CORIANDER SEED

Fundamentals:

Today's Update:

- By and large steady sentiment witnessed in Coriander spot market on Tuesday.

Previous Update:

- Farmers were holding back their produce an expectation of higher prices in the spot market.
- Buyers are likely to be active at the current level or may wait for some correction, to go for active buying as ending stocks slowly come down.
- As per Agriwatch final production estimate, Coriander production for 2020-21 (marketing period) is estimated at 352,316 MT (88 lakh bags) compared to previous year's 268,957 MT (67 lakh bags, 1 bag = 40 kg).
- In 2020-21 (marketing period), Agriwatch expected higher Coriander production due to increased sowing area in Rajasthan, Madhya Pradesh and Gujarat growing regions. Higher prices compared to last year and favourable weather condition is the main reason for increased in sowing area.
- Though carryover stocks reported higher current year but ending stocks (AW estimate) for 2019-20 will be less compared to last three years likely to support Coriander prices in new season from lower levels.
