

RED CHILLI**Fundamentals:****Today's Update:**

- By and large steady sentiment was witnessed in Red Chilli spot markets on Tuesday. Few Mandi is closed due to all India trader strike and will open on 30th March.
- As we expected earlier supply of premium quality reported low and supported the prices. Lower supply reported today. Farmers and Stockists were holding their good quality stocks for further better prices.

Previous Update:

- As Red Chilli prices already traded at higher levels compared to last year buyers reported inactive at current prices. Also, due to closing the financial year market movement reported slow in the Chilli spot market.
- Due to unseasonal rainfall during December and January Chilli quality reported damage so stockists want to sell good quality cold storage stocks and new crop at further high prices.
- At Guntur market normal demand continued from stockists as they were storing best quality at cold storage on expectations of further higher prices after summer vacation which is likely to start from May second week till one month.
- As per AgriWatch estimates, Red Chilli all India production for 2022 is estimated at 14.66 lakh MT, revised after rainfall in Karnataka and virus affected in AP and Telangana, earlier estimate was of 15.93 lakh MT. Last year's production was 13.84 lakh MT.

TURMERIC

Fundamentals:

Today's Update:

- Steady sentiment was witnessed in Turmeric spot market on Tuesday. Mostly market closed due to closing financial year and all India trader strike and will open on 30th March and 4th April.

Previous Update:

- At Warangal spot market, Turmeric new crop supply likely to start from last week of March or first week of April.
- Turmeric new crop supply started coming around 20,000 to 20,500 bags (1 bag = 70 Kgs) on an average daily basis with moisture content 15% to 18%. Buyers may be inactive for new crop supply due to higher moisture content.
- Turmeric ending stocks reported lower in the spot market which are likely to support the prices further.
- Buyers reported inactive for new crop supply due to higher moisture content. However, AgriWatch expects buyers are likely to be active in the spot market with the reduction in moisture level in coming days.
- AgriWatch expects, buyers may remain active at lower price levels as ending stocks are expected to be lower in 2022 compared to 2021. For the 2022 Marketing Year, AgriWatch estimates 0.48 lakh MT ending stocks, which will be lower than 0.62 lakh MT from 2021.
- As per AgriWatch estimates, Turmeric all India production for 2022 is estimated at 4.67 lakh MT, revised after crop damage due to excessive rainfall in Maharashtra, AP and Telangana, earlier estimate was of 4.89 lakh MT. Last year's production was 4.46 lakh MT.

BLACK PEPPER

Fundamentals:

Today's Update:

- Steady sentiment was witnessed in Black pepper spot market on Tuesday. Kochi market is closed due to all India trader strike.
- Vietnam Pepper prices as on March 29 unchanged in the range of 77,500 - 80,000 VND/kg. Currently, the two provinces of Dong Nai and Gia Lai both recorded the lowest price of 77,500 VND/kg. Higher are the two provinces of Dak Lak and Dak Nong with the same level of 78,500 VND/kg. Similarly, pepper prices today in two provinces Binh Phuoc and Ba Ria - Vung Tau were stable at 79,000 VND/kg and 80,000 VND/kg, respectively.
- According to statistics from the Russian Customs Service, the country's pepper imports in 2021 reached 9.27 thousand tons, down 6.1% in volume, compared to 2020. Russian Customs Service shows that the country's pepper imports in January 2022 reached 470 tons, down 20.2% in volume, compared to January 2021; compared with January 2020 decreased by 27% in volume.
- In 2021, the average import price of Russian pepper in 2021 will reach 3,304 USD/ton, up 36.5% compared to 2020. In which, the average import price of Russian pepper from Vietnam increased by 48.8%, to 3,840 USD/ton; Import price from Indonesia increased 32.2% to 3,138 USD/ton. In January 2022, the average import price of Russian pepper reached 3,727 USD/ton, up 43.8% compared to January 2021. In which, the average import price of pepper from Vietnam to the Russian market increased by 45.8%, to \$4,527/ton; from Brazil increased by 79.5%, to 4,488 USD/ton. Thus, it can be seen that the import price of pepper from Vietnam is higher than that of the main sources in 2021 and January 2022, according to the latest report from the Import-Export Department (Ministry of Industry and Trade).

Previous Update:

- Continuous supply in the Kochi spot market put a cap on prices from higher levels.
- However, we expect Indian stockists and planters may hold their stocks if prices reported correction further as pepper production was expected to be lower current year.
- According Indonesia's Central Bureau of Statistics (BPS), in 2021, Indonesia's pepper exports fell to a 7-year low, reaching 37,738 tons compared with last year 2020 down 35.4% in volume. In 2021, Indonesia's pepper exports to Vietnam reached 8,285 tons, to the US reached 5,294 tons, and to China reached 4,908 tons, down 60.7%, 20.3% and 56.8% respectively over the previous year. 2020. The supply of pepper in the Indonesian market is not much, just enough to meet the domestic demand, while the new crop season begins in July, according to the latest report from the Import-Export Department (Ministry of Industry and Trade).
- Vietnam pepper production is expected to continue low due to the impact of climate change and objective causes such as fertilizer prices, drug prices, and rising labour costs. It is forecasted that in 2022, Vietnam's pepper output will decrease compared to 2021, which will cause pepper prices to increase in the near future. Vietnam's pepper output around 220,000 tonnes in 2021 and as per initial report for 2022 production would be around 180,000 tonnes.
- According to Vietnam Pepper Association, in the period 2016 - 2024, North America, Latin America, Europe, Japan, Middle East and Africa are the top regions of the black pepper market. The Asia-Pacific (APAC) black pepper market is expected to contribute US\$2,607.8 million to the overall black pepper market by the end of 2024. The reason for this increase comes from the preference of consumers to switch to organic black pepper due to the increasing trend of organic products worldwide. At the same time, the growing trend of demand for natural ingredient black pepper in various industries, such as food and beverage, personal care and healthcare, is also the reason behind black pepper market growth in the APAC region.

- Current year, from 1st January 2022 to 14th March 2022, Black pepper supply reported 2715.5 tonne compared to last year it was 1,300 tonne, up by 13.27% as stockists were releasing their stocks as pepper prices were higher than last year.
- As AgriWatch expected earlier, buyers were active from lower price levels as India's pepper production is estimated to be lower.
- As we expected earlier, Indian stockists and planters are holding their stocks on expectations of higher prices in coming days as pepper production expected lower current year.
- Currently black pepper import reported lower from Sri Lanka and Vietnam supporting the Indian domestic prices. New pepper supply continuing at Kochi spot market.
- Lower production expectations supported the domestic pepper prices. As per current situations, AgriWatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.

JEERA (CUMIN SEED)

Fundamentals:

Today's Update:

- Steady sentiment was witnessed in Jeera Unjha spot market on Tuesday. Mostly market closed due to closing financial year will reopen on 4th April.

Previous Update

- In Gujarat, few Jeera markets were closed due to closing financial year, will reopen from first week of April. Market activity reported lower currently.
- At Jodhpur market, new crop arrivals are likely to start from the current week. New crop supply with moisture content 8% to 10% may put cap on prices for short term. Due to high temperature moisture level reported lower than normal. New arrivals coming on an average daily basis 1,000 to 1,100 bags (1 bag = 55 kgs). In the Merta city market new arrivals came today 14,000 bags (1 bag = 50 kgs).
- AgriWatch expects demand likely to be good in the spot market in coming months as ending stocks for 2022-23 Marketing Year reported lower by 50.79%.
- In some growing regions in Gujarat some quality damage (turn into black colour) reports came due to hot temperature and supported the prices.
- Jeera new arrival continues at Unjha mandi, Gujarat. Around 7,000 to 8,000 bags new crop supply continued on an average daily basis and avg. price of Rs.19,300 per quintal. Current moisture is around 10%.
- Currently exporters were active at Unjha spot market. As per trade information, good demand reported from Bangladesh and Nepal. AgriWatch expects buyers likely to be active further in the spot market and support the prices.
- As per the AgriWatch production estimate, Jeera production for 2022-23 (Marketing Year) is estimated at 316,281 MT (around 58 lakh bags each of 55 kg) compared to last year's 391,801 MT (71 lakh bags).

CARDAMOM

Fundamentals

Today's Update:

- Steady to firm sentiment was witnessed in Small Cardamom spot market on Tuesday.

Previous Update:

- Currently, lower rainfall reported in Kerala Cardamom growing regions, if it will continue next 15 to 20 days may impact Cardamom plants.
- Fifth round picking activity already started in Kerala growing regions.
- As we expected earlier, the new Cardamom supply is pressurizing the prices from higher levels in the wake of increased production.
- India's production for the coming Marketing Year 2021-22 (already started from August) is expected to be around 27,000 metric tonne (MT) and also put the cap on prices. Last year it was 23,000 MT.
- Increasing good quality supply attracted the buyers in the spot market.
- Due to floods in Kerala growing regions like Idukki affected the Cardamom plants. As per trade sources, around 10% crop loss reported.
- Cardamom planters received higher prices in the last two years, therefore, they are taking care of their plants and favourable weather conditions are the main reason for expecting a good crop in the coming year.

CORIANDER SEED

Fundamentals:

Today's Update:

- Steady to firm sentiment was witnessed in Coriander spot market on Tuesday. Few markets were closed due to closing financial year will reopen on 4th April.
- AgriWatch expects demand likely to be good in the spot market in coming months as ending stocks for 2022-23 Marketing Year reported lower.

Previous Update:

- Coriander's new arrival continued in Gujarat, Rajasthan and Madhya Pradesh. Around 2,500 to 3,000 bags arrive on a daily basis. Current moisture is around 12% to 15%.
- Coriander supplies rose by 94% last week, as stockists and farmers were offloading their stocks in the spot market as current prices were higher than last year's same period. Currently, at Kota spot market Coriander Eagle variety prices reported up by 35.82% as compared to last year same period.
- As per the AgriWatch second advance production estimate, Coriander production for 2022-23 (Marketing Year) is estimated at 310,371 MT (around 77.6 lakh bags, 1 bag = 40 kg) compared to last year's 342,435 MT (85 lakh bags).
