JEERA (CUMIN SEED)

Fundamentals:

Today's Update:

- Mixed sentiment has been recorded in Jeera spot market on Tuesday.
- Currently buyers are active in the market on export demand from China and Bangladesh is supporting the prices.
- Jeera sowing around 75% to 80% sowing has been completed in Rajasthan Jeera growing regions, last year till date sowing completed around 85% to 90%.
- As per Gujarat Government, around 144,074 hectare of sowing has been completed as on 5th December 2022 in Jeera key growing regions in Gujarat and according to this data, normal area (three years average) in Gujarat likely to be around 421,457 hectares. During the same period last year, it was around 171,459 hectares, down by 15.97% during the current season.
- This is because of delay in sowing and also currently weather is quite unfavourable due to which farmers are waiting for improvement in weather conditions.
- However, AgriWatch expects current year sowing area likely to increase in Rajasthan and Gujarat growing regions as Jeera prices traded at higher levels compared to last year.

Previous Update

- Higher temperature in Jeera growing regions affected the standing crops and supported the prices. Due to hot weather conditions in Rajasthan and Gujarat Jeera growing regions plant growth of Jeera standing crops reported lower which supported the prices. In Rajasthan, in some regions farmers have done re-sowing also and some of them shifted to other competitive crops also added to the bullish sentiment. Due to moisture conditions as a result of higher rainfall sowing delayed by 15 to 20 days current year.
- As per the AgriWatch production estimate, Jeera production for 2022-23 (Marketing Year) is estimated at 316,281 MT (around 58 lakh bags each of 55 kg) compared to last year's 391,801 MT (71 lakh bags).
