### BLACK PEPPER

#### **Fundamentals:**

#### **Today's Update:**

- Steady sentiment was witnessed in Black pepper spot market on Saturday.
- Prices were trading steady today on increased arrivals by 6.67% as compared to yesterday.
- *The strong USD will force the price of VND to decrease, which causes the export price of our country's pepper to decrease continuously in the past 1 month. Compared to 15<sup>th</sup> August our country's export black pepper price has decreased by 400 USD/ton, currently only 3,350 USD/ton with 500 g/l black pepper; white pepper price is down to 5,300 USD/ton; down 300 USD/ton. According to experts, weak demand is still the factor that restrains the recovery of pepper prices in the following months. Especially the two markets, Europe and America, where our country's largest pepper consumption is.*
- Some countries such as Pakistan and Egypt, which have been the major export markets of Vietnam's pepper in recent years, are experiencing this situation. Leading economists fear that the simultaneous raising of the basic currency interest rates by many central banks around the world will accelerate the global economic recession even further. Thus, today's pepper price on September 15, 2022 in the world market is quite stable.

#### **Previous Update:**

- Vietnam Pepper price as on date in the domestic market decreased slightly in some places compared to previous day. Specifically, the price of pepper in Dak Lak and Dak Nong today continued to be purchased at 66,500 VND/kg; Pepper price today in Gia Lai remained stable at 66,000 VND/kg; in Dong Nai is still flat, continuing to buy at 66,000 VND/kg; in Ba Ria - Vung Tau decreased slightly by 500 VND/kg, to 68,000 VND/kg - still keeping the highest pepper purchasing level in the country today.
- As for Binh Phuoc pepper price today, it traded at VND 67,000/kg, unchanged from yesterday. The domestic pepper market is mostly flat, only Ba Ria - Vung Tau is down slightly by 500 VND/kg compared to yesterday.
- Domestic pepper prices continue to be influenced by the rising USD and in the context that the Fed will strongly raise interest rates in the adjustment phase that will take place on September 20-21.
- According to some sources, in **India**, more than normal rainfall in July may affect pepper plants during fruiting period. Meanwhile, Sri Lanka's pepper harvest is in its final stages.
- As per current situations, AgriWatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.
