

RED CHILLI

Fundamentals:

Today's Update:

- Steady sentiment witnessed in Red Chilli market on Tuesday.

Previous Update:

- Guntur market reopened today. As we expected, buyers reported active for cold storage arrivals.
- Chilli trade is happening from private warehouses at Guntur growing regions as farmers are bringing their produce. From 1st May to 02nd June around 7.5 to 8 lakh bags (1 bag = 40 Kgs) were traded, sources revealed.
- However, current Chilli prices are reported down by Rs.800/-qtl compared to before summer vacation due to quality issue.
- As per trade sources, as of now around 65 – 68 lakh bags (1 bag = 40 kgs) new chilli stored at Guntur cold storage of total capacity 70 lakh bags. AP total around 85 – 90 lakh bags stored as of now.
- Chilli traders are hopeful for prices going up after the Guntur market reopens as export quantities are pending for delivery to countries like China, Bangladesh, Sri Lanka etc. due to shortage of labour. Though current year India's Red Chilli production went up by 12% as per Agriwatch estimates from the previous year, but due to unseasonal rainfall during maturity stage quality reported damaged and supported the prices.
- Agriwatch estimates, Red Chilli all India production for 2021-22 is estimated at 13.84 lakh MT. Last year's production was 12.32 lakh MT.

CARDAMOM

Fundamentals

Today's Update:

- Continued steady sentiment witnessed in Delhi Cardamom spot market on Tuesday.

Previous Update:

- Currently, Spice Board has been suspended Cardamom e-auctions in Idukki, Kerala and Bodinayakanur in Tamil Nadu due to Covid-19. Around 95 per cent of the planters are depending on auctions to get a fair price for their produce.
- As per trade information, private sales are happening through farm gate level, but it is not helping the traders to receive the desired grades and quantity.
- Subdued demand in the upcountry markets has hit the sales and liquidity for buying in the consuming centers of Delhi, Rajasthan, Madhya Pradesh, Uttar Pradesh etc. in the second wave of Covid.
- India's production for the coming marketing year 2021-22 (which will start from August officially) expected better around 30,000 MT also put the cap on prices.
- Cardamom planters were received higher prices last two years, therefore, they are taking care of their plants and favourable weather condition, is the main reason for expecting good crop in the coming year.
- As we expected earlier, the new Cardamom supply pressurizes the prices from higher levels due to increased production.
- Agriwatch estimates for 2020-21, India's Cardamom production would be around 22,000 – 23,000 MT, due to favourable weather conditions. Last year it was 19,000 – 20,000 MT.
