

### RED CHILLI

#### Fundamentals:

#### Today's Update:

- Continued steady sentiment was witnessed in Red Chilli spot market on Tuesday.
- As Red Chilli prices trading at all-time high due to lower availability of premium quality, also export demand reported lower current year. Financial crisis in major exporting countries also added the sentiments.

#### Previous Update:

- As per AgriWatch revised estimates, Red Chilli all India sowing area for 2022 is estimated at 9.21 lakh hectares as compared to last year 9.03 lakh hectares, up by 2.03%.
- Due to good rainfall and higher prices compared to last year farmers are showing more interest for Red Chilli crop and some new areas also come up current year in Andhra Pradesh. Earlier farmers had sowed very less areas due to fear of virus infection (last year mostly crop damaged) but now standing crop quality looks healthy so they are interested in sowing in the rest of the areas also. So, Red Chilli sowing area is likely to increase considerably under prevailing weather conditions and farmers' interest.
- As per Andhra Pradesh agricultural department, as on 21st September 2022 Red Chilli sowing activity completed around 153,270 hectares as compared to last year same period 119,353 hectares, up by 28.42%.
- As per AgriWatch sources, mites have been seen in some parts of Karnataka key growing regions as crops are in flowering stage right now. However, farmers are hoping that this situation may recover soon as it is a curable pests.
- As per AgriWatch estimates, Red Chilli all India production for 2022 marketing year is estimated at 14.07 lakh MT, revised after rainfall in Karnataka and virus affected in AP and Telangana, earlier it was estimated 15.93 lakh MT. Last year's production was 13.84 lakh MT.
