TURMERIC

Fundamentals:
Today's Update:

- By and large steady sentiment was witnessed in Turmeric spot market on Friday.
- Possibility of scattered to heavy rainfall in Turmeric growing regions from 10th December 2022 to 12th December 2022 in some regions of Madhya Pradesh and Maharashtra. It is likely to be beneficial for turmeric, however, if heavy rainfall takes place then it may affect the crops due to water-logging situation.
- Currently, most of the buyers are inactive in the market as they are waiting for the start of new crop arrivals.
- On lower stocks in the current season, arrivals reported down today. Also stockists are not interested in releasing their stocks due to lower price level YOY basis.

Previous Update:

- Subdued demand in domestic and export market due to financial crisis, prices may continue to trade at bottom levels in the coming days.
- *As per AgriWatch revised estimates, Turmeric all India sowing area for 2022 is estimated at 1.70 lakh hectares as compared to last year 1.66 lakh hectares, up by 2.44%.*
- AgriWatch estimates, Turmeric (Dry) all India production for 2022 is revised lower at 4.67 lakh MT compared to last year's 4.89 lakh MT. Crop damage reports due to excessive rainfall during October and November in AP and Telangana remain the key reason for revising production downwards.

JEERA (CUMIN SEED)

Fundamentals:

Today's Update:

- By and large steady to weak sentiment has been recorded in Jeera spot market on Friday.
- On fresh demand in nominal quantities from export market (China and Bangladesh), prices as well as arrivals in the Unjha benchmark market reported up as stockists and farmers are continuously releasing their stocks on getting higher prices. Also, the news of the sowing report has affected Jeera prices over the past two weeks.
- Due to hot weather conditions in Rajasthan and Gujarat Jeera growing regions plant growth of Jeera standing crops reported lower which supported the prices. In Rajasthan, in some regions farmers are re-sowing also and some of them shifted to other competitive crops also added to the bullish sentiment. Due to moisture conditions as a result of higher rainfall sowing is delayed by 15 to 20 days current year.
- If higher temperatures continue for next 10 to 15 days over major Cumin growing regions then there are chances of lower germinations/crop damage and likely to support the prices.

Previous Update

- As per Gujarat Government, around 144,074 hectare of sowing has been completed as on 5th December 2022 in Jeera key growing regions in Gujarat and according to this data, normal area (three years average) in Gujarat likely to be around 421,457 hectares. During the same period last year, it was around 171,459 hectares, down by 15.97% during the current season.
- This is because of delay in sowing and also currently weather is quite unfavorable due to which farmers are waiting for improvement in weather conditions.
- As per the AgriWatch production estimate, Jeera production for 2022-23 (Marketing Year) is estimated at 316,281 MT (around 58 lakh bags each of 55 kg) compared to last year's 391,801 MT (71 lakh bags).
