

RED CHILLI

Fundamentals:

Today's Update:

- By and large steady sentiment was witnessed in the Red Chilli spot market on Wednesday.
- Good weather has supported the old crop arrivals today however new crop arrivals got affected due to rains in past week.
- Due to the recent rains last week in AP and Karnataka, there has been some damage to harvested Red Chilli crops in some parts of Karnataka, however rains has hampered the drying process and picking activity in AP.
- New crop supply has started from AP, Karnataka and MP, which is currently in nominal phase due to bad weather and likely to increase after mid-week of January as a result of which prices may decline further as production and quality of Red Chilli is expected to be good.
- Currently, partial sunshine and partially cloudy weather have been reported in Chilli growing regions. If heavy rainfall takes place in the coming days then it may affect the harvesting process and can damage the Chilli standing crops.
- Decline in export demand was reported for October month at 31,433.72 MT down by 24.71% from previous month on limited export to China, Sri Lanka and Bangladesh during the October 2022.

Previous Update:

- As per AgriWatch's revised estimates, Red Chilli all India sowing area for 2022 is estimated at 9.21 lakh hectares as compared to last year's 9.03 lakh hectares, up by 2.03%.

TURMERIC

Fundamentals:
Today's Update:

- Continued steady sentiment was witnessed in Turmeric spot market on Wednesday.
- Decline in exports has been reported as buyers are now waiting for new crop arrivals and also financial issues in major exporting countries has affected the export in October 2022. Hence, exports in October month decrease by 20.13% from the previous month and reported at 14,645.11 MT.
- Currently, most of the buyers are inactive in the market as they are waiting for the start of new crop arrivals.
- On lower stocks in the current season, arrivals reported down from the past few days. Also stockists are not interested in releasing their stocks due to lower price level YOY basis.

Previous Update:

- Possibility of scattered to heavy rainfall in Turmeric growing regions from 10th December 2022 to 12th December 2022 in some regions of Madhya Pradesh and Maharashtra. It is likely to be beneficial for turmeric, however, it heavy rainfall takes place then it may affect the crops due to water-logging situation.
- As per AgriWatch revised estimates, Turmeric all India sowing area for 2022 is estimated at 1.70 lakh hectares as compared to last year 1.66 lakh hectares, up by 2.44%.
- AgriWatch estimates, Turmeric (Dry) all India production for 2022 is revised lower at 4.67 lakh MT compared to last year's 4.89 lakh MT. Crop damage reports due to excessive rainfall during October and November in AP and Telangana remain the key reason for revising production downwards.

BLACK PEPPER

Fundamentals:

Today's Update:

- Continued steady sentiment was witnessed in Black pepper spot market on Wednesday.
- Continuous imports from other producing countries put pressure on Indian pepper prices.
- With continued interest from Sweden, UAE, Oman and Libya (including Garbled and Ungarbled), exports in October 2022 reported up by 33.10% from previous month and stood at 418.6 MT.
- Imports has increased from Malaysia of Garbled Black pepper and continued interest from Brazil and Vietnam were reported in October 2022. Hence, Black pepper garbled and Ungarbled were reported at 455.25 MT, marginal down by 0.27% from previous month.
- Vietnam Pepper price as on last trade simultaneously decreased 500 VND/kg compared to yesterday. Specifically, the price of pepper in Dak Lak, Dak Nong today down to 59,500 VND/kg; pepper price today in Gia Lai traded at 58,500 VND/kg; pepper price in Dong Nai is purchased at 58,000 VND/kg; in Ba Ria - Vung Tau around the threshold of 61,000 VND/kg; in Binh Phuoc pepper price at 60,000 VND/kg.
- Some people agree with the view that the market will reduce prices due to high inflation, poor export performance to China, and large inventories when the time to start a new harvest is approaching. However, there are also optimists who believe that the Fed's reduction in interest rate hikes will help the dollar cool down and help export prices increase.

Previous Update:

- As per current situations, AgriWatch expected India's pepper productions for 2021-22 likely to go down by 8 to 10% compared to last year. Last year (2020-21) India's Pepper production was 62,000 MT.

JEERA (CUMIN SEED)

Fundamentals:

Today's Update:

- By and large steady to firm sentiment has been recorded in Jeera spot market on Wednesday.
- On fresh demand which has started in nominal quantities during the current month in export market (China and Bangladesh), prices reported up in many spot markets.
- On the news of the failure in germination in some parts of Rajasthan and Gujarat, farmers and stockists are not releasing their stocks in bulk quantities anticipating further increase in prices.
- Lower sowing area reported in Gujarat Govt. also supported the domestic prices.
- As we have mentioned in the past month that cumin exports has declined on multiple factors such as all-time high prices and lower stocks in India. As a result of which 12,427.86 MT exports has been done in October 2022 down by 31.27% from the previous month.
- Very nominal imports has been reported in October 2022 which stood at 13.65 MT only, on financial crisis and lower production in Cumin producing countries.

Previous Update

- If higher temperatures continue for next 10 to 15 days over major Cumin growing regions then there are chances of lower germinations/crop damage and likely to support the prices.
- As per Gujarat Government, around 224,140 hectare of sowing has been completed as on 12th December 2022 in Jeera key growing regions in Gujarat and according to this data, normal area (three years average) in Gujarat likely to be around 421,457 hectares. During the same period last year, it was around 237,866 hectares, down by 5.77% during the current season.
- This is because of delay in sowing and also currently weather is quite unfavorable due to which farmers are waiting for improvement in weather conditions.
- As per the AgriWatch production estimate, Jeera production for 2022-23 (Marketing Year) is estimated at 316,281 MT (around 58 lakh bags each of 55 kg) compared to last year's 391,801 MT (71 lakh bags).

CARDAMOM

Fundamentals

Today's Update:

- Steady to firm sentiment has been recorded in Small Cardamom Kerala (Kochi) spot market on Wednesday.
- On good demand from major exporting countries of Cardamom (including Large and Small Cardamom), exports reported up during the current year. However, it declined in October month in which Large Cardamom exports recorded 102.25 Mt while Small Cardamom at 331.68 Mt, decreases by 8.07% and 8.83% respectively.
- With continued interest from Nepal, Large Cardamom imports were reported at 501.92 MT which is down by 30.47% from the previous month due to a decrease in imports from Bhutan on higher production in India.

Previous Update:

- As per initial report AgriWatch estimates India's production for the marketing year 2022-23 is expected to be around 30,000 metric tonne (MT). Last year it was 27,000 MT. Favorable weather condition in Kerala growing regions is the main reason for higher production expectations.

CORIANDER SEED

Fundamentals:

Today's Update:

- Steady to weak sentiment recorded in Coriander spot market on Wednesday.
- On sluggish demand in the export market due to the financial crisis, prices continued to decline in Coriander spot markets.
- Buyers reported inactive in the domestic market as well as they are waiting for the start of new crop arrivals anticipating further corrections in prices.
- On sluggish demand and all-time high prices, Coriander exports has decline by 6.29% from the previous month and stood at 3,015.25 MT in October 2022.
- India continued to import Coriander (including whole and crushed) mainly from Russia in October 2022 which stood at 4,816.66 MT due to lower stocks and prices of Indian Coriander during the current year.

Previous Update:

- In Gujarat, around 207,455 hectares of sowing has been completed up by almost 90.46% from the same period last year, last year in the same period it stood at 108,923 hectares, as per the data released by Gujarat Government on dated 12th December 2022, and according to the data normal area in coriander (three years average) likely to be around 118,300 hectares.
- AgriWatch expects the Coriander sowing area may increase current year as prices are trading at an all-time high position.
- As per the AgriWatch second advance production estimate, Coriander production for 2022-23 (Marketing Year) is estimated at 310,371 MT (around 77.6 lakh bags, 1 bag = 40 kg) compared to last year's 342,435 MT (85 lakh bags).
