

RED CHILLI

Fundamentals:

Today's Update:

- Weak sentiment witnessed in the Red Chilli spot market on Tuesday.
- Increasing new crop supply in the spot market put cap on prices.
- Further correction in the prices is expected in coming days as overall the Chilli crop is in good conditions so far in all the key growing states and production is also expected to be higher in 2023 seasons.
- However, we expect good export demand for premium quality likely to support Red Chilli prices from lower levels.

Previous Update:

- As per AgriWatch estimates, Red Chilli all India production for 2023 is estimated at 15.56 lakh metric tonne (LMT). Last year's production was 14.07 lakh MT, up by 10.59%.
- As per AgriWatch's revised estimates, Red Chilli all India sowing area for 2022 is estimated at 9.21 lakh hectares as compared to last year's 9.03 lakh hectares, up by 2.03%.

TURMERIC

Fundamentals:

Today's Update:

- By and large steady sentiment witnessed in Turmeric spot market on Tuesday.
- Early sown crop harvesting has been completed and it started in nominal quantities in the Nizamabad benchmark market. Overall harvest will start from the end of February month.
- In Sangli district Turmeric harvesting started and in the other districts like Hingoli and Nanded it will start from mid-week of February.

Previous Update:

- AgriWatch initial estimates, Turmeric (Dry) all India production for 2023 is at 5.13 lakh MT compared to last year's 4.67 lakh MT.
- *As per AgriWatch revised estimates, Turmeric all India sowing area for 2022 is estimated at 1.70 lakh hectares as compared to last year 1.66 lakh hectares, up by 2.44%.*
- AgriWatch estimates, Turmeric (Dry) all India production for 2022 is revised lower at 4.67 lakh MT compared to last year's 4.89 lakh MT. Crop damage reports due to excessive rainfall during October and November in AP and Telangana remain the key reason for revising production downwards.

BLACK PEPPER

Fundamentals:

Today's Update:

- Steady to weak sentiment was witnessed in Black pepper spot market on Tuesday.
- Current year lower production in India supported the domestic prices. As per trade sources production down by around 10% compared to last year.
- Vietnam Pepper price as on last trade in the domestic market remained unchanged compared to previous trading day. Specifically, Dak Lak and Dak Nong pepper prices today remained at 57,000 VND/kg. Pepper price in Gia Lai traded at 56,000 VND/kg; unchanged, in Dong Nai it is still purchased at 57,000 VND/kg. The latest pepper price as on last trade in Ba Ria - Vung Tau remained at the threshold of 57,500 VND/kg; The price of Binh Phuoc continues to be purchased at 57,000 VND/kg.
- In 2022, Vietnam pepper export reported 228,000 tons, a decrease of 12% in volume compared to the same period in 2021.
- The main harvest season of Vietnam lasts until the end of April. The Vietnam Pepper Association (VPA) predicts that in 2023 production will increase by about 5% compared to 2022 to 180,000-185,000 tons.

Previous Update:

- As per current situation, AgriWatch expects India's pepper production for 2022-23 likely to be around 52,000 to 53,000 MT. Last year production was 57,000 to 58,000 MT.
- In 2022, global pepper demand will decrease due to high inflation and China's "Zero COVID" policy. However, the pepper price in 2022 is higher than in 2021, leading to an increase in the value of imports from many markets. It is forecasted that in the short term, pepper imports of the German, British and French markets will remain low.

JEERA (CUMIN SEED)

Fundamentals:

Today's Update:

- Continued mixed sentiment has been recorded in Jeera spot market on Tuesday.
- Currently buyers are reported sideways in most of the Cumin cash markets as they are waiting for further improvement in the crop situation.
- As per AgriWatch initial estimates, current year Cumin seed expected production would be around 3.00 lakh MT as compared to last year 3.16 lakh MT, down by 5.06%.
- Overall keeping in view of lower ending stocks by 50% till the end of the coming marketing year Cumin prices are likely to trade in firm sentiment.

Previous Update

- On the Rabi sowing front, as per the Agriculture Department of Gujarat, as on 23rd January 2023, about 275,830 hectares of sowing has been completed in Jeera against 307,135 hectares sown in the corresponding period last year down by 10.19% due to higher temperature during the sowing period. The normal area (three years average) is 421,457 hectares.
- Thunderstorms with lightning and hail storms over isolated place in Cumin growing regions in Rajasthan are expected between 24th Jan, 2023 to 28th Jan 2023. These situations may result in damage to standing crops.
- However, the situation has started to improve in Rajasthan due to a drop in temperature during the past weeks. But now if a hail storm-like situation happens then there are high chances of crop damage.
- In Gujarat Jeera sowing area may go down 20 - 25%, however in Rajasthan area up by 10 - 12%, but yield may lower current year due to higher temperature earlier and currently frost situation in some areas. However, actual damage percentage may come after 7 to 10 days.
- As per AgriWatch initial estimates, current year Jeera all India sowing area is estimated at 7.09 lakh hectares as compared to last year 7.26 lakh hectares, down by 2.31%.
- As per the AgriWatch production estimate, Jeera production for 2022-23 (Marketing Year) is estimated at 316,281 MT (around 58 lakh bags each of 55 kg) compared to last year's 391,801 MT (71 lakh bags).

CARDAMOM

Fundamentals

Today's Update:

- Mixed sentiment has been recorded in Small Cardamom Kerala (Kochi) spot market on Tuesday.
- Lower supply reported as planters are expecting higher prices in coming days for releasing their produce.

Previous Update:

- Current year Guatemala Cardamom production reported higher, around 40,000 MT. But for the best quality buyers are looking for Indian variety due to which bullish sentiment is expected in coming days.
- Good export demand reported for Indian small Cardamom due to quality. We expect buyers likely to active further in the spot market and support the prices.
- As per initial report AgriWatch estimates India's production for the marketing year 2022-23 is expected to be around 30,000 metric tonne (MT). Last year it was 27,000 MT. Favorable weather condition in Kerala growing regions is the main reason for higher production expectations.

CORIANDER SEED

Fundamentals:

Today's Update:

- By and large steady sentiment was recorded in Coriander spot market on Tuesday.
- Anticipation of higher production this season keeping the trade participants away from the market, which is further weighing on prices.
- *As per AgriWatch estimates, Current year Coriander seed expected production would be around 4.43 lakh MT as compared to last year 3.10 lakh MT, down by 5.06%.*
- New Coriander crop has started in Neemuch and Ramganj spot markets around 150 to 250 bags on an average daily basis with higher moisture content.
- New crop arrivals are likely to start after 15 Feb, 2023 in bulk quantities and it is expected that prices may correct after that on higher production.
- Overall keeping in view of higher ending stocks in the coming marketing year Coriander prices are likely to trade in weak sentiment. However, weather is likely to play very important role in the next 15 to 20 days as the Coriander standing crop is at maturity stage.

Previous Update:

- Reportedly, due to higher prices in Coriander cash markets, its sowing area in Gujarat's growing regions is likely to increase by 60%-70% from the previous year. In Madhya Pradesh, it is likely to increase by 30%-35% from the season 2021-22.
- However, in Rajasthan growing regions, the total sowing area may increase by 10%-15% from the previous year. It is mainly because farmers are interested in sowing other commodities like Paddy, Mustard, etc. because of higher prices as compared to Coriander.
- As per AgriWatch estimates, current year Coriander all India sowing area is estimated at 4.08 lakh hectares as compared to last year 2.97 lakh hectares, up by 37% due to all time higher prices at the time of sowing period.
