- Continuous supply in the spot market pressurizes the prices at higher levels.
- The decrease in supply in Vietnam is the main reason for pushing up world pepper prices in recent years and the price level is currently at the highest level since the end of 2017 until now.

In Brazil, pepper production is forecast to decline sharply in 2021 as the country is likely to face a severe drought from June to September. This is forecast to be the worst drought in 91 years.
- According to the International Pepper Organization (IPC), Vietnam's 2021 pepper harvest will reach 180,000 MT, down 40,000 tons compared to the previous forecast, and 60,000 tons lower (down 25%) compared to with the 2020 harvest.
