### CORIANDER SEED

**Fundamentals:**
**Today's Update:**

- Steady to firm sentiment witnessed in Coriander spot markets on Monday.
- As per Agriwatch second advance production estimate, Coriander production for 2020-21 (marketing period) is estimated at 352,316 MT (88 lakh bags) compared to previous year's 268,957 MT (67 lakh bags, 1 bag = 40 kg).
- Coriander new crop supply entering at Neemuch, Ramganj, Kota and Gondal mandi with on an average 1000-2500 bags, however moisture content reported higher.

**Previous Update:**

- Coriander prices reported correction in the spot market from higher levels as standing crop quality reported well as of now. Expected good yield current year.
- Buyers may likely to active from lower prices like Rs.5,000/- level or some little correction than that, to go for active buying as ending stocks slowly come down and current year new crop reported delayed.*
- Increasing supply reported as Stockists were releasing their old stocks (2 – 3 years) in the spot market.
- In 2020-21 (marketing period), Agriwatch expected higher Coriander production due to increased sowing area in Rajasthan, Madhya Pradesh and Gujarat growing regions. Higher prices compared to last year and favourable weather condition is the main reason for increased in sowing area. *Though carryover stocks reported higher current year but ending stocks (AW estimate) for 2019-20 will be less compared to last three years likely to support Coriander prices in new season from lower levels.*
