### Fundamentals:

#### Today's Update:

- Steady sentiment witnessed in Red Chilli spot market on Wednesday.

#### Previous Update:

- At Byadgi market, new chilli arrivals reported around 250 bags.
- As per AP agricultural data as of 29th September, current year chilli sowing completed around 138,357 hectares, compared to last year 116,737 hectares. Normal in season 137,946 hectares. Chillies transplantations are under progress.
- Overall, the average rainfall received in Andhra Pradesh from 01.06.2021 to 29.09.2021 is recorded as 603.9 mm as against the Normal as on date of 549.1 mm.
- In MP, due to heavy rainfall in Chilli growing regions is hampering the chilli drying process. As per the current situation, new chilli arrivals from MP are likely to delay by 15 to 20 days, earlier it was expected from the first week of October. Overall chilli standing crop is reported well, expected higher production compared to last year.
- Buyers are inactive at current higher prices due to overflow of chilli cold storage stocks in AP, Telangana, Karnataka and expectations of increase in sowing area.
- Buyers reported inactive at Byadgi market today. New chilli arrivals reported around 100 bags with moisture around 15%.
- No crop damage reported in AP and Telangana, standing crop quality reported good as of now.
- Currently, in MP green chilli prices reported around Rs.12 to 14/-kg as compared to last year Rs.30 to 35/-kg, farmers are not interested for green chilli picking activity, so red chilli production (as farmers are waiting for full maturity) likely to go up compared to last year.
- **Agriwatch first advance estimates, Red Chilli all India production for 2022 is estimated at 15.93 lakh MT. Last year's production was 13.84 lakh MT, up by 15.10% from last year.**
- Chilli prices will move further depend on export demand. Buyers are active at lower levels; chilli prices are lower compared to last year. Currently, good demand for premium quality Teja variety, if Teja prices come down, other variety will come down.

- The complicated development of the Covid-19 epidemic is the cause of Vietnam's pepper exports to decrease in August 2021. Generally in the first 8 months of 2021, pepper export is estimated at over 197 thousand tons, worth 654.6 million USD, down 2.3% in volume, but up 47.6% in value over the same period in 2020. - Shortage of containers and international freight rates skyrocketed affect pepper exports.
- World pepper market will be active in the third quarter of 2021 due to an increase in demand after the US and European countries relax social distancing measures. Pepper prices are expected to stay high due to reduced supplies from Brazil, Indonesia and Vietnam, as per VPA.

- New Cardamom supply continued into the market as first round picking activity is going on in Kerala growing regions and it will continue till October first week. Expectations of higher production current year may cap on prices in coming days.
- India's production for the coming marketing year 2021-22 (already started from August) expected better around 30,000 MT also put the cap on prices.
- Lower supply reported as Cardamom planters are not interested to releasing their produce at lower level.
- Cardamom planters were received higher prices last two years, therefore, they are taking care of their plants and favourable weather condition, is the main reason for expecting good crop in the coming year.
- As we expected earlier, the new Cardamom supply pressurizes the prices from higher levels due to increased production.
- Agriwatch estimates for 2020-21, India's Cardamom production would be around 22,000 – 23,000 MT, due to favourable weather conditions. Last year it was 19,000 – 20,000 MT.
