

RED CHILLI

Fundamentals:

Today's Update:

- Red Chilli market reported steady on Tuesday.
- Currently, green chilli prices reported around Rs.12 to 14/-kg as compared to last year Rs.30 to 35/-kg, farmers are not interested for green chilli picking activity, so red chilli production (as farmers are waiting for full maturity) likely to go up compared to last year.

- Agriwatch first advance estimates, Red Chilli all India production for 2022-23 (marketing year) is estimated at 15.93 lakh MT. Last year's production was 13.84 lakh MT, up by 15.10% from last year.
- As per AP agricultural data as on 01st September, current year chilli sowing completed around 76,941 hectares, compared to last year 60,801 hectares. Normal in season 137,946 hectares. Chillies sowings and transplantation are under progress.
- Overall, the average rainfall received in Andhra Pradesh from 01.06.2021 to 01.09.2021 is recorded as 427.3 mm as against the Normal as on date of 408.2 mm showing by Normal 4.7 percent.
- Lower rainfall reported in Chilli growing regions in MP.
- Buyers may inactive at current higher prices due to overflow of chilli cold storage stocks in AP, Telangana, Karnataka and expectations of increase in sowing area.
- Current year premium variety like Teja quality lower due to unseasonal rainfall during maturity stage, which support the chilli prices despite of higher production.
- Chilli prices will move further depend on export demand. Buyers are active at lower levels; chilli prices are lower compared to last year. Currently, good demand for premium quality Teja variety, if Teja prices come down, other variety will come down.
- Chilli sowing area likely to go up by 20 30% as farmers are receiving higher prices compared to last year.
 Cotton area likely to shift to Chilli in AP and Telangana.
- In AP, cotton area likely to shift in the districts like Guntur, Krishna, East Godavari, Visakhapatnam, Vizianagaram and Srikakulam etc.

TURMERIC

Fundamentals: Today's Update:

 Steady sentiment witnessed in the Turmeric spot market on Tuesday. Mostly market closed due to Amavasya.

- Agriwatch first advance estimates, Turmeric all India production for 2022-23 (marketing year) is estimated at 4.89 lakh MT. Last year's production was 4.46 lakh MT, up by 9.64% from last year.
- As per AP agricultural data as on 01st September, current year Turmeric sowing completed around 12,841 hectares, compared to last year 13,367 hectares. Normal in season 19,551 hectares.
- Festive demand likely to start from September onwards may support prices amid some crop damage reports in Maharashtra and Telangana may add the sentiment.
- For the 2021-22 marketing period, Agriwatch expected 0.62 lakh MT ending stocks (with increasing exports and domestic consumption), which is lower than 0.98 lakh MT from last year, likely to support prices from the current level.

BLACK PEPPER

Fundamentals: Today's Update:

Steady to weak sentiment witnessed in the Black pepper market on Tuesday.

- Vietnam Pepper prices today (September 6) went sideways after dropping 500 dong/kg at the end of last week. Pepper price today leveled off, continuing to record an average of 75,000 VND/kg.
- Many farmers have been concerned that the availability of imported pepper reduces growers' prospects, especially during the recent Onam festival season. Meanwhile, demand is expected to increase in the near term.
- Shortage of containers and international freight rates skyrocketed affect pepper exports.
- The average export price of Vietnam pepper in the first 7 months of the year was about 3,291 USD/ton, up 51% over the same period last year.
- As per VPA, the Southeast and the Central Highlands are the two key regions for pepper development in
 the country. In these two areas, each cycle of pepper prices increased to a peak of 220,000 VND/kg,
 causing people to rush to grow pepper. But pepper prices also hit the bottom last year, at VND 34,000/kg,
 prompting households to cut them all down to plant other crops. And now, when pepper prices start to
 fluctuate and increase to 76,000 77,000 VND/kg, people are starting to plant new ones.
- Vietnam pepper from 2016 to the end of 2020, prices plummeted, sometimes only 34,000 VND/kg, households cut down pepper trees and switched to other crops, causing the area of pepper trees to decrease rapidly. Compared to 2016, Binh Phuoc now has 15,889 ha (down 563 ha) and the same situation also occurs in many other localities, such as: Dong Nai reduced by 1,638 ha to 12,000 ha, Ba Ria Vung Tau reduced by 2,000 ha to 11,000 ha and Gia Lai decreased by 2,649 ha to 13,673.2 ha. Accompanied by a decrease in productivity, due to lack of care, pepper reduces both yield and quality.
- Although the actual pepper area (130,000 Ha.) has far exceeded the planned area (50,000 Ha.), but due to the increase in pepper prices, people continue to plant new ones.
- According to VPA, black pepper in the first half of 2021, exports of black pepper reached 118.54 thousand tons, down 11.2% in volume, but up 38.3% in value over the same period last year. 2020. In which, the amount of black pepper exported to many main markets reported, such as: China, India, Egypt, Germany, Russia.
- World pepper market will be active in the third quarter of 2021 due to an increase in demand after the US and European countries relax social distancing measures. Pepper prices are expected to stay high due to reduced supplies from Brazil, Indonesia and Vietnam, as per VPA.
- According to the International Pepper Organization (IPC), Vietnam's 2021 pepper harvest will reach 180,000 MT, down 40,000 tons compared to the previous forecast, and 60,000 tons lower (down 25%) compared to with the 2020 harvest.
- According to International Pepper Organization (IPC), in 2021, global pepper production is expected to reach 555 thousand tons, down 21 thousand tons compared to 2020 (576 thousand tons).
- Global pepper exports in 2020 recorded a slight increase of 2% at 481 thousand tons. The top three exporters are Vietnam, Brazil and Indonesia with a total market share of 89%.

JEERA (CUMIN SEED)

Fundamentals: Today's Update:

• By and large steady sentiment witnessed in Jeera Unjha spot market on Tuesday.

- As we expected, buyers are active in the spot market from lower prices level. Farmers and stockists are only interested to releasing their produce at higher prices level.
- Currently lower rainfall reported in Gujarat Jeera growing regions also supported the prices. Current year Jeera sowing area may shift towards Soybean, Groundnut, Coriander, Ajwain, Fennel due to higher prices, sowing will start from October mid-week.
- As we expected earlier, domestic buyers and exporters reported active in the spot market from lower prices level.
- Lower supply reported as farmers are only interested to releasing their stocks at higher prices level.
- Export demand continuing at the Unjha spot market.
- As per the Agriwatch production estimate, Jeera production for 2021-22 (marketing period) is estimated at 391,801 MT (around 71 lakh bags each of 55 kg) compared to last year's 451,451 MT (82 lakh bags).

CARDAMOM

Fundamentals

Today's Update:

- Steady to weak sentiment witnessed in Cardamom spot market on Tuesday.
- Cardamom first round picking activity is continuing in Kerala growing regions.

- India's production for the coming marketing year 2021-22 (already started from August) expected better around 30,000 MT also put the cap on prices.
- Lower supply reported as Cardamom planters are not interested to releasing their produce at lower level.
- Cardamom planters were received higher prices last two years, therefore, they are taking care of their plants and favourable weather condition, is the main reason for expecting good crop in the coming year.
- As we expected earlier, the new Cardamom supply pressurizes the prices from higher levels due to increased production.
- Agriwatch estimates for 2020-21, India's Cardamom production would be around 22,000 23,000 MT, due to favourable weather conditions. Last year it was 19,000 20,000 MT.

CORIANDER SEED

Fundamentals: Today's Update:

Mixed sentiment witnessed in Coriander spot market on Tuesday.

- Buyers from consumer center like Bihar, UP are active in the spot market mainly in Gondal, Kota, Ramganj etc. mandi due to good quality.
- Increasing arrivals reported in the spot market. Farmers are releasing their produce as coriander prices are higher compared to last year.
- Currently buyers reported inactive at the spot market. However, they may active in coming days as ending stocks slowly come down.
- Agriwatch estimates lower ending stocks for 2021-22 (marketing year) likely to support Coriander prices in the coming days.
- As per Agriwatch production estimate, Coriander production for 2021-22 (marketing year) is estimated at 342,435 MT (85 lakh bags) compared to last year's 352,316 MT (88 lakh bags, 1 bag = 40 kg).
