed due to weekend.
- Buyers reported active in the spot market from lower price level. Lower production current year support the prices.
- According to the International Pepper Association (IPC), in 2019, Vietnam plans to produce about 175,000 tons of black pepper and 25,000 tons of white pepper, continuing to hold the position of the largest pepper producer and exporter. However, this figure is lower than last year due to the narrowing of pepper areas due to price pressures and diseases.
- This year Vietnam will focus on improving the quality of pepper rather than production. Therefore, it will focus on reducing the use of synthetic chemical pesticides and trying to develop organic pepper farms.
- Brazil is expected to become the world's second largest pepper producer with an output of about 67,000 tons, including 64,000 tons of black pepper and 3,000 tons of white pepper.
- Similar to Vietnam, Brazil's output is also expected to fall from the previous year's estimate. Estimates of output decline because Brazil has some aging pepper gardens while new plantations have not yet yielded.

**Previous Update:**

- As per trade information, during the period from January 2018 to October 2018 more than 20,000 tons of pepper was smuggled into the Indian market. The price of smuggled pepper is very cheap, only about 325 rupees / kg. The smuggling of the market has caused Indian pepper prices to drop sharply from 720 rupees / kg to less than half in the last 19 months. Meanwhile, domestic pepper production fell below 50,000 tons compared with consumption of 60,000 tons.
- According to Kampot Pepper Trade Promotion Association (Cambodia), pepper exports of the association in 2018 reached 50,000 tons, lower than the 80,000 tons in 2017. The country's output is also reduced by 30,000 tons compared to 2017, down to 70,000 tons due to unfavorable weather.
