

RED CHILLI**Fundamentals:****Today's Update:**

- Major Red Chilli spot markets remained closed on Saturday.

Previous Update:

- Buyers reported active at Guntur market due to good quality supply.
- At Guntur spot market, out of total arrivals around 50% arrivals are being reported rain affected qualities.
- *Current year, due to unseasonal rainfall during November and December and virus attack chilli quality reported damaged. We expect, supply of premium quality likely to be low in coming days and will support the prices.*
- Buyers were active for cold storage stocks. Exporters demand also reported well as they were concerned about new chilli quality.
- Currently chilli buyers like masala industries are waiting for good quality supply. AgriWatch expects, in the coming days quality arrivals will improve (as moisture level will come down to 5% to 7% from current 10% to 12%) and simultaneously demand will also increase.
- As per AgriWatch estimates, Red Chilli all India production for 2022 is estimated at 14.66 lakh MT, revised after rainfall in Karnataka and virus affected in AP and Telangana, earlier estimate was of 15.93 lakh MT. Last year's production was 13.84 lakh MT.

BLACK PEPPER**Fundamentals:****Today's Update:**

- Steady to firm sentiment was witnessed in Black pepper spot market on Saturday.

Previous Update:

- As AgriWatch expected earlier, buyers were active from lower price levels as India's pepper production is estimated to be lower.
- Vietnam Pepper trading at 85,500 VND/kg. Gia Lai pepper traded at 84,000 VND/kg. Vietnam Pepper trading at 84,500 dong/kg. In Ba Ria - Vung Tau trading at 87,000 VND/kg. In Binh Phuoc, pepper traded at 86,000 VND/kg.
- As we expected earlier, Indian stockists and planters are holding their stocks on expectations of higher prices in coming days as pepper production expected lower current year.
- Currently black pepper import reported lower from Sri Lanka and Vietnam supporting the Indian domestic prices.
- New pepper supply continuing at Kochi spot market.
- Vietnam pepper production is expected to continue low due to the impact of climate change and objective causes such as fertilizer prices, drug prices, and rising labour costs. It is forecasted that in 2022, Vietnam's pepper output will decrease compared to 2021, which will cause pepper prices to increase in the near future.
- AgriWatch expects, black pepper prices likely to go up further (for long term it may around Rs.60,000 to 65,000/-qtl) as other producing countries new crop arrivals likely to start from March. Also, in Vietnam lower production expected. So, domestic as well as international buyers are looking for Indian variety.
- Vietnam Black pepper exports in the first 11 months of 2021 reached 184,000 tonne, worth approximately 620 million USD, down 15.9% in volume, but up 31.1% in value over the same period in 2020.
- As per VPA, it is forecasted that in 2022, world pepper prices will continue to be supported due to scarce supply due to crop failure in main producing countries, according to the latest report from the Import-Export Department (Ministry of Industry and Trade) Vietnam.
- According to the World Pepper Association (IPC), Brazil is currently the only country with an increase in supply due to the harvest in the North of the country, while other countries are in short supply.
- Higher arrivals of imported pepper from Sri Lanka have capped the domestic pepper price in India.
- Total black pepper imports into India from Sri Lanka between January 2021 and November 2021 were 8,961 tonne, more than double the 4,017 tonne in 2020 and nearly three times higher than 3,144 tonne in the same period of 2019.
- World pepper prices will continue to trend up due to increased demand, while supply is limited due to reduced output and difficulties in transportation, according to the latest report from the Import-Export Department. Ministry of Industry and Trade.
- Lower production expectations supported the domestic pepper prices. As per current situations, AgriWatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.
