

RED CHILLI**Fundamentals:****Today's Update:**

- By and large steady sentiments witnessed Red Chilli cash markets on Wednesday.

Previous Update:

- In Byadgi, new chilli arrivals reported around 50,000 bags, however mostly with high moisture and rain touch quality. As per trade sources, 20 - 30% rain touch medium quality reported.
- At Guntur spot market new crop arrivals reported around 15,000 – 17,000 bags from Kurnool, Prakasam regions with high moisture content, mostly rain touch quality ; however good quality expected to start from mid January onwards.
- As we said earlier, stockists should start to release their stocks before New Year.
- Red chilli prices reported down at Guntur market due to lower demand at higher levels. Expected higher production in coming marketing year is the main reason for prices correction. New crop supply slowly started with lower quantity and moisture quality, however good quality expected to start from January onwards. Agriwatch first estimates, Red Chilli all India production for 2021-22 is estimated at 13.84 lakh MT. Last year's production was 12.32 lakh MT.
- Teja variety prices reported down as buyers were not interested at higher prices in the spot market. Prices likely to correct in coming days.
- Due to this unseasonal rainfall new crop supply reported delayed by 15 – 20 days which supported the prices, but there is a decline in quality.
- Export demand from China and Bangladesh very less, however some fresh demand reported from Vietnam, Malaysia and Indonesia at Guntur market.
