BLACK PEPPER

Fundamentals:

Today's Update:

- Steady to firm sentiment was witnessed in Black pepper spot market reported on Tuesday.
- As we expected earlier, Indian prices took support as buyers were active from lower prices level.

Previous Update:

- Agriwatch expects, black pepper prices likely to go up further (for long term it may around Rs.60,000 to 65,000/-qtl) as other producing countries new crop arrivals likely to start from March in Vietnam and expected lower production. So, domestic as well as international buyers are looking for Indian variety.
- Vietnam Pepper price today (January 10) continued the strong decline with an adjustment of 1,000 - 2,000 VND/kg compared to the end of last week. In which, the highest price recorded is 80,000 VND/kg. According to the survey, today's pepper price continues to decrease by 1,000-2,000 VND/kg on a large scale.
- Specifically, the two provinces of Gia Lai and Dong Nai decreased by 2,000 VND/kg and 1,000 VND/kg, respectively, to VND 77,000/kg and VND 77,500/kg, respectively. After that, the two provinces of Dak Lak and Dak Nong left the mark of 80,000 VND/kg, together reducing 2,000 VND/kg to the same level of 78,000 VND/kg. Similarly, the two provinces of Binh Phuoc and Ba Ria - Vung Tau respectively adjusted their transactions to 79,000 VND/kg and 80,000 VND/kg, down 1,000 VND/kg.
- Vietnam Black pepper exports in the first 11 months of 2021 reached 184,000 tons, worth approximately 620 million USD, down 15.9% in volume, but up 31.1% in value over the same period in 2020.
- Continuous supply in the spot market put cap on prices.
- As per VPA, it is forecasted that in 2022, world pepper prices will continue to be supported due to scarce supply due to crop failure in main producing countries, according to the latest report from the Import-Export Department (Ministry of Industry and Trade) Vietnam.
- According to the World Pepper Association (IPC), Brazil is currently the only country with an increase in supply due to the harvest in the north of the country, while other countries are in short supply.
- News about the new crop of Vietnam is not very positive, so customers may switch to buy more Brazilian pepper due to better freight rates.
- Meanwhile, demand for pepper in India improved as the economy reopened after a long period of being engaged by the COVID-19 pandemic.
- Higher arrivals of imported pepper from Sri Lanka have capped the domestic pepper price in India.
- Total black pepper imports into India from Sri Lanka between January 2021 and November 2021 were 8,961 tonnes, more than double the 4,017 tonnes in 2020 and nearly three times higher than 3,144 tonnes in the same period of 2019.
- One of the important factors affecting pepper prices is the lower-than-expected demand of the Chinese market in the last months of this year. According to the Vietnam Pepper Association, the amount of pepper that China bought from Vietnam in October and November was much lower than the average of the last months of the previous year, reaching 546 and 463 tons, respectively. by 6 - 12% compared to the same period last year.
- As per trade sources, the global black pepper market is expected to grow from \$3.9 billion in 2020 to nearly \$6 billion in 2028, representing an average growth rate of 5.5% over the period. period 2021-2028.
- World pepper prices will continue to trend up due to increased demand at the end of the year, while supply is limited due to reduced output and difficulties in transportation, according to the latest report from the Import-Export Department. Ministry of Industry and Trade).
- Lower production expectations supported the domestic pepper prices. As per current situations, Agriwatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.
