## **BLACK PEPPER**

### **Fundamentals:**

#### **Today's Update:**

- Steady to firm sentiment witnessed in Black pepper spot market reported on Tuesday.
- *Lower production expectations supported the domestic pepper prices. As per current situations, Agriwatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.*
- *Agriwatch expects, black pepper prices likely to go up further around Rs.70,000 – 75,000/-qtl, as other producing countries new crop arrivals likely to start from March in Vietnam and expected lower production. So, domestic as well as international buyers are looking for Indian variety.*
- Facing erratic climate in some areas such as Hassan, Chikkamagaluru and Kodagu, pepper growers in Karnataka state (India) are worried about a decrease in production this year. Continuous rain has increased the moisture in the soil, harming the growth of pepper plants.
- Vietnam Pepper price as on 23<sup>rd</sup> November in the range of 81,500 - 84,000 VND/kg. Vietnam's export prices of black and white pepper remained stable, while Indian and Indonesian pepper prices increased.
- In Dak Lak and Dak Nong provinces, today's pepper price is purchased at 82,500 VND/kg. In Gia Lai province, pepper price today is at 81,500 VND/kg. - According to data from the Brazilian Ministry of Industry, Foreign Trade and Services (MDIC), in September, the country exported 6,018 tons of pepper, a sharp increase of 44.5% compared to August and an increase of 19.3%. compared with the same period last year.
- Continued lower supply reported in the Kochi spot market as stockists are holding back their stocks an expectation of further higher prices in coming days.
- **Due to lower supply from other producing countries in the global market, demand shifted to Indian market supported the domestic prices despite of higher production (2020-21).**
- Fresh domestic demand in the spot market as winter season is approaching supported the prices.
- According to trade sources, purchasing power from major import markets such as Europe, US, China, Middle East and Africa... is still very large due to the strong increase in orders in the fourth quarter to meet year-end demand.
- Vietnam Pepper prices is expected to increase continue till the last months of the year because the pepper production of Vietnam as well as some major pepper producing countries such as Brazil and Indonesia are affected by climate change, so the annual output is expected to decrease continually.
