## **BLACK PEPPER**

### **Fundamentals:**

#### **Today's Update:**

- Steady to weak sentiment was witnessed in Black pepper spot market on Tuesday.
- Continuous supply in the Kochi spot market put a cap on prices from higher levels.
- However, we expect Indian stockists and planters may hold their stocks if prices reported correction further as pepper production was expected to be lower current year.
- Vietnam Pepper price continued to move sideways in the range of 78,500 - 81,000 VND/kg. Currently, two provinces Gia Lai and Dong Nai both recorded the lowest price of 78,500 VND/kg. In Dak Lak and Dak Nong with the same price of 79,500 VND/kg. In Binh Phuoc province trading at 80,000 VND/kg. In Ba Ria - Vung Tau province trading at 81,000 VND/kg.
- Vietnam pepper production is expected to continue low due to the impact of climate change and objective causes such as fertilizer prices, drug prices, and rising labour costs. It is forecasted that in 2022, Vietnam's pepper output will decrease compared to 2021, which will cause pepper prices to increase in the near future. Vietnam's pepper output around 220,000 tonnes in 2021 and as per initial report for 2022 production would be around 180,000 tonnes.
- According to Vietnam Pepper Association, in the period 2016 - 2024, North America, Latin America, Europe, Japan, Middle East and Africa are the top regions of the black pepper market. The Asia-Pacific (APAC) black pepper market is expected to contribute US\$2,607.8 million to the overall black pepper market by the end of 2024. The reason for this increase comes from the preference of consumers to switch to organic black pepper due to the increasing trend of organic products worldwide. At the same time, the growing trend of demand for natural ingredient black pepper in various industries, such as food and beverage, personal care and healthcare, is also the reason behind black pepper market growth in the APAC region.

#### **Previous Update:**

- Current year, from 1st January 2022 to 14th March 2022, Black pepper supply reported 2715.5 tonne compared to last year it was 1,300 tonne, up by 13.27% as stockists were releasing their stocks as pepper prices were higher than last year.
- Brazil is the second largest pepper exporting country in the world after Vietnam, Brazil has stabilized an average export volume of 56,000 tons annually in the period 2012-2021. In January 2022, Brazilian pepper exports reached 7,946 tons, down 4% compared to the same period in 2021.
- As AgriWatch expected earlier, buyers were active from lower price levels as India's pepper production is estimated to be lower.
- As we expected earlier, Indian stockists and planters are holding their stocks on expectations of higher prices in coming days as pepper production expected lower current year.
- Currently black pepper import reported lower from Sri Lanka and Vietnam supporting the Indian domestic prices. New pepper supply continuing at Kochi spot market.
- Lower production expectations supported the domestic pepper prices. As per current situations, AgriWatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.

- India's production for the coming Marketing Year 2021-22 (already started from August) is expected to be around 27,000 metric tonne (MT) and also put the cap on prices. Last year it was 23,000 MT.
- Increasing good quality supply attracted the buyers in the spot market.
- Due to floods in Kerala growing regions like Idukki affected the Cardamom plants. As per trade sources, around 10% crop loss reported.
- Cardamom planters received higher prices in the last two years, therefore, they are taking care of their plants and favourable weather conditions are the main reason for expecting a good crop in the coming year.
