- Domestic pepper prices all dropped, becoming the second consecutive session of decline this week. With negative signals from stagnant exports and traders shifting capital to coffee investment, domestic pepper prices could not remain stable. The average export price of pepper in July 2022 of our country reached \$4,214/ton, up 1.94% compared to the average export price of June 2022.

#### Previous Update:

- According to a report from the Import and Export Department (Ministry of Industry and Trade) Vietnam is the largest source of pepper for the US in the first 5 months of 2022 with imports reaching 27.52 thousand tons. This number increased 19.8% in volume over the same period in 2021.
- Vietnam's pepper market share in total US imports increased from 64.48% in the first 5 months of 2021 to 74.65% in the first 5 months of 2022. In contrast, the US reduced pepper imports from India with a decrease of 9.5% in volume, but an increase of 16.3% in value compared to the first 5 months of 2021, reaching 2.8 thousand tons, worth 14 million USD in the first 5 months of 2022. India's share of pepper in total US imports fell from 8.68% in the first five months of 2021 to 7.59% in the first five months of 2022. In general, the supply of pepper to the US is still concentrated mainly from Vietnam. Thanks to the advantage of stable supply, Vietnam plays an important role in the structure of pepper supply to the US in the coming time.
- In Asia, China's pepper imports in the first 6 months of 2022 decreased by 23.4% compared to the same period in 2021. New crop supplies from Brazil and Indonesia are continuing to add to the market.
- As per current situations, AgriWatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.
