

RED CHILLI**Fundamentals:****Today's Update:**

- Steady to firm sentiment was witnessed in Red Chilli spot market on Tuesday.

Previous Update:

- At Byadgi market, Cold dabbi and KDL quantity prices up by Rs.1,000/- quintal, 2043 sales slow and others steady.
- Lower cold storage supply as stockists and farmers were holding their stocks in the spot market. At Guntur market, supply down by 7% during last week compared to previous week.
- As we mentioned earlier, prices were reported up due to rainy weather and pest attack in Andhra Pradesh, Telangana and Karnataka. Farmers are concerned regarding chilli quality also. Next couple of weeks are crucial.
- Buyers were active for cold storage stocks. Exporters demand also reported well as they were concerned about new chilli quality.
- *As per Agriwatch estimates, Red Chilli all India production for 2022 is estimated at 14.66 lakh MT, revised after rainfall in Karnataka and virus affected in AP and Telangana , earlier estimates it was 15.93 lakh MT. Last year's production was 13.84 lakh MT.*
- *Due to heavy rainfall in Karnataka chilli growing regions likely to impact chilli standing crop. As per initial report, chilli crop may damage by 8 to 10% as per current situations. Farmers are fearful regarding chilli quality also. Next 10 -15 days is crucial.*
- At Bedia (Madhya Pradesh) market, chilli prices reported up due to good demand. Buyers are interested only for good quality. Farmers are waiting for higher prices for releasing their produce.

TURMERIC

Fundamentals:
Today's Update:

- Continued steady sentiment was witnessed in Turmeric spot markets on Tuesday.
- As per Agriwatch estimates, Turmeric all India production for 2022 is estimated at 4.67 lakh MT, revised after crop damage due to excessive rainfall in Maharashtra, AP and Telangana, earlier estimates it was 4.89 lakh MT. Last year's production was 4.46 lakh MT.

Previous Update:

- In Maharashtra, Basmat and Hingoli Turmeric growing regions some crop damage report came due to water logging in the field as a result of continuous rainfall. As of now damage percentage likely to be around 8 to 10%. Buyers were active for old stocks in the spot market.
- Turmeric prices reported up by Rs.700 - 1,200/-qtl from last week, depend on variety in Nanded and Basmat spot market.

BLACK PEPPER

Fundamentals:
Today's Update:

- Steady to weak sentiment witnessed in Black pepper spot market reported on Tuesday.
- Vietnam Pepper prices today (December 14) were stable in the domestic market. Currently, the highest price recorded is 83,500 VND/kg and the lowest is 81,000 VND/kg.
- According to the survey, pepper price today remained unchanged compared to yesterday. Localities currently trade in the range of 81,000 - 83,500 VND/kg. Specifically, Gia Lai and Dong Nai provinces continued to record the lowest level of 81,000 VND/kg. Higher than 1,000 VND/kg are the two provinces of Dak Lak and Dak Nong with the same stable price of 82,000 VND/kg. Similarly, the two provinces of Binh Phuoc and Ba Ria - Vung Tau also maintained purchasing at prices of 82,500 VND/kg and 83,500 VND/kg, respectively.

Previous Update:

- According to statistics from the Malaysian Bureau of Statistics, in the first nine months of 2021, Malaysia pepper exports up 17.9% over the same period last year. In the domestic market of Malaysia, the Malaysian Pepper Board (MPB) is currently focusing on efforts to improve the quality of pepper at the farm level through the selection of varieties grown for high production of white and black pepper. grade with export quality. This factor has helped Malaysia become a major competitor with other pepper producing countries in the world such as Vietnam, Indonesia and India.
- Malaysia is currently one of the largest pepper producers and exporters in the world. With the help and encouragement from the Government, the country is expected to be in a better position as the world's leading pepper producer in the future.
- According to the Department of Agricultural Product Processing and Market Development Vietnam, the export price of pepper has increased sharply, leading to a continuous increase in pepper prices in the domestic market. At the beginning of the year, the price of raw pepper was only at 50,000 VND/kg by mid-October, it surpassed the 90,000 VND/kg mark and is expected to increase by over 100,000 VND/kg by the end of the year.
- According to local sources, farmers in the Dong Nai province have begun to harvest pepper. The selling price at the garden is about 80,500 - 90,000 VND/kg, more than doubled compared to the region last year. The early harvest of this local pepper is a great advantage. Pepper farmers in the province make good profits. In early 2021, with more than 12,000 hectares, pepper is a crop that consumes a large area in Dong Nai, so it can be said that pepper is still the main crop of the province.
- Continuous supply in the spot market put cap on prices from higher levels.
- Lower production expectations supported the domestic pepper prices. As per current situations, Agriwatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.
- Agriwatch expects, black pepper prices likely to go up further around Rs.70,000 – 75,000/-qtl, as other producing countries new crop arrivals likely to start from March in Vietnam and expected lower production. So, domestic as well as international buyers are looking for Indian variety.
- Due to lower supply from other producing countries in the global market, demand shifted to Indian market supported the domestic prices despite of higher production (2020-21).
- Fresh domestic demand in the spot market as winter season is approaching supported the prices.
- Vietnam Pepper prices is expected to increase continue till the last months of the year because the pepper production of Vietnam as well as some major pepper producing countries such as Brazil and Indonesia are affected by climate change, so the annual output is expected to decrease continually.

JEERA (CUMIN SEED)

Fundamentals:
Today's Update:

- Mixed sentiment witnessed in Jeera Unjha spot market on Tuesday.
- Current year, Jeera sowing started in Rajasthan and Gujarat growing regions, as of now 65 to 70% sowing completed. Market participants are expecting lower sowing area as jeera prices are lower compared to other competitive crop like Coriander, Ajwain, Fennel etc.
- According to Gujarat Agri. Dept, as on 13th December, 274,298 hectares as compared to last year same period 453,704 hectares.

Previous Update

- Current year, Jeera sowing started in Rajasthan and Gujarat growing regions, as of now 56 to 60% sowing completed. Market participants are expecting lower sowing area as jeera prices are lower compared to other competitive crop like Coriander, Ajwain, Fennel etc.
- Spices Board, vide circular cited under referece 02 had notified about the forthcoming requirement of cleared pesticide test report issued by the competent authority for export of Cumin consignments from India to China. Further, in line with the requirements put in place by the General Administration of Customs, People's Republic of China {GACC}, it has been decided to include testing of pesticide residues in Cumin seeds under the mandatory regime of the Board, for export to China. Therefore, with effect from 13th December, 2021 exports of Cumin seeds to China will be permitted only with the Cleared analytical Report from Spices Board.
(For details - <http://www.indianspices.com/trade/trade-notifications/notificationdetails.html?id=272>)
- As festive demand started buyers reported active from lower prices level.
- As per the Agriwatch production estimate, Jeera production for 2021-22 (marketing period) is estimated at 391,801 MT (around 71 lakh bags each of 55 kg) compared to last year's 451,451 MT (82 lakh bags).

CARDAMOM

Fundamentals

Today's Update:

- Steady to weak sentiment witnessed in Cardamom spot market on Tuesday.
- Fourth round picking activity started from December first week.

Previous Update:

- Due to recent flood in Kerala growing regions like Idukki affected the Cardamom plants. As per trade sources, around 10% crop loss reported till now.
- India's production for the coming marketing year 2021-22 (already started from August) expected better around 27,000 MT also put the cap on prices. Last year it was 23,000 MT.
- Cardamom planters were received higher prices last two years, therefore, they are taking care of their plants and favourable weather condition, is the main reason for expecting good crop in the coming year.
- As we expected earlier, the new Cardamom supply pressurizes the prices from higher levels due to increased production.

CORIANDER SEED

Fundamentals:
Today's Update:

- Continued steady sentiment witnessed in Coriander spot market on Tuesday.
- Current year, Coriander sowing continued started in Rajasthan, MP and Gujarat growing regions, as of now 85 to 90% sowing completed.
- According to Gujarat Agri. Dept, as on 13th December, 118,541 hectares as compared to last year same period 128,591 hectares.

Previous Update:

- As per Agriwatch initial sowing report, in MP Neemuch and Mandsour growing regions farmers are shifting Coriander crop to Ajwain and Garlic due to better price realisation, however actual scenario likely to come after 15 to 20 days.
- As we expected buyers are active from lower prices level as festival season started.
- Farmers want to release their produce at higher prices only.
- Agriwatch estimates lower ending stocks for 2021-22 (marketing year) likely to support Coriander prices in the coming days.
- As per Agriwatch production estimate, Coriander production for 2021-22 (marketing year) is estimated at 342,435 MT (85 lakh bags) compared to last year's 352,316 MT (88 lakh bags, 1 bag = 40 kg).
