- Generally, in the first 9 months of 2021, Brazil's pepper exports reached 61,845 tons, down 8.7% over the same period last year.

Previous Update:

- Facing erratic climate in some areas such as Hassan, Chikkamagaluru and Kodagu, pepper growers in Karnataka state (India) are worried about a decrease in production this year. Continuous rain has increased the moisture in the soil, harming the growth of pepper plants
- Continued lower supply reported in the Kochi spot market as stockists are holding back their stocks an expectation of further higher prices in coming days.
- Due to lower supply from other producing countries in the global market, demand shifted to Indian market supported the domestic prices despite of higher production.
- Fresh domestic demand in the spot market as winter season is approaching supported the prices.
- According to trade sources, purchasing power from major import markets such as Europe, US, China, Middle East and Africa... is still very large due to the strong increase in orders in the fourth quarter to meet year-end demand.
- *Vietnam Pepper prices is expected to increase continue till the last months of the year because the pepper production of Vietnam as well as some major pepper producing countries such as Brazil and Indonesia are affected by climate change, so the annual output is expected to decrease continually.*
