

RED CHILLI

Fundamentals:

Today's Update:

- Steady sentiment was witnessed in Red Chilli spot market on Thursday.
- New crop arrivals continue in MP Bedia spot market in which 20% are of premium quality and the rest 80% are fatki and other qualities. Farmers and stockists are not releasing their premium quality in the expectations of further increase in its prices. AgriWatch expects arrivals likely to increase by 15 – 20 percent after Diwali.
- Buyers are currently active in the market due to ongoing festive season demand in the domestic markets.

Previous Update:

- As AgriWatch expected earlier in AP Red Chilli sowing area current year likely to be around 221,278 hectares which is reported up as compared to last year.
- Currently heavy rainfall reported in Chilli growing states like Andhra Pradesh and Telangana is also a major concern for standing crops. Continuous rainfall may affect the standing crops as plants are in the growth stage. However, as of now no crop damage has been reported in key growing regions in Andhra Pradesh and Telangana.
- *As per AgriWatch revised estimates, Red Chilli all India sowing area for 2022 is estimated at 9.21 lakh hectares as compared to last year 9.03 lakh hectares, up by 2.03%.*

TURMERIC

Fundamentals:

Today's Update:

- Steady sentiment was witnessed in Turmeric spot market on Thursday.
- In the report of decline in sowing area in AP and Telangana, farmers and stockists are not releasing their stocks in bulk quantities, also less stocks during the current season has put a cap on crop supplies.

Previous Update:

- As per AgriWatch intention, current year Turmeric sowing area may go down in AP and Telangana as other competitive crops like Cotton and Maize prices are comparatively higher and both crops are short duration crops.
- As per AgriWatch revised estimates, Turmeric all India sowing area for 2022 is estimated at 1.70 lakh hectares as compared to last year 1.66 lakh hectares, up by 2.44%.
- AgriWatch estimates, Turmeric (Dry) all India production for 2022 is revised lower at 4.67 lakh MT compared to last year's 4.89 lakh MT. Crop damage reports due to excessive rainfall during October and November in AP and Telangana remain the key reason for revising production downwards.

BLACK PEPPER

Fundamentals:

Today's Update:

- Steady sentiment was witnessed in Black pepper spot market on Thursday.
- Vietnam Pepper price as on last trade continues to be stable in the range of 59,500 - 62,000 VND/kg. In which, the highest price was recorded in Ba Ria - Vung Tau province. In Gia Lai is the locality recording the lowest price with 59,500 VND/kg. Better than Dong Nai at 60,000 VND/kg.
- The two provinces of Dak Lak and Dak Nong also maintain the purchase of pepper at a common price of 60,500 VND/kg. Similarly, pepper prices today in two provinces of Binh Phuoc and Ba Ria - Vung Tau were stable at 61,500 VND/kg and 62,000 VND/kg respectively.
- World pepper price, according to the update from the International Pepper Association (IPC) on October 17, world pepper prices compared to October 14 are as follows: Lampung black pepper (Indonesia): at \$3,692/ton, down 0.60%, Brazilian black pepper ASTA 570: at 2,600 USD/ton, unchanged, Kuching black pepper (Malaysia) ASTA: at 5,100 USD/ton unchanged and Muntok white pepper: at \$5,976/ton, down 0.59%, Malaysian white pepper ASTA: at \$7,300/ton, unchanged.
- In September alone, Vietnam imported 2,246 tons of Brazilian pepper, up 52.7% over the previous month. In addition to Vietnam, Brazil also boosted pepper exports to a number of other markets in September such as: UAE up 35.7%, Morocco up 72.7%, especially Germany increased more than 7 times.

Previous Update:

- Brazil's pepper exports increased by 34% in September, low pepper prices is the main reason for Brazil's pepper exports increase again in recent months, of which many orders come from Vietnam - the world's largest pepper exporter.
- According to the data of the Brazilian State Center for Foreign Trade Statistics, in September pepper exports of Brazil, the world's second largest pepper exporter after Vietnam, increased by 34% over the previous month to 8,063 ton.
- However, in the first 9 months of the year, Brazil's pepper exports still fell slightly by 3.4% compared to the same period last year, reaching 59,739 tons. In which, Vietnam imported 12,997 tons of pepper from Brazil in the first 9 months of the year up 2.7 times in volume over the same period last year. This is also the largest volume of pepper that Vietnam has ever imported from Brazil so far. Thereby making Vietnam become the largest pepper importer from Brazil, accounting for 22% of the country's pepper export market share compared to 8% of the same period last year.
- Brazil's black pepper is attracting importers thanks to its competitive pricing and ample supply as the country is in the midst of its biggest harvest of the year.
- Brazil's pepper price is quite competitive, but the biggest obstacle of this pepper industry is still the presence of Salmonella bacteria on black pepper, making it difficult for Brazil to expand its market share in high-demand markets in terms of quality like EU or US. Meanwhile, Vietnam is the country with the most modern pepper processing technology in the world. Therefore, in addition to exporting, Vietnam is also one of the leading importers and processors of pepper.
- As per current situations, AgriWatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.

JEERA (CUMIN SEED)

Fundamentals:

Today's Update:

- By and large steady sentiment has been recorded in Jeera spot market on Thursday.
- Buyers are active in the spot market due to festival demand. Also, due to the festive season last week of October mostly markets will remain closed so they are storing as per their requirement early and hence supported the arrivals.
- Current year Jeera sowing is likely to start from October last week or November first week in Gujarat growing regions. Due to moisture conditions as a result of higher rainfall sowing may be delayed by 10 to 15 days current year. Sowing is likely to get delayed by 10 to 15 days due to heavy rainfall in the key growing regions of Madhya Pradesh, Gujarat and Rajasthan. However, it starts in some parts of Rajasthan Pali and Sirohi districts as moisture conditions reported lower and completed around 2% to 3%.
- AgriWatch expects current year sowing area likely to increase in Rajasthan and Gujarat growing regions as Jeera prices traded at higher levels compared to last year.
- At Unjha spot market, currently Jeera NCDEX Quality/ Machine Cut prices trading at INR 24,400 per quintal as compared to last year in the same period INR 14,000 per quintal rose by 74.29% due to lower stocks and good demand in the market.

Previous Update

- AgriWatch expects demand likely to be good in the spot market and buyers will be active in coming months as ending stocks for 2022-23 Marketing Year reported lower by 50.79%.
- As per the AgriWatch production estimate, Jeera production for 2022-23 (Marketing Year) is estimated at 316,281 MT (around 58 lakh bags each of 55 kg) compared to last year's 391,801 MT (71 lakh bags).

CARDAMOM

Fundamentals

Today's Update:

- Continued steady to firm sentiment has been recorded in Small Cardamom spot market on Thursday.
- Buyers are currently active in the market and hence supported the arrivals as well as the prices due to ongoing festive season demand.

Previous Update:

- AgriWatch expect, Cardamom planters and stockists may hold their stocks in coming months if prices go down from current levels.
- As per initial report AgriWatch estimates India's production for the marketing year 2022-23 is expected to be around 30,000 metric tonne (MT). Last year it was 27,000 MT. Favorable weather condition in Kerala growing regions is the main reason for higher production expectations.

CORIANDER SEED

Fundamentals:

Today's Update:

- By and large steady to firm sentiment was witnessed in Coriander spot market on Thursday.
- Buyers are currently active in the market due to ongoing festive season demand also during the last week of October major markets will remain closed.

Previous Update:

- Coriander growing regions in Rajasthan, Madhya Pradesh and Gujarat sowing activity likely to get delayed by 10 to 15 days and may start from end of October or first week of November due to higher moisture condition.
- *AgriWatch expects Coriander sowing area may increase current year as prices are trading at an all-time high position. Area may shift from other competitive crops like Mustard and Garlic in Rajasthan and Gujarat.*
- As per the AgriWatch second advance production estimate, Coriander production for 2022-23 (Marketing Year) is estimated at 310,371 MT (around 77.6 lakh bags, 1 bag = 40 kg) compared to last year's 342,435 MT (85 lakh bags).
