

RED CHILLI

Fundamentals:

Today's Update:

- Steady sentiment was witnessed in Red Chilli spot market on Tuesday.
- Due to unseasonal rainfall in Chilli growing regions and some crop damage report prices reported up.

- Lower cold storage supply as stockists were holding their stocks supported the prices today. Good demand
 reported for cold storage stocks as buyers were fearing quality damage for new chilli crop which likely to
 start from January at Guntur market.
- As per Agriwatch estimates, Red Chilli all India production for 2022 is estimated at 14.66 lakh MT, revised after rainfall in Karnataka and virus affected in AP and Telangana, earlier estimates it was 15.93 lakh MT. Last year's production was 13.84 lakh MT.
- In AP and Telangana, Red Chilli standing crop affected by virus, farmers are uprooting their crop. Actual damage percentage not clear till now, it will clear by next week.
- Due to heavy rainfall in Karnataka chilli growing regions likely to impact chilli standing crop. As per initial report, chilli crop may damage by 8 to 10% as per current situations. Farmers are fearful regarding chilli quality also. Next 10 -15 days is crucial.
- At Bedia (Madhya Pradesh) market, chilli prices reported up due to good demand. Buyers are interested only for good quality. Farmers are waiting for higher prices for releasing their produce.

TURMERIC

Fundamentals: Today's Update:

- Mixed sentiment was witnessed in Turmeric spot markets on Tuesday.
- Due to unseasonal rainfall in Turmeric growing regions supported the prices. Buyers were active for old stocks in the spot market.

- Turmeric standing crop quality is reported well as of now. However, continuous rainfall and cloudy weather
 in growing regions in AP and Telangana may concern for Turmeric crop. As of now, no crop damage
 reported.
- Agriwatch first advance estimates, Turmeric all India production for 2022 is estimated at 4.89 lakh MT. Last year's production was 4.46 lakh MT, up by 9.64% from last year.

BLACK PEPPER

Fundamentals: Today's Update:

- Steady to firm sentiment witnessed in Black pepper spot market reported on Tuesday.
- Vietnam Pepper prices is in the range of 84,000 86,000 VND/kg. In the first days of December 2021, domestic pepper prices continuously fluctuated in opposite directions. In Dak Lak and Dak Nong provinces, today's pepper price is purchased at 85,000 VND/kg. In Gia Lai province, pepper price today is at 84,000 VND/kg. Meanwhile in Dong Nai, pepper price today is at 84,000 VND/kg, down 500 VND/kg. In Ba Ria Vung Tau province, today's pepper price is at 86,000 VND/kg, down 500 VND/kg.
- According to the Department of Agricultural Product Processing and Market Development Vietnam, the
 export price of pepper has increased sharply, leading to a continuous increase in pepper prices in the
 domestic market. At the beginning of the year, the price of raw pepper was only at 50,000 VND/kg by midOctober, it surpassed the 90,000 VND/kg mark and is expected to increase by over 100,000 VND/kg by the
 end of the year.
- According to local sources, farmers in the Dong Nai province have begun to harvest pepper. The selling
 price at the garden is about 80,500 90,000 VND/kg, more than doubled compared to the region last
 year. The early harvest of this local pepper is a great advantage. Pepper farmers in the province make good
 profits. In early 2021, with more than 12,000 hectares, pepper is a crop that consumes a large area in Dong
 Nai, so it can be said that pepper is still the main crop of the province.

- Continuous supply in the spot market put cap on prices from higher levels.
- Lower production expectations supported the domestic pepper prices. As per current situations, Agriwatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.
- Agriwatch expects, black pepper prices likely to go up further around Rs.70,000 75,000/-qtl, as other
 producing countries new crop arrivals likely to start from March in Vietnam and expected lower production.
 So, domestic as well as international buyers are looking for Indian variety.
- Facing erratic climate in some areas such as Hassan, Chikkamagaluru and Kodagu, pepper growers in Karnataka state (India) are worried about a decrease in production this year. Continuous rain has increased the moisture in the soil, harming the growth of pepper plants.
- Vietnam pepper export from January to October 2021, was reported around 229,736 tons, compared to the same period in 2020, the export volume decreased by 5%. Progressively from January to October 2021, Vietnam imported 21,977 tons, of which black pepper reached 16,322 tons, white pepper reached 5,655 tons, compared to the same period in 2020, the import volume decreased by 29.1%.
- Due to lower supply from other producing countries in the global market, demand shifted to Indian market supported the domestic prices despite of higher production (2020-21).
- Fresh domestic demand in the spot market as winter season is approaching supported the prices.
- According to trade sources, purchasing power from major import markets such as Europe, US, China, Middle East and Africa... is still very large due to the strong increase in orders in the fourth quarter to meet year-end demand.
- Vietnam Pepper prices is expected to increase continue till the last months of the year because the pepper production of Vietnam as well as some major pepper producing countries such as Brazil and Indonesia are affected by climate change, so the annual output is expected to decrease continually.

JEERA (CUMIN SEED)

Fundamentals: Today's Update:

- By and large mixed sentiment witnessed in Jeera Unjha spot market on Tuesady.
- According to Gujarat Agri. Dept, as on 06th December, 237,866 hectares as compared to last year same period 381,055 hectares.
- Current year, Jeera sowing started in Rajasthan and Gujarat growing regions, as of now 56 to 60% sowing completed. Market participants are expecting lower sowing area as jeera prices are lower compared to other competitive crop like Coriander, Ajwain, Fennel etc.

- Spices Board, vide circular cited under referece 02 had notified about the forthcoming requirement of
 cleared pesticide test report issued by the competent authority for export of Cumin consignments from India
 to China. Further, in line with the requirements put in place by the General Administration of Customs,
 People's Republic of China {GACC}, it has been decided to include testing of pesticide residues in Cumin
 seeds under the mandatory regime of the Board, for export to China. Therefore, with effect from I3rh
 December, 2O2I exports of Cumin seeds to China will be permitted only with the Cleared analytical Report
 from Spices Board.
 - (For details http://www.indianspices.com/trade/trade-notifications/notificationdetails.html?id=272)
- As festive demand started buyers reported active from lower prices level.
- Farmers and stockists are only interested to releasing their produce at higher prices level.
- As per the Agriwatch production estimate, Jeera production for 2021-22 (marketing period) is estimated at 391,801 MT (around 71 lakh bags each of 55 kg) compared to last year's 451,451 MT (82 lakh bags).

CARDAMOM

Fundamentals

Today's Update:

- Steady to firm sentiment witnessed in Cardamom spot market on Tuesday.
- Third round picking activity started from November first week and it is about to end soon.

- Due to recent flood in Kerala growing regions like Idukki affected the Cardamom plants. As per trade sources, around 10% crop loss reported till now.
- India's production for the coming marketing year 2021-22 (already started from August) expected better around 27,000 MT also put the cap on prices. Last year it was 23,000 MT.
- Cardamom planters were received higher prices last two years, therefore, they are taking care of their plants and favourable weather condition, is the main reason for expecting good crop in the coming year.
- As we expected earlier, the new Cardamom supply pressurizes the prices from higher levels due to increased production.

CORIANDER SEED

Fundamentals:

Today's Update:

- Steady sentiment witnessed in Coriander spot market on Tuesday.
- Current year, Coriander sowing continued started in Rajasthan, MP and Gujarat growing regions, as of now 80 to 85% sowing completed.
- According to Gujarat Agri. Dept, as on 06th December, 108,923 hectares as compared to last year same period 115,969 hectares.

- As per Agriwatch initial sowing report, in MP Neemuch and Mandsour growing regions farmers are shifting Coriander crop to Ajwain and Garlic due to better price realisation, however actual scenario likely to come after 15 to 20 days.
- As we expected buyers are active from lower prices level as festival season started.
- Farmers want to release their produce at higher prices only.
- Agriwatch estimates lower ending stocks for 2021-22 (marketing year) likely to support Coriander prices in the coming days.
- As per Agriwatch production estimate, Coriander production for 2021-22 (marketing year) is estimated at 342,435 MT (85 lakh bags) compared to last year's 352,316 MT (88 lakh bags, 1 bag = 40 kg).
