

RED CHILLI

Fundamentals:

Today's Update:

- Steady sentiment witnessed in Red Chilli market on Wednesday.
- Current year Chilli sowing likely to start from July first or second week in major growing regions like AP, Telangana etc. We expect sowing area likely to go up by 30 – 40% as per current situation as farmers are receiving higher prices compared to last year.
- Current year, total value of Chilli seed for sowing is around Rs.10 crore compared to last year Rs.6 crore as farmers are more interested for chilli sowing.
- Buyers may inactive at higher prices due to overflow of chilli cold storage stocks in AP, Telangana, Karnataka and exporters demand are slow in the spot market due to increased shipping costs.

Previous Update:

- Due to coronavirus lockdown and shortage of labour Chilli export quantities are pending for delivery to countries like China, Bangladesh, Sri Lanka etc. Now aftermarket reopens trading is happening in the normal way which will support the prices going up.
- As per trade sources, as of now around 65 – 68 lakh bags (1 bag = 40 kgs) new chilli stored at Guntur cold storage of total capacity 70 lakh bags. AP total around 85 – 90 lakh bags stored as of now.
- Chilli traders are hopeful for prices going up Though current year India's Red Chilli production went up by 12% as per Agriwatch estimates from the previous year, but due to unseasonal rainfall during maturity stage quality reported damaged and supported the prices.
- Agriwatch estimates, Red Chilli all India production for 2021-22 is estimated at 13.84 lakh MT. Last year's production was 12.32 lakh MT.

TURMERIC

Fundamentals:

Today's Update:

- Continued steady sentiment witnessed in the Turmeric spot market on Wednesday.
- Turmeric sowing in Maharashtra slowly started, till now 15 to 20% sowing completed.

Previous Update:

- Expected lower production current year supported the prices in the spot market from lower levels.
- For the 2021-22 marketing period, Agriwatch expected 0.62 lakh MT ending stocks (with increasing exports and domestic consumption), which is lower than 0.98 lakh MT from last year, likely to support prices from the current level.
- Good domestic demand along with upcountry demand supported the prices.
- Agriwatch estimates, Turmeric all India production for 2021-22 is estimated at 4.46 lakh MT. Last year's production was 4.53 lakh MT.

BLACK PEPPER

Fundamentals:

Today's Update:

- Continued steady to weak sentiment witnessed in the Black pepper market on Wednesday.
- Continuous increasing supply in the spot market put cap on prices.
- Current year, from 1st January 2021 to 23rd June 2021, Black pepper supply up by 18.57% due to increased production current year.
- As of 23rd June, new pepper 500 G/L traded at Rs.39,100/-qtl, Rs.100 down from the previous day.
- As per trade information, Sri Lankan pepper production will increase by 25% in 2021 to 25,000 tons, and ending stocks would be around 2020 is about 12,000 tons. Meanwhile, Sri Lanka's domestic pepper consumption is reported at only 12,000 tons. Therefore, the possibility of a large amount of Sri Lankan pepper imported into India is very high and put cap on prices.
- Vietnam Pepper price today, went sideways in key provinces and cities in the country. Localities currently maintain purchasing in the range of 71,000 - 74,500 VND/kg. Currently, the highest price is 74,500 VND/kg available in Ba Ria - Vung Tau province. Following are the three provinces of Dak Lak, Dak Nong and Binh Phuoc with about 72,500-73,000 VND/kg. Similarly, the two provinces of Dong Nai and Gia Lai also did not record new changes, trading was stable at 71,000 VND/kg and 71,500 VND/kg, respectively.

Previous Update:

- According to the International Pepper Organization (IPC), Vietnam's 2021 pepper harvest will reach 180,000 MT, down 40,000 tons compared to the previous forecast, and 60,000 tons lower (down 25%) compared to with the 2020 harvest.
- Vietnam pepper exports decreased by 15.6% in volume over the same period in 2020, reaching 124,000 tons, from January to May. The average export price reaching 3,127 USD/ton, up 48.2% over the same period in 2020.
- Pepper planter's are holding their produce, as they are not interested to supply their produce at the current prices level also lower market movement due to lockdown in Kerala growing regions added the bullish sentiment.
- Domestic pepper farmers have called for the intervention of the Spices Board to ensure the purchasing and marketing for processors, dealers and consumers is taking place in accordance with their requirements. They pointed out restrictions on spice buyers and traders, especially in the two districts of Idukki and Wayanad in Kerala growing state, amid the shutdown due to the COVID-19 pandemic.
- The state's industrial regulator allowed processing units to operate, as spices belong to the food industry and are directly related to exports. However, processing units are having difficulty meeting domestic demand from Masala's manufacturers when raw materials are not available for processing.
- As per trade information, last few years very large quantities (on an average yearly around 5,000 MT) of pepper imported from Vietnam via Nepal and Myanmar to India illegally, but from last two years its banned, which was supported the Indian pepper prices and it will support the prices further in coming days.
- Currently, increasing demand coming from North-Eastern states, Bihar, West Bengal, Jharkhand etc. which was not coming in this way for the last few years as a result of illegal trade and growing domestic demand from other states likely to support pepper prices further.
- According to International Pepper Organization (IPC), in 2021, global pepper production is expected to reach 555 thousand tons, down 21 thousand tons compared to 2020 (576 thousand tons).
- Global pepper exports in 2020 recorded a slight increase of 2% at 481 thousand tons. The top three exporters are Vietnam, Brazil and Indonesia with a total market share of 89%.

- Currently, Vietnam has completed the harvest of the new pepper season. Pepper output in this crop is estimated at 180,000 tons, down 25-30% from the previous year. Although the official number has not been announced.

JEERA (CUMIN SEED)

Fundamentals:

Today's Update:

- Continued mixed sentiment witnessed in Jeera Unjha spot market on Wednesday.
- Currently, due to coronavirus fear buyers are reported uncertain for upcoming market condition, so they are avoiding going for higher buying. However, as Jeera prices reported lower compared to last year, domestic buyers and exporters may active in the spot market in the coming days.

Previous Update

- In Unjha benchmark market new crop supply reported at around 15,000 to 20,000 bags on an average daily basis.
- Export demand continuing at the Unjha spot market.
- As per the Agriwatch production estimate, Jeera production for 2021-22 (marketing period) is estimated at 391,801 MT (around 71 lakh bags each of 55 kg) compared to last year's 451,451 MT (82 lakh bags).

CARDAMOM

Fundamentals

Today's Update:

- Continued steady sentiment witnessed in Delhi Cardamom spot market on Wednesday.

Previous Update:

- Currently, Spice Board has been suspended Cardamom e-auctions in Idukki, Kerala and Bodinayakanur in Tamil Nadu due to Covid-19. Around 95 per cent of the planters are depending on auctions to get a fair price for their produce.
- As per trade information, private sales are happening through farm gate level, but it is not helping the traders to receive the desired grades and quantity.
- Subdued demand in the upcountry markets has hit the sales and liquidity for buying in the consuming centers of Delhi, Rajasthan, Madhya Pradesh, Uttar Pradesh etc. in the second wave of Covid.
- India's production for the coming marketing year 2021-22 (which will start from August officially) expected better around 30,000 MT also put the cap on prices.
- Cardamom planters were received higher prices last two years, therefore, they are taking care of their plants and favourable weather condition, is the main reason for expecting good crop in the coming year.
- As we expected earlier, the new Cardamom supply pressurizes the prices from higher levels due to increased production.
- Agriwatch estimates for 2020-21, India's Cardamom production would be around 22,000 – 23,000 MT, due to favourable weather conditions. Last year it was 19,000 – 20,000 MT.

CORIANDER SEED

Fundamentals:

Today's Update:

- Steady to firm sentiment witnessed in Coriander spot market on Wednesday.

Previous Update:

- Coriander spot market reopened on yesterday after coronavirus lockdown, rest markets likely to reopen from the second week of June.
- Buyers are likely to be active further from the current level to go for active buying as ending stocks slowly come down.
- Agriwatch estimates lower ending stocks for 2021-22 (marketing year) likely to support Coriander prices in the coming days.
- As per Agriwatch production estimate, Coriander production for 2021-22 (marketing year) is estimated at 342,435 MT (85 lakh bags) compared to last year's 352,316 MT (88 lakh bags, 1 bag = 40 kg).
- We expect the 2021-22 marketing year likely to be good for Coriander.
