#### **Previous Update:**

- World pepper market likely to be active in coming days due to an increase in demand after lockdown and reduced supplies from Brazil and Vietnam as a result of lower production.
- According to data from the International Trade Center (ITC), Brazil's pepper exports in the first five months of this year fell by 4.3% year-on-year to 41 thousand tons.
- In Brazil, the second pepper harvest is expected to begin in late August and early September with an output of about 25,000 tons. Although the delivery in this country is faster, the purchase price is higher than in Vietnam.
- With the current situation, the export volume of pepper from Indonesia and Brazil for the second half of 2021 is expected to reach a maximum of about 50,000 - 60,000 tons
- In the first 19 days of July 2021, the export prices of black pepper in India and Vietnam decreased compared to the end of June 2021. Meanwhile, export prices in Brazil were stable, export prices in Indonesia and Malaysia increased slightly. For white pepper products, export prices in Indonesia increased while prices in Vietnam and Malaysia decreased.
- India's pepper exports in the first quarter of 2021 reached 6,020 tons. In which, exports of crushed pepper accounts for 54% of India's total exports.
- World pepper market will be active in the third quarter of 2021 due to an increase in demand after the US and European countries relax social distancing measures. Pepper prices are expected to stay high due to reduced supplies from Brazil, Indonesia and Vietnam, as per VPA.
- *As per trade information, Sri Lankan pepper production will increase by 25% in 2021 to 25,000 tons. Meanwhile, Sri Lanka's domestic pepper consumption is reported at only 12,000 tons. Therefore, the possibility of a large amount of Sri Lankan pepper imported into India is very high and put cap on prices.*
- *As per trade information, the amount of Sri Lankan pepper entered the domestic market from January to April 2021 was 4,000 tons, the highest level recorded in the past three years.*
- According to VPA, Vietnam's pepper exports in June 2021 reached 34,000 tons, worth \$120 million, up 21.6% in volume and 25.2% in value compared to May 2021. compared to June 2020 increased by 68.5% in volume and 156.9 % in value.
- Generally in the first 6 months of 2021, Vietnam's pepper exports are estimated at 155,000 tons, worth 500 million USD, down 6.7% in volume, but up 40.6% in value over the same period in 2020.
- The decrease in supply in Vietnam is the main reason for pushing up world pepper prices in recent years and the price level is currently at the highest level since the end of 2017 until now.
- In Malaysia, pepper farmers are now almost unable to harvest and sell their products to the market, even though it is the main time, due to the complicated harvest developments of the pandemic. In Brazil, pepper production is forecast to decline sharply in 2021 as the country is likely to face a severe drought from June to September. This is forecast to be the worst drought in 91 years.

- According to the International Pepper Organization (IPC), Vietnam's 2021 pepper harvest will reach 180,000 MT, down 40,000 tons compared to the previous forecast, and 60,000 tons lower (down 25%) compared to with the 2020 harvest.
